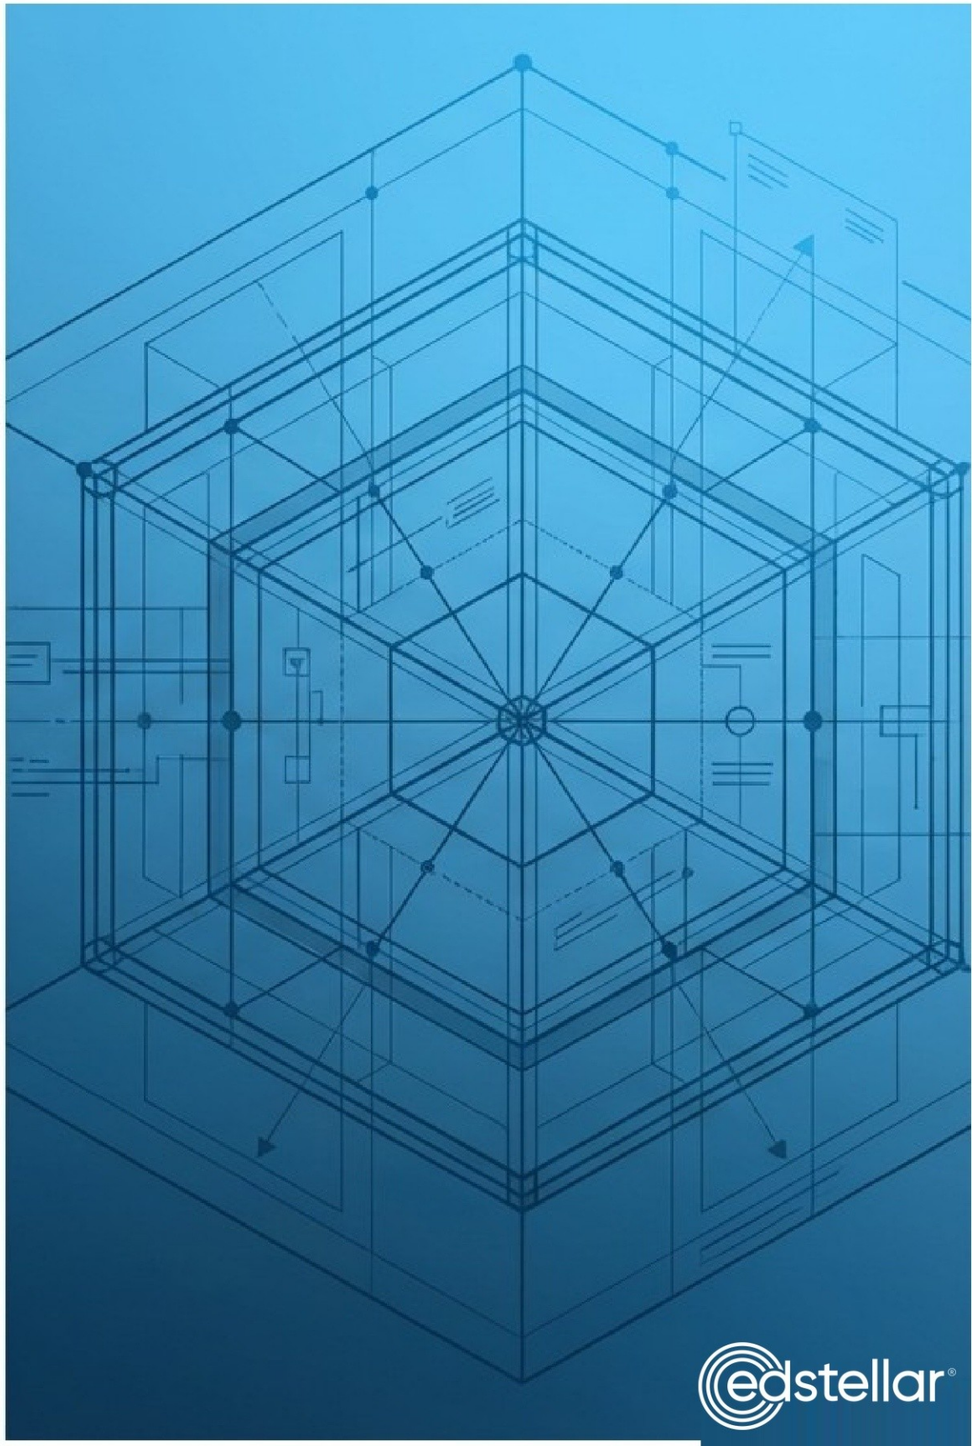
Building Corporate Cyber Resilience

Equipping enterprise teams to defend, respond, and recover from modern digital threats.



