

Drive Team Excellence with Adobe Experience Manager (AEM) Developer Corporate Training

Equip your engineering teams with the expertise to build, customize, and maintain enterprise-grade AEM solutions.

Static CMS

Organizations rely on rigid, siloed content management systems that limit personalization, slow publishing, and disconnect digital channels.

AEM Developer Expertise

CUSTOM COMPONENTS

AUTOMATED WORKFLOWS

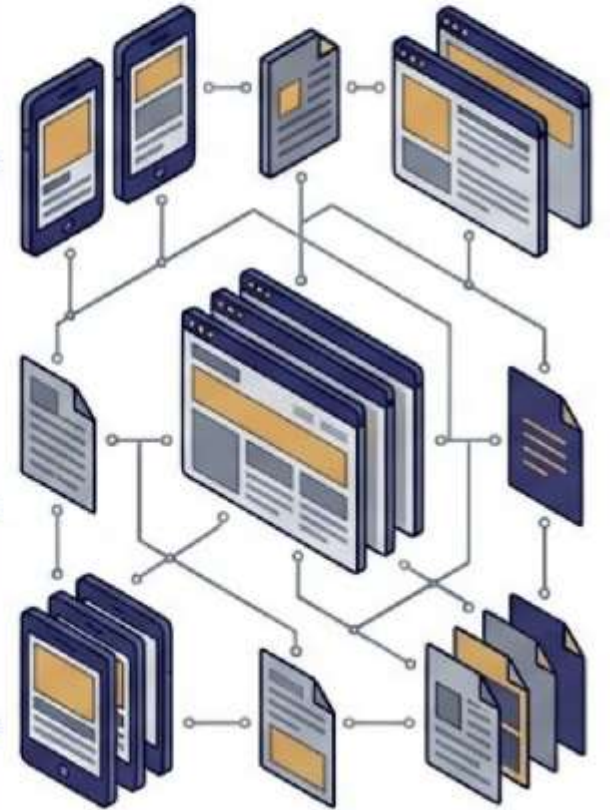

AEM Developer Expertise

Skilled AEM developers unlock the platform's full potential—custom components, workflows, and integrations that transform content operations.