The Shift from Protection to Resilience

Traditional Cybersecurity

- IT-centric focus
- Static barrier building
- Threat prevention emphasis

Cyber Resilience

- Business-centric focus
- Cultural adaptation
- Continuous recovery loop

edstellar®

The Business Case for Comprehensive Training

Uninterrupted Operations

Safeguard against diverse cyber threats to ensure business continuity and minimize downtime.

Regulatory Compliance

Adhere to evolving industry frameworks and standards to minimize legal and financial exposure.

Advanced Threat Detection

Equip teams with leading-edge identification capabilities to facilitate prompt intrusion mitigation.

Culture of Vigilance

Drastically reduce susceptibilities associated with human error by cultivating a proactive, security-first ethos across departments.

edstellar®

A Blueprint for Organizational Defense

The 32-40 Hour Edstellar Curriculum Architecture.

edstellar®

The Four Pillars of the Cyber Resilience Curriculum

1. Strategic Frameworks

- NIST implementation steps
- CIA Triad integration (Confidentiality, Integrity, Availability)
- Benchmark requirements

2. Threat Logistics

- Analysis of recent attacks
- Protection and detection tools
- Incident response protocols

3. Business Alignment

- Business Impact Analysis (BIA)
- Selecting Cyber Insurance policies
- Regulatory compliance mapping

4. Cultural Transformation

- Cyber awareness training design
- Reputation management
- Cyberattack tabletop execution

Bridging the Gap: IT Security Meets Business Operations

Effective resilience requires dismantling silos. The curriculum explicitly trains incident response and operational teams to collaborate in real-time.

edstellar®

Concrete Capabilities Gained Post-Training

- **Map** the cause-and-effect relationship between security incidents and business continuity.
- **Implement** recognized strategic frameworks (NIST, CIA Triad) in real-world scenarios.
- **Establish** baseline benchmarks required to claim effective organizational cyber resilience.
- **Anticipate** advanced, sophisticated threats that evade traditional IT security measures.
- **Drive** organizational culture changes to foster awareness and preparedness.
- **Execute** effective crisis communication plans and tabletop simulation exercises.

Mapping the Curriculum to Critical Organizational Roles

Technical Defenders

Roles Include:

IT Security Professionals, Network Engineers, System Admins.

Primary Focus:

Advanced threat detection, NIST adaptation, incident response protocols.

Strategic Planners

Roles Include:

Risk Managers, Compliance Officers, Security Architects.

Primary Focus:

Business impact analysis, cyber insurance selection, regulatory mapping.

Operational Leaders

Roles Include:

Incident Response Teams, Data Protection Officers.

Primary Focus:

Tabletop exercises, crisis communication, reputation management.

Global Deployment Logistics

Tailored to your operational reality, delivered at scale.

edstellar®

Flexible Delivery Modes for Any Operational Reality

Virtual Live (VILT)

- Global scale, no travel requirements.
- Consistent training quality across multiple geographies.
- Features interactive tools for engagement.

On-Site Face-to-Face

- In-house at your office.
- Tailored to your specific workplace environment.
- High engagement and direct instructor interaction.

Off-Site Face-to-Face

- Dedicated external venue.
- Distraction-free learning environment.
- Highly effective for team bonding and deep immersion.

edstellar®

Enterprise-Grade Scale and Localization

100+
Countries Reached

10+
Native Languages
(English, Español, Deutsch, 普通话, etc.)

ISO
9001 & 27001
Certified Quality

edstellar®

Scalable Group Licensing Packages

Starter

120 Licenses

64 Hours of group training

Tailored for SMBs.

Most Popular

Growth

320 Licenses

160 Hours of group training

Ideal for growing organizations.

Enterprise

800 Licenses

400 Hours of group training

Designed for large corporations.

Custom

Unlimited Licenses

Unlimited Duration

Tailored global packages.

edstellar®

Proven Impact on Enterprise Security Teams

> Instrumental in strengthening our engineering teams... improved technical depth and problem-solving across multiple projects.
>
> **L&D Head, Global Technology Company**

> Transformed my approach. I can now confidently implement advanced methodologies... enabled us to secure a transformative contract.
>
> **Senior Security Engineer, Cyber Defense Provider**

> Revolutionized our professional approach... reduced operational costs by **40%** while improving service quality.
>
> **Principal Information Security Officer**

edstellar®

Recognizing Competence with Edstellar Certification

Every participant receives a verified completion certificate, validating their ability to protect digital assets and execute resilience protocols.

Motivates Continued Learning

Provides employees with a tangible milestone that encourages further skill development.

Benchmarks Team Capabilities

Allows management to clearly audit and map the cybersecurity competencies present within operational teams.

Auditable Proof of Compliance

Serves as verified documentation to satisfy regulatory training requirements and industry standards.

edstellar®

Secure Your Organization's Future

Equip your workforce to anticipate, withstand, and recover from modern digital threats.