CUSTOM COMPONENTS

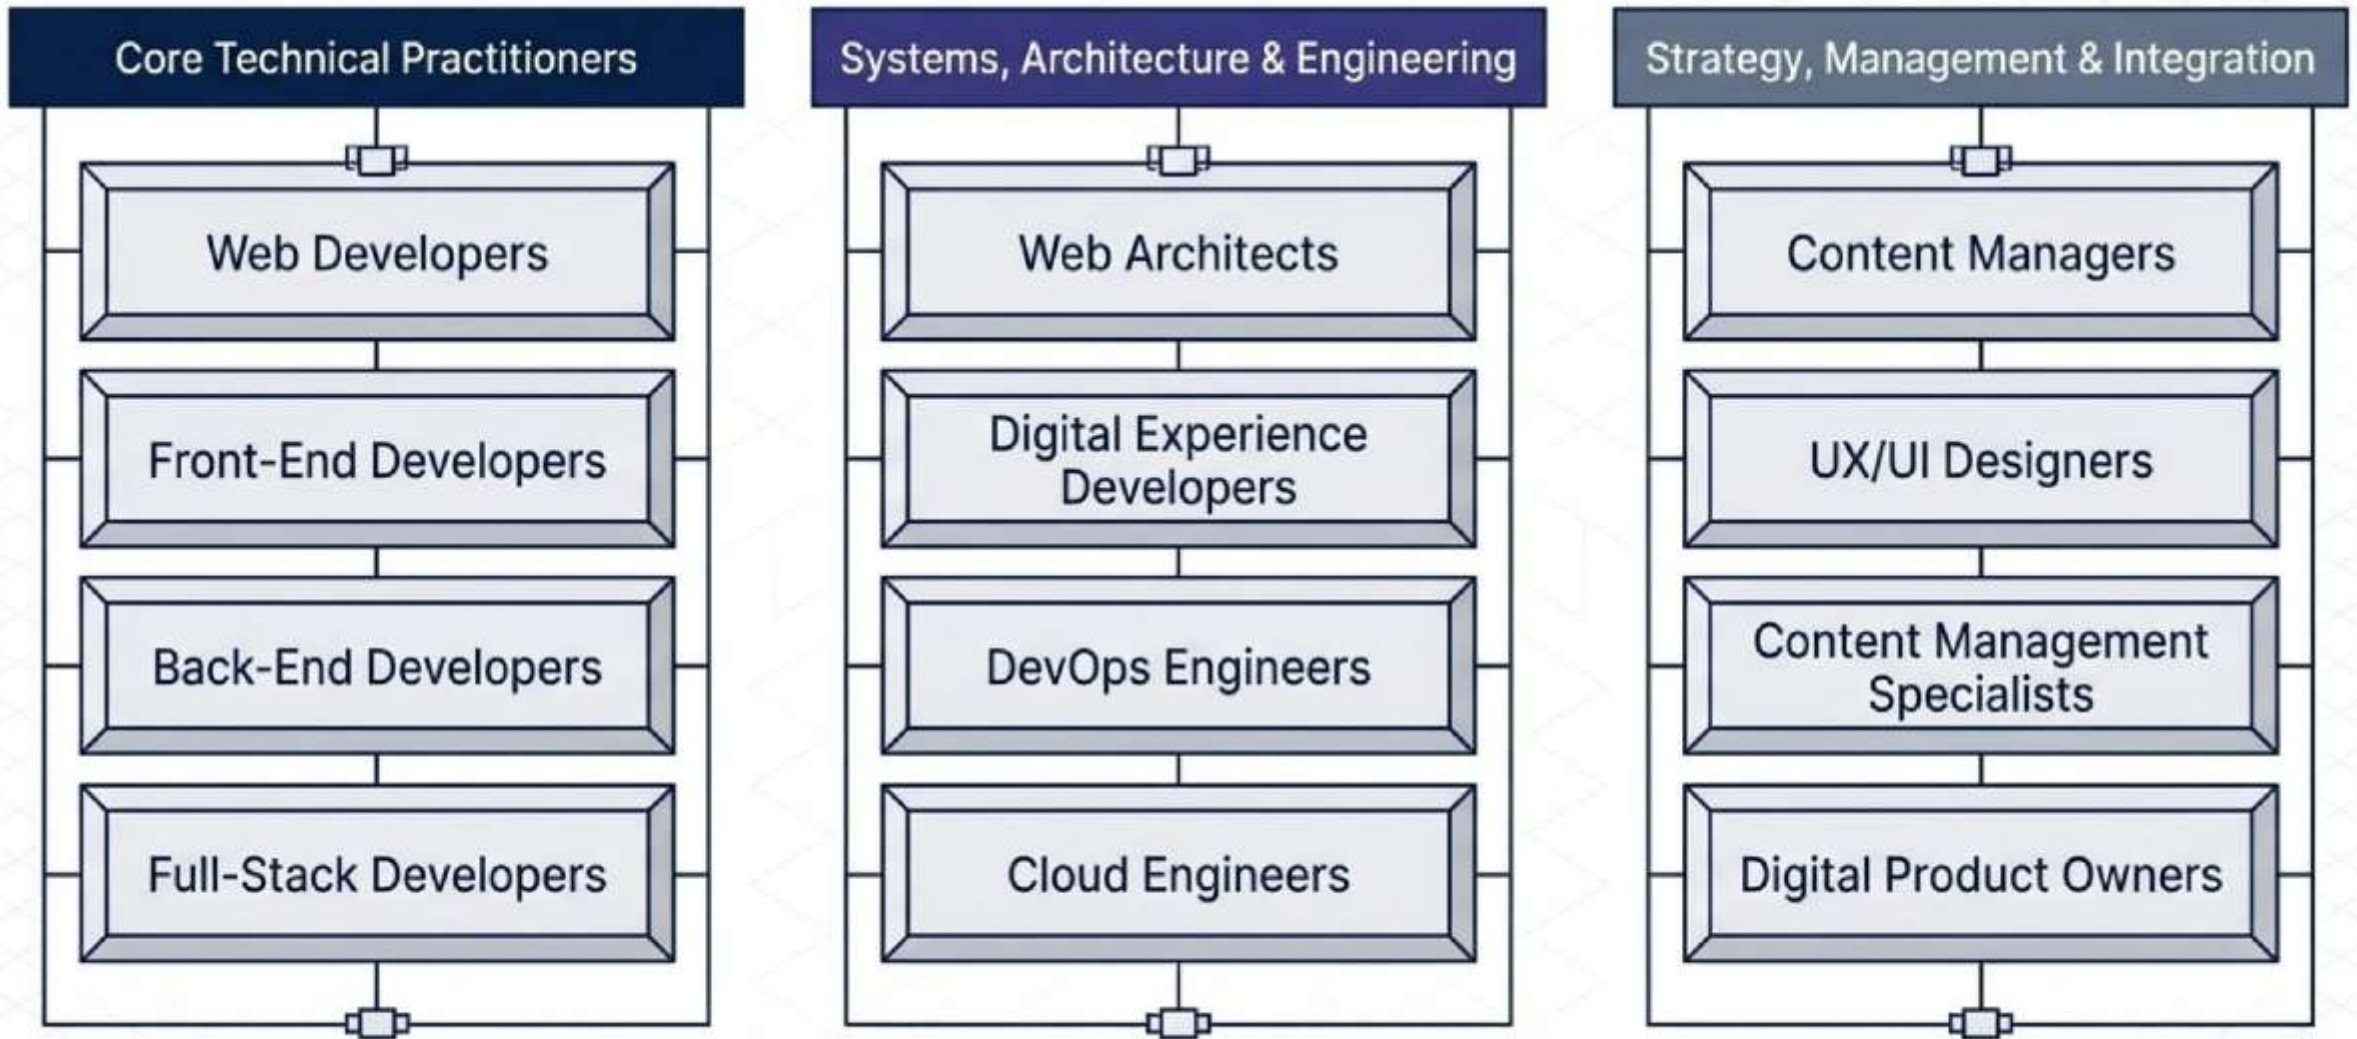

API INTEGRATIONS

Dynamic Digital Experience

Businesses deliver engaging, personalized experiences across websites, mobile apps, and digital campaigns with speed and consistency at scale.

Aligning Talent to Architecture: Target Audience Mapping

Enterprise Capability

Input Requirement
Basic understanding of web technologies, programming concepts, and familiarity with AEM.

Milestone 1
Install, configure, and administer AEM environments (users, ACL permissions, replication agents, Dispatcher).

Milestone 2
Build custom components, Touch UI dialogs, clientlibs, templates, and extend AEM Core components.

Milestone 3
Develop and manage custom OSGi services and bundles; package and deploy projects with Maven.

Milestone 4
Troubleshoot OSGi bundles, dispatcher caching, remote debugging, and browser-side rendering issues.

Enterprise AEM Mastery
Design, build, and maintain enterprise-grade AEM solutions at production scale.

Step 1

Step 2

Step 3

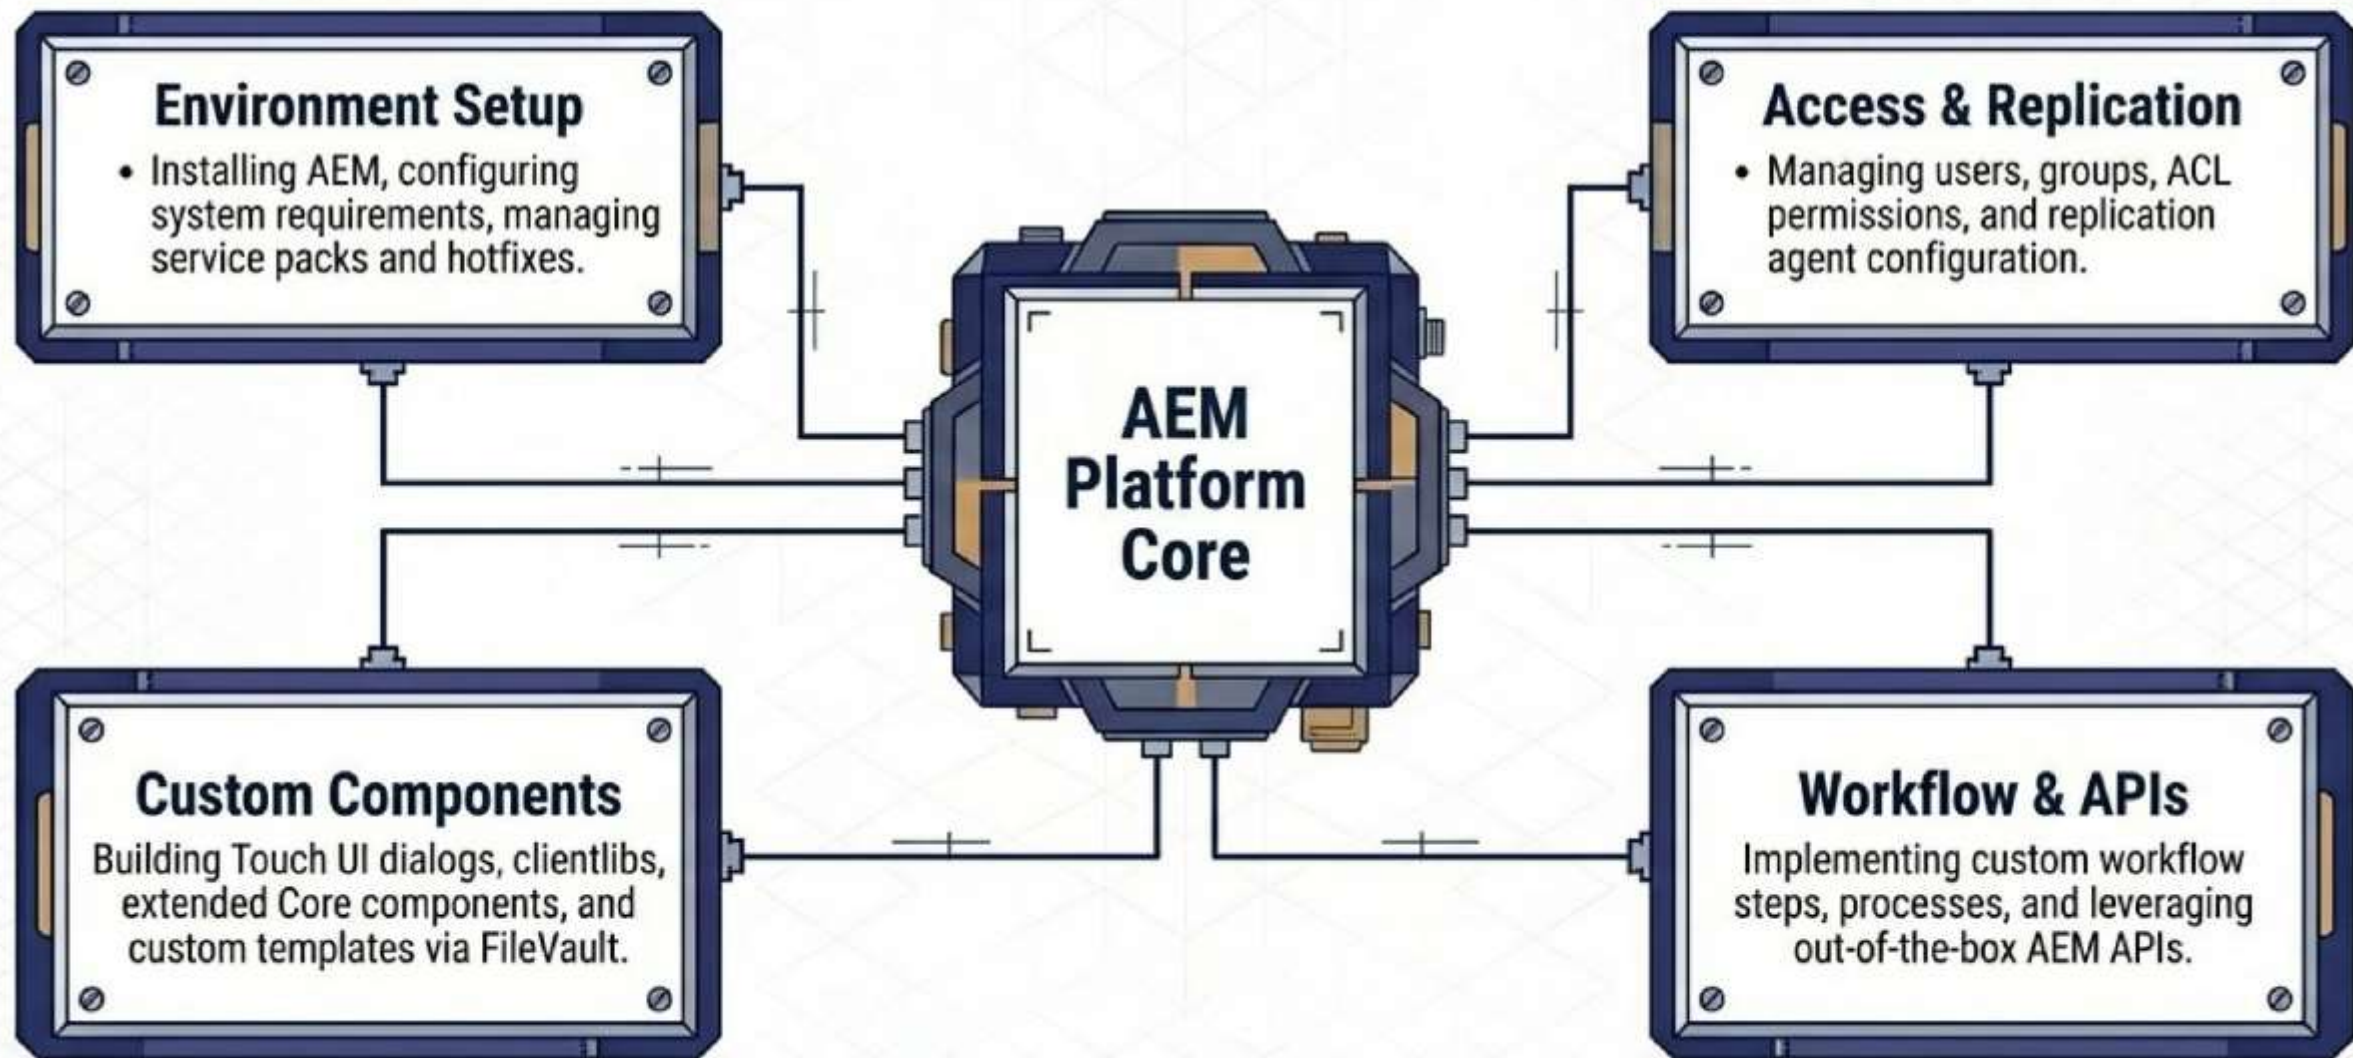

Step 4

Step 5

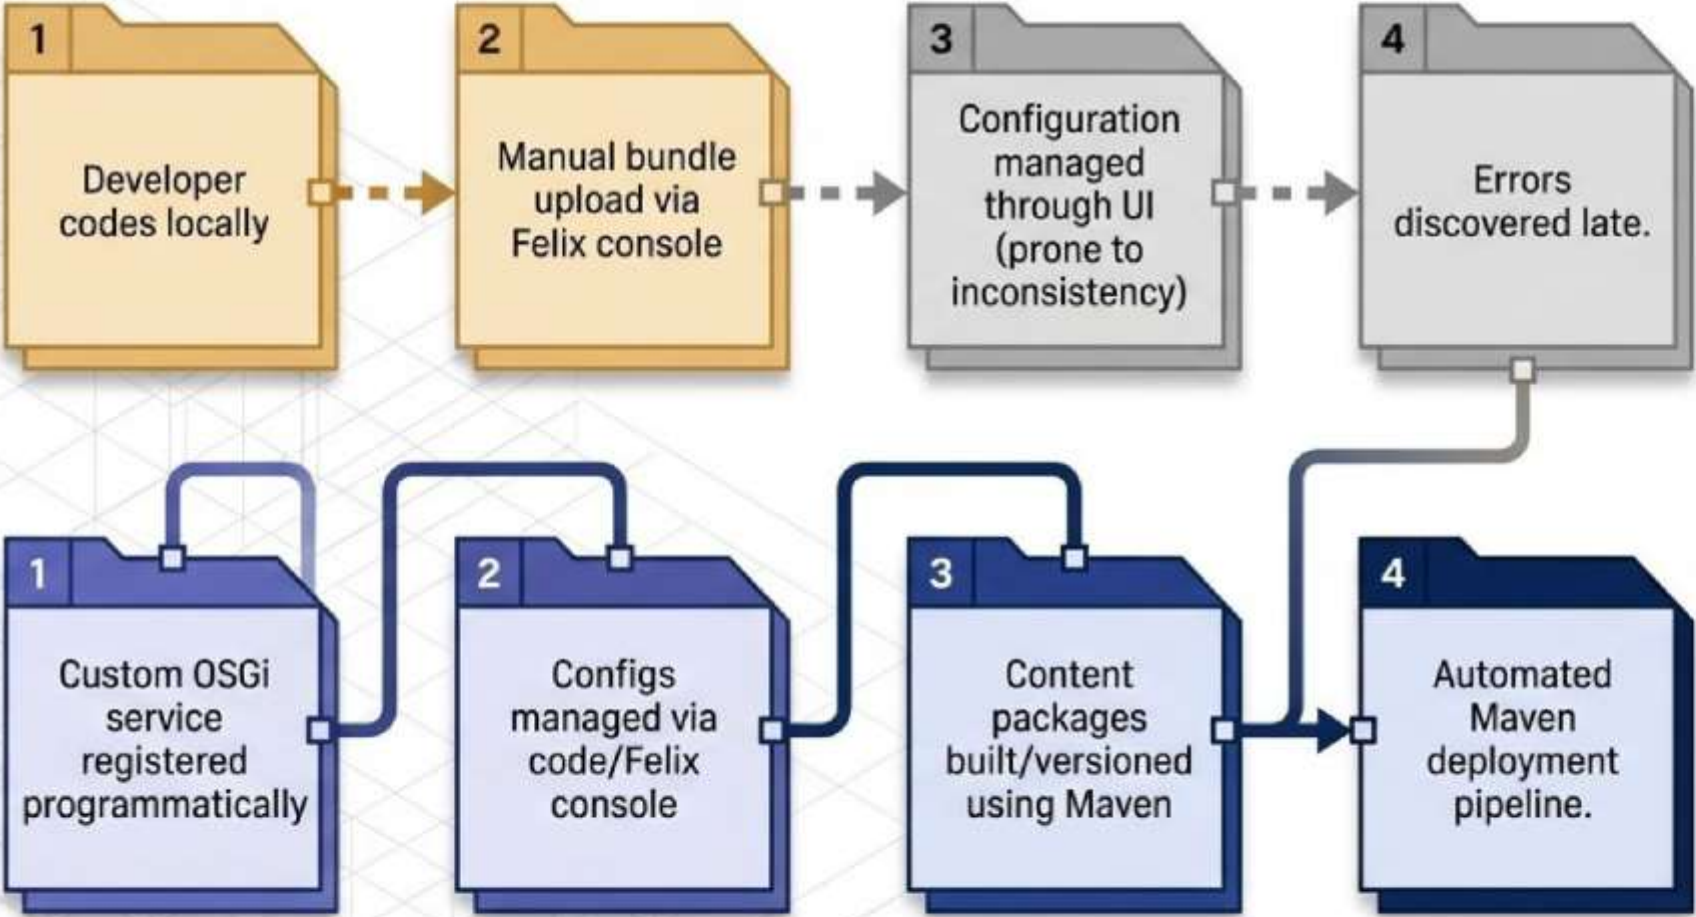

Step 6

Training Progression

Phase 1: Platform Setup & Component Architecture

Phase 2: OSGi Services & Automated Deployment

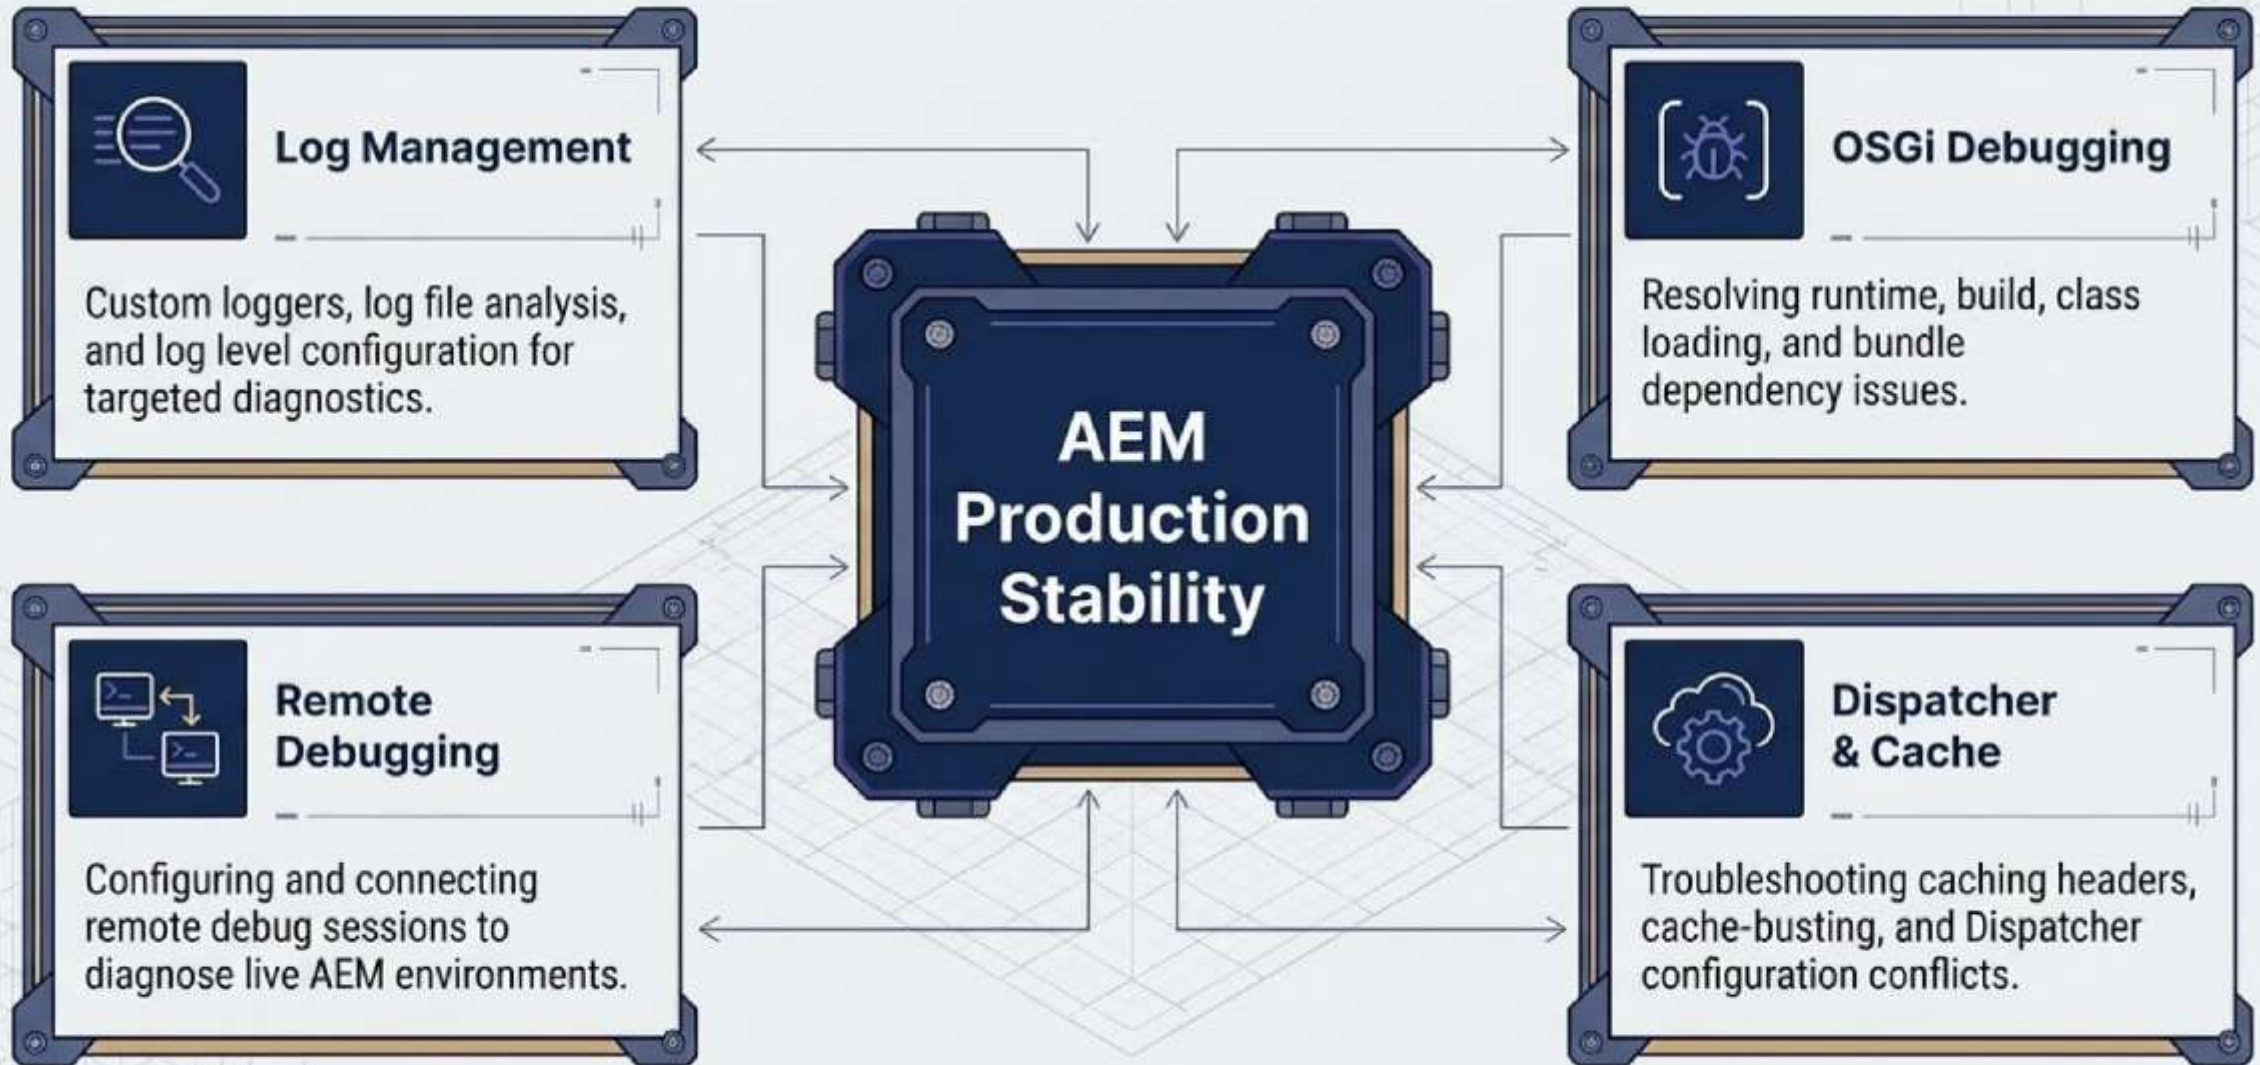

OSGi Services Lifecycle Management

Felix Console Troubleshooting

Maven Packaging & Dependency Control

Phase 3: Diagnostics, Debugging, and Production Stability

Curriculum Synthesis: The AEM Diagnostic Matrix

	AEM Installation & Configuration	Component & Template Development	OSGi & Deployment Management
Core Technique	ACL permissions, replication agent setup, Dispatcher config	Touch UI dialogs, clientlibs, FileVault export	Custom OSGi service creation, Felix console config
Key Tool/API	AEM Admin Console, service packs, hotfixes	AEM Core Component APIs, Maven archetypes	OSGi framework, Maven build plugins
Ultimate Business Outcome	Stable, secure, and maintainable AEM environments	Consistent, reusable digital experience components at scale	Reliable, automated deployment pipelines with version control

Key Engineering Capabilities Acquired

Custom Component Design

Creating tailored software components to meet specific user needs and enhance functionality.

Workflow Implementation

Designing and executing structured processes to streamline content creation and optimal resource utilization.

Website Performance Optimization

Enhancing website speed and efficient resource utilization to boost user experience and conversion rates.

System Integration

Linking external computing systems via APIs to ensure seamless data flow across platforms.

Template Development

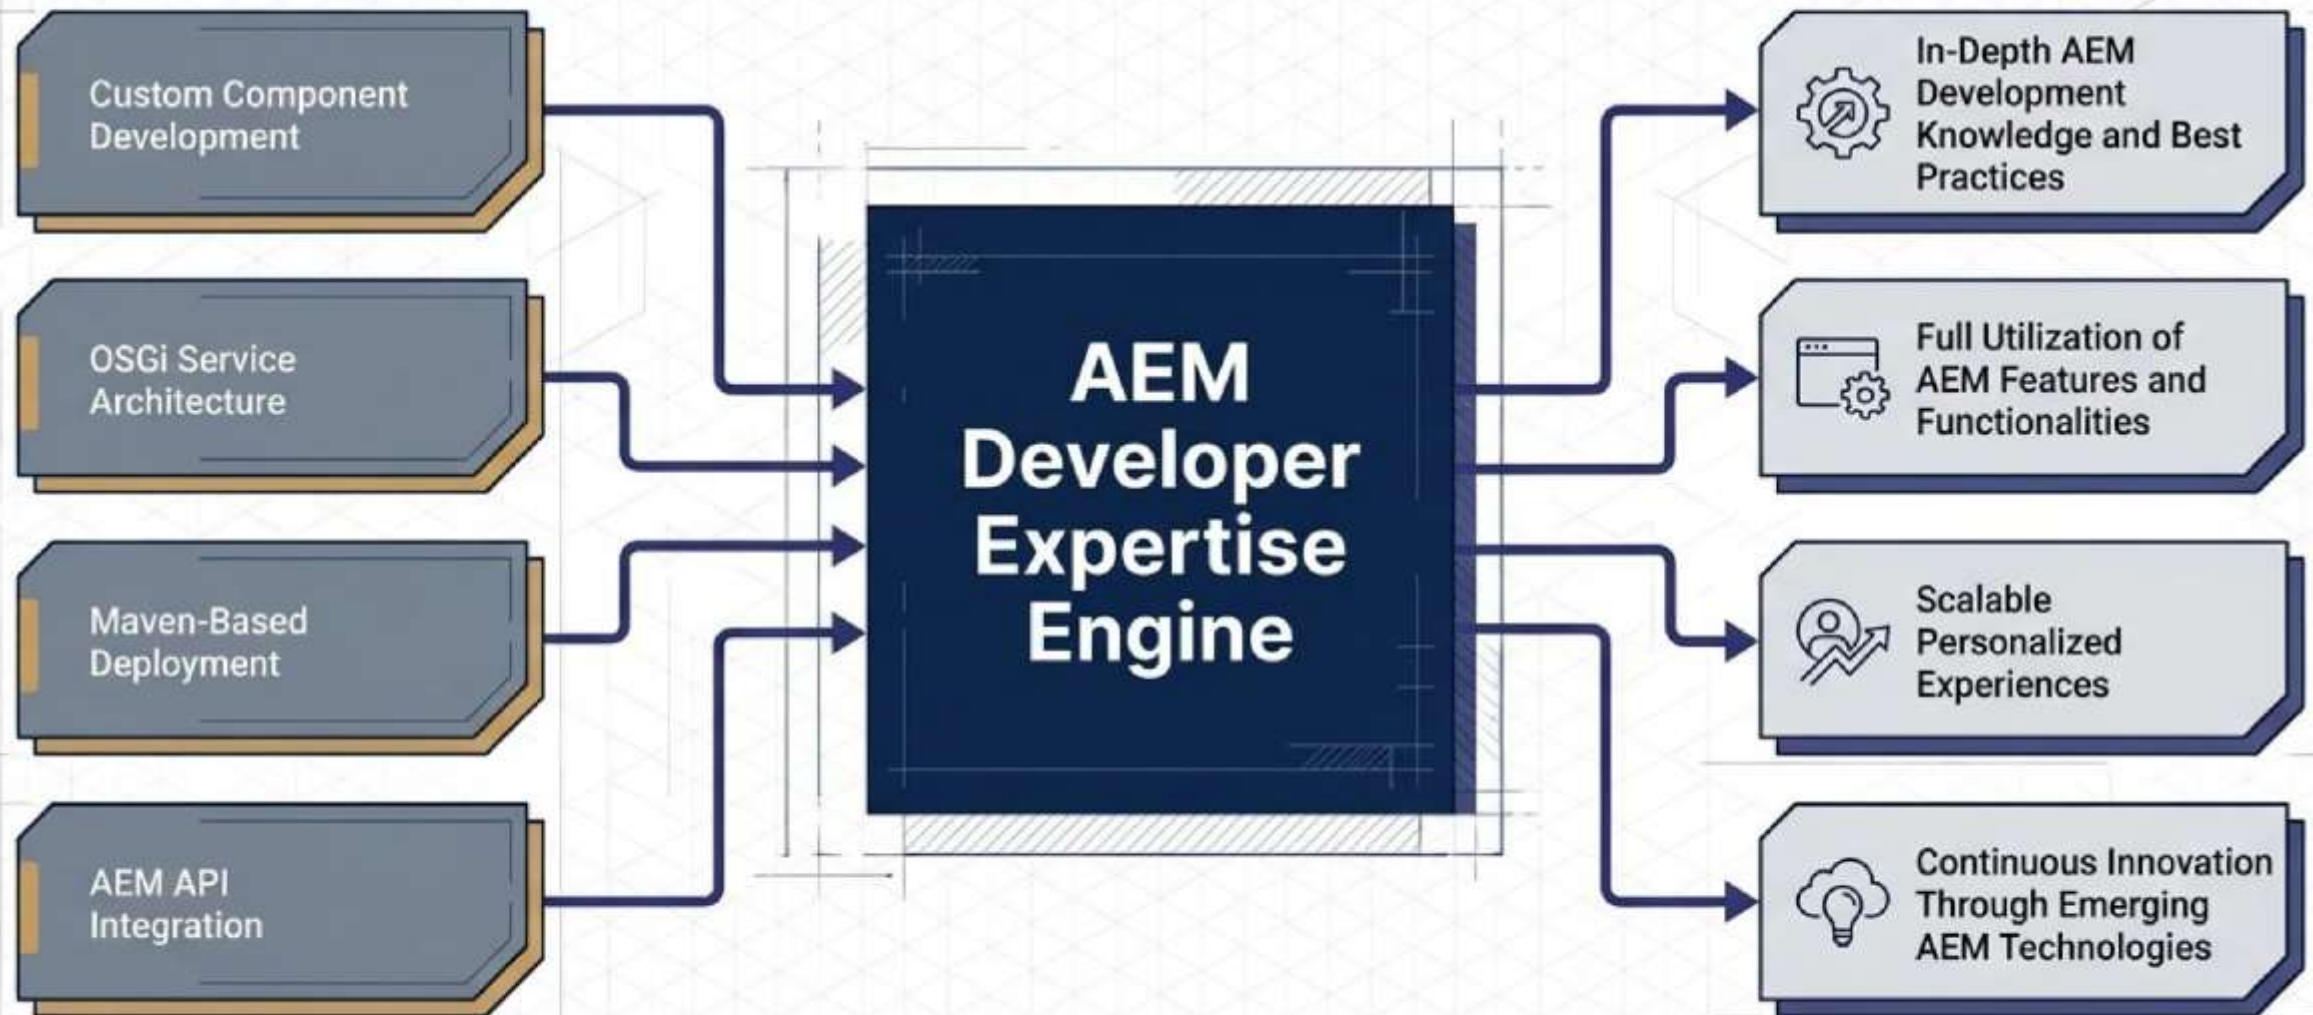

Creating flexible, standardized formats for consistent content presentation across multiple channels.

Application Security

Implementing powerful security measures to safeguard against vulnerabilities and unauthorized access.

Translating Code to Value: The ROI Flow

Scalable Enterprise Delivery Architecture

Virtual Live Instructor-Led

High-quality training anywhere, accommodating large groups, utilizing interactive tools without travel constraints.

On-Site Face-to-Face

Immersive learning in your office, tailored to your specific workplace environment and systems for immediate hands-on application.

Off-Site Face-to-Face

Dynamic, distraction-free environments that improve learning engagement and boost team bonding and morale.

Industry Validation: Engineered for Impact

Transformational... The interactive labs were immediately applicable to my work. I've successfully implemented these advanced techniques in production environments with measurable impact.

Mauricio Chandler, Senior Software Engineer,
Digital Innovation Platform

We've reduced implementation timelines by 45% on comparable projects. The comprehensive curriculum has elevated my solution delivery capabilities significantly.

Sergio Gonzalez, Senior Software Engineer,
Global Technology Solutions

We completed our comprehensive digital transformation initiative significantly ahead of schedule.

Parthasarathy Srinivasan, Senior Software Engineer

The Edstellar Advantage

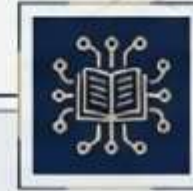

Experienced Trainers

Industry experts bringing practical, field-tested expertise.

Quality Training

Proven global track record of high engagement and retention.

Industry-Relevant Curriculum

Tailored directly to current enterprise demands and AEM updates.

Customizable Training

Curriculums adapted to unique organizational architectures and goals.

Comprehensive Support

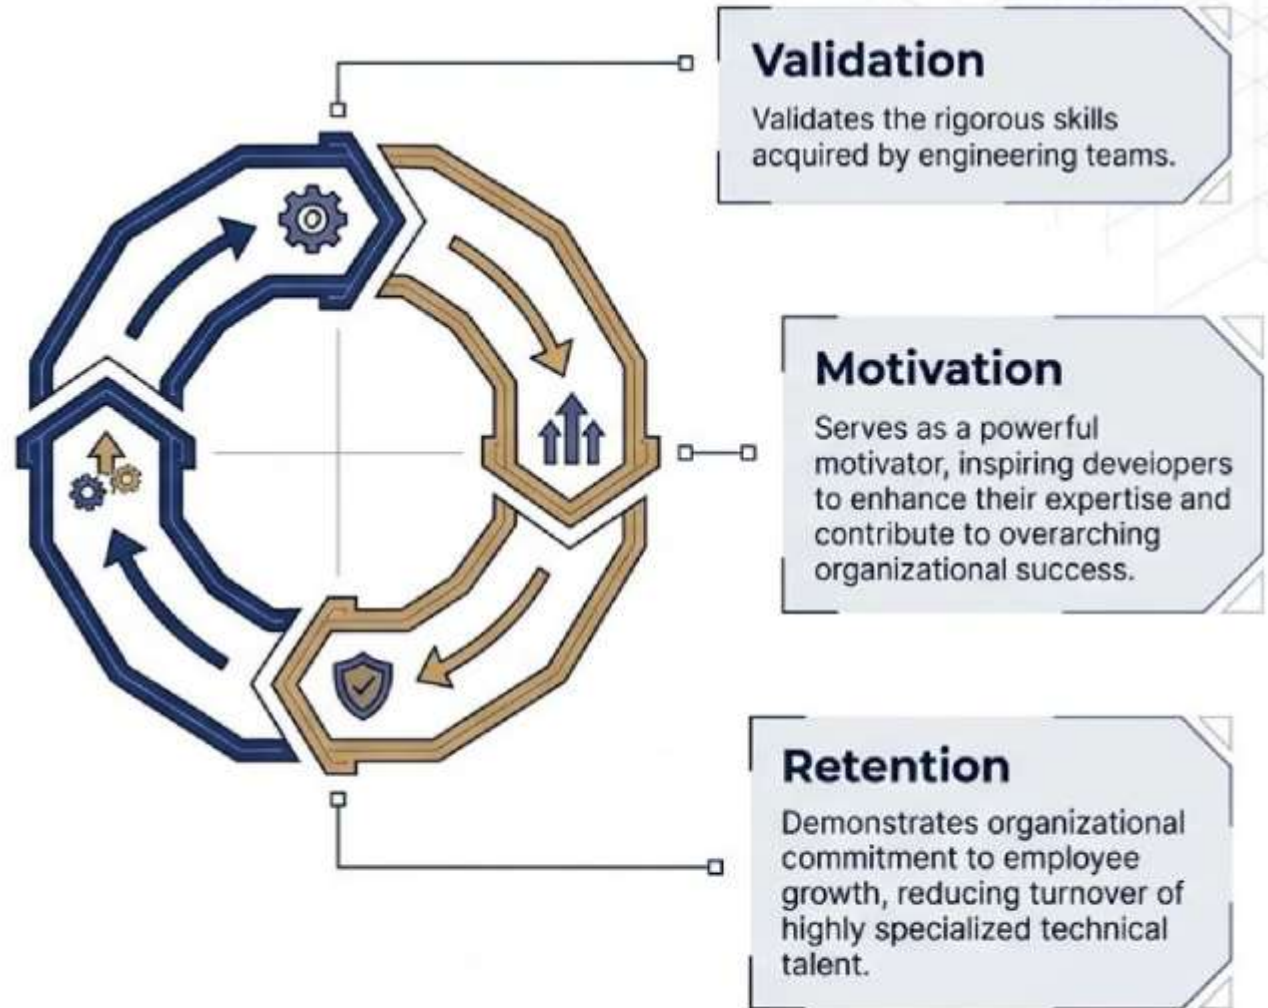

End-to-end pre- and post-training support for seamless integration.

Multilingual Capabilities

Uniform training quality across diverse, global teams.

Certification & Continuous Capability

Deploy Your AEM Capabilities

Equip your development teams with the expertise to build, customize, and maintain enterprise-grade AEM solutions that drive personalized digital experiences at scale.
