

Corporate R3 Corda Blockchain Training

Drive Team Excellence With Scalable
Distributed Ledger Capabilities

The Distributed Ledger Transformation

Centralized Vulnerabilities And High Operational Costs

Legacy financial systems suffer from siloed data, reconciliation delays, and elevated security risks.

R3 Corda Framework Adoption

Implementing a decentralized ledger designed specifically for the security and privacy needs of regulated institutions.

Secure, Efficient, And Transparent Automated Transactions

Streamlined operations resulting in reduced transaction costs and guaranteed data integrity across the enterprise network.

Strategic Program Specifications

The Capability Activation Staircase

Modular Learning Framework

Phase One:
Foundation And Logic

Establishing distributed ledger principles and application architecture.

Corda Concepts · CorDapp Creation
· Kotlin Security

Phase Two:
Network And Execution

Deploying active infrastructure and decentralized automation.

Node Configuration · Smart Contracts
· RPC APIs

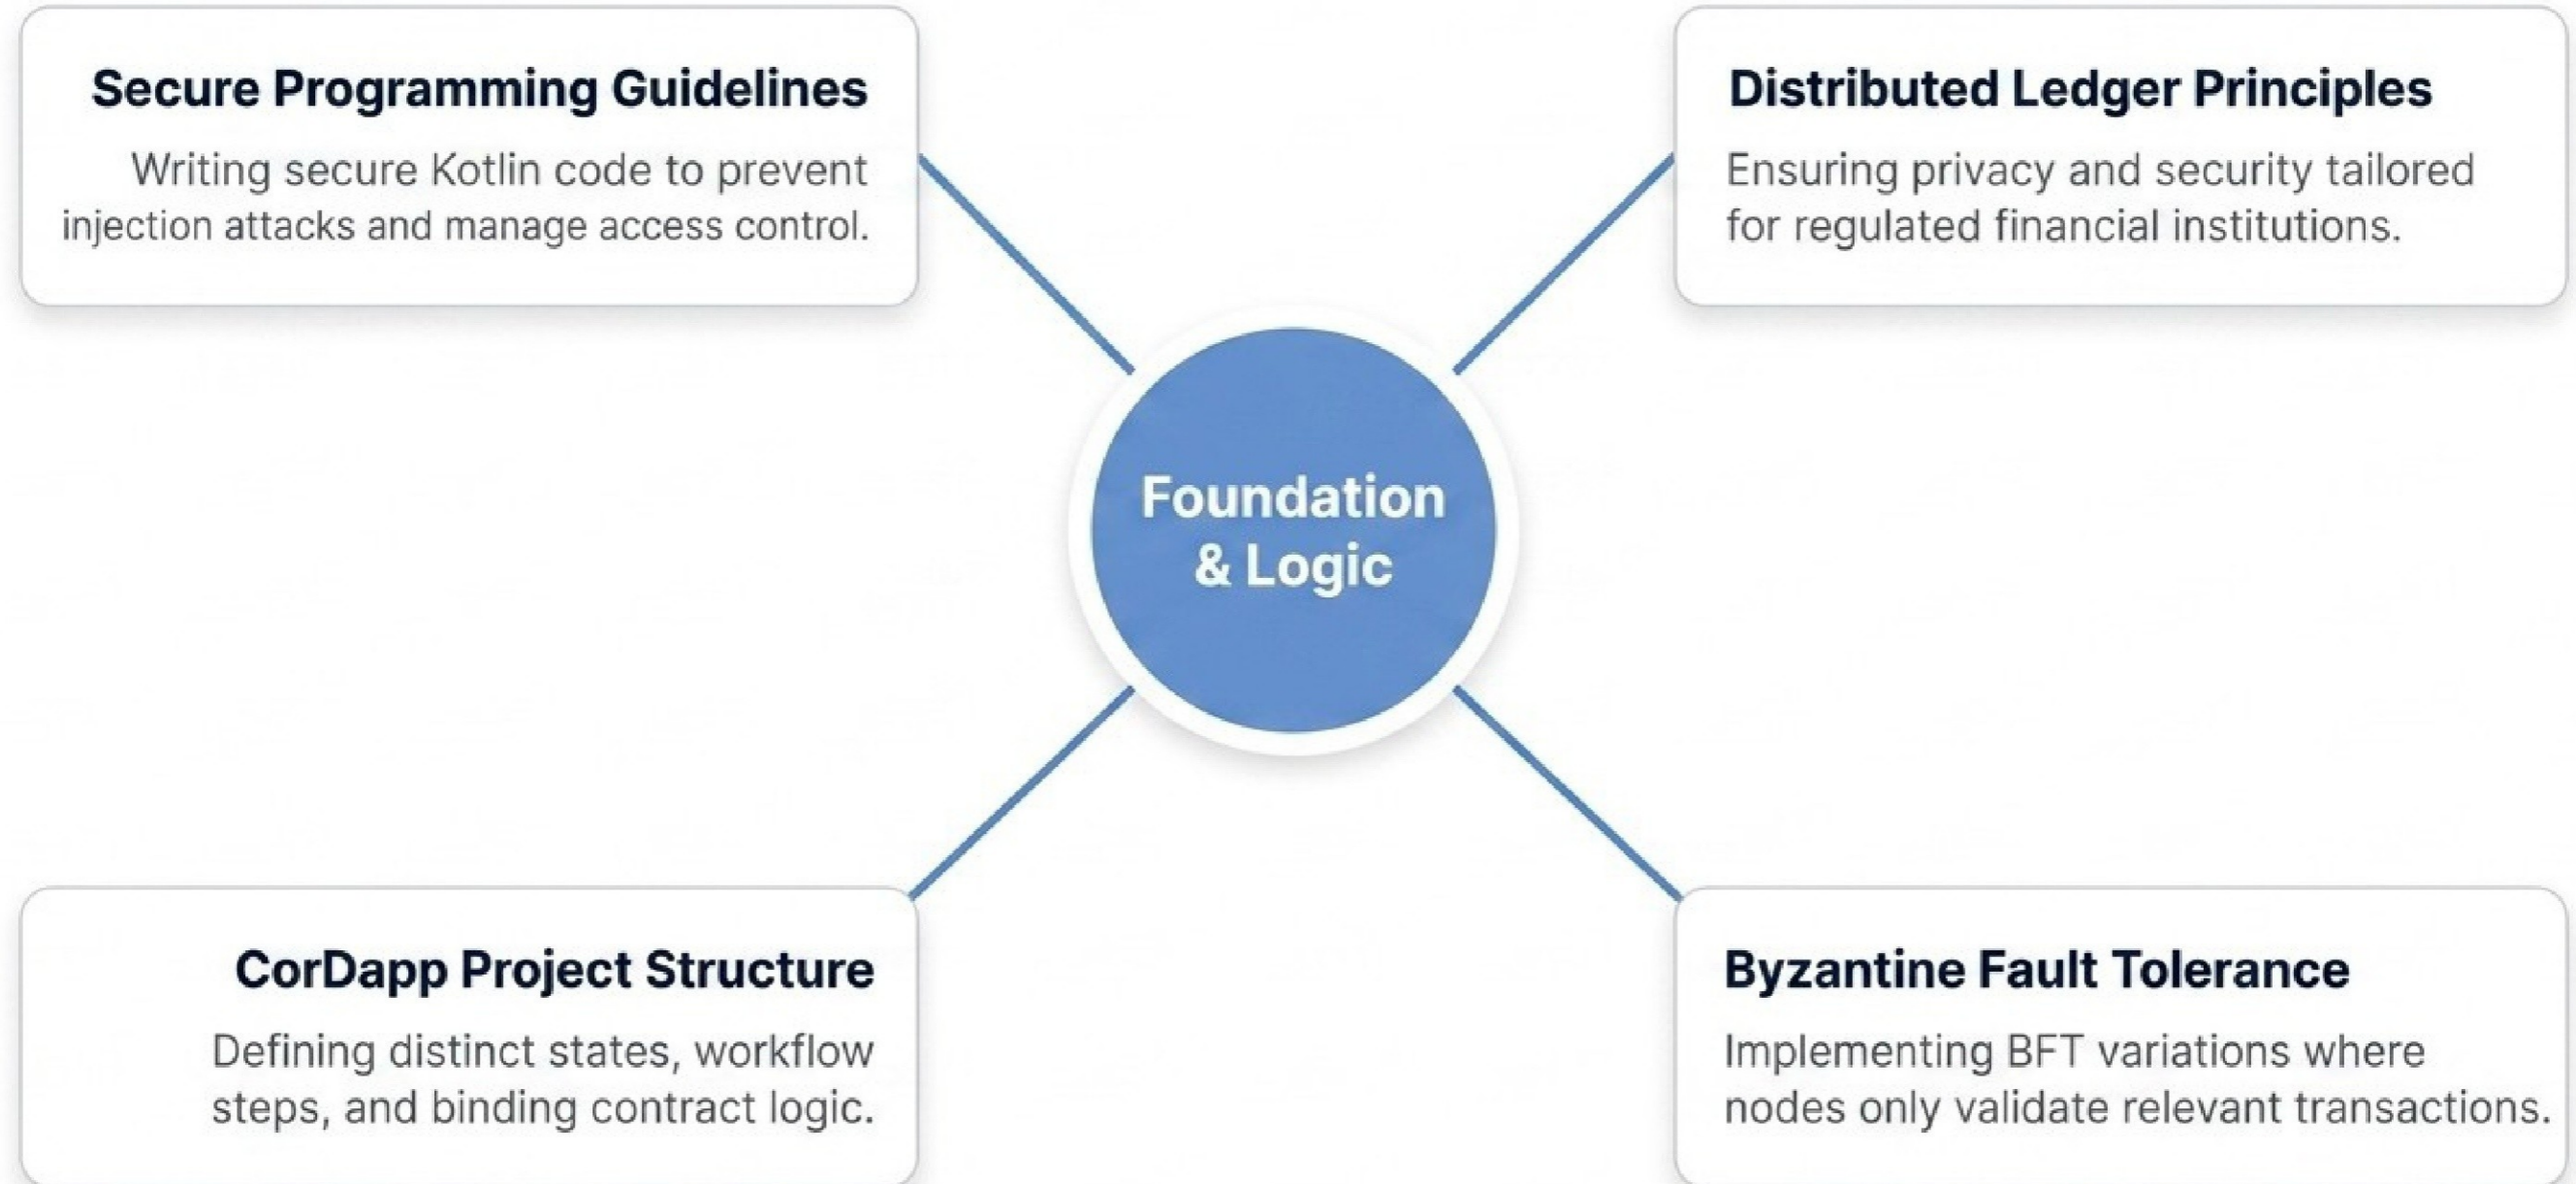

Phase Three: Optimization
And Mastery

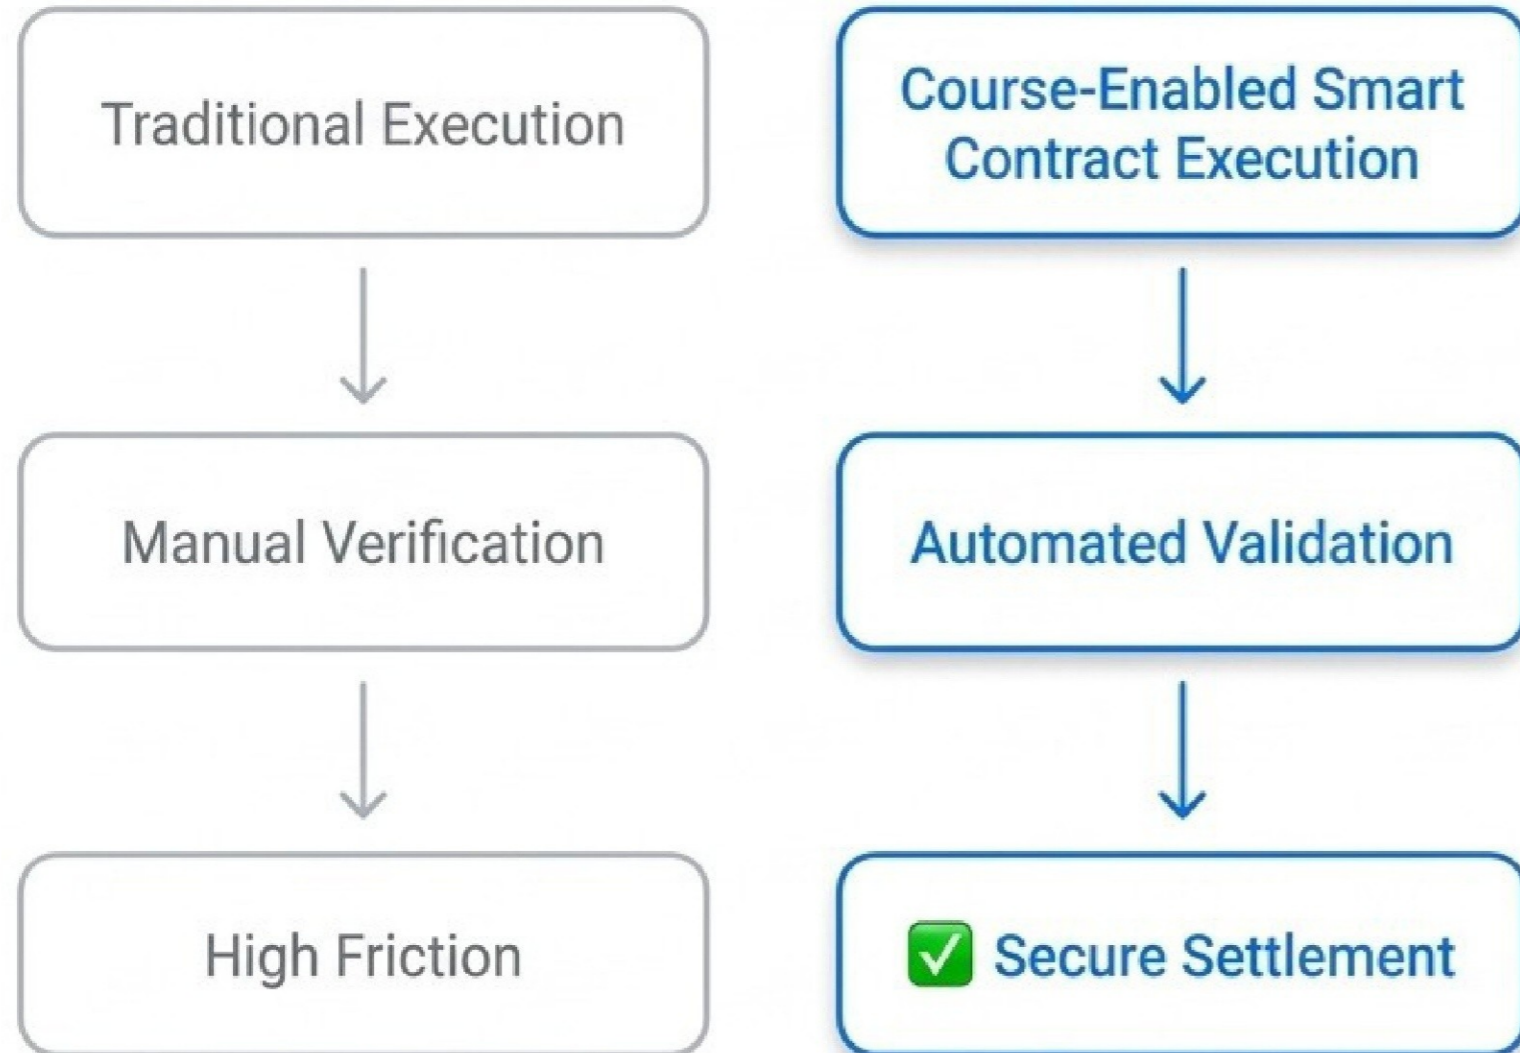

Finalizing real-world workflows and system troubleshooting.

Transaction Lifecycles · Business Modeling · JVM Diagnostics

Phase One: Foundation And Logic

Phase Two: Network And Execution

Node Deployment

Configuring local testing, Docker deployment, and high availability setups.

Network Map Service

Managing topology changes and discovering participants across the Corda network.

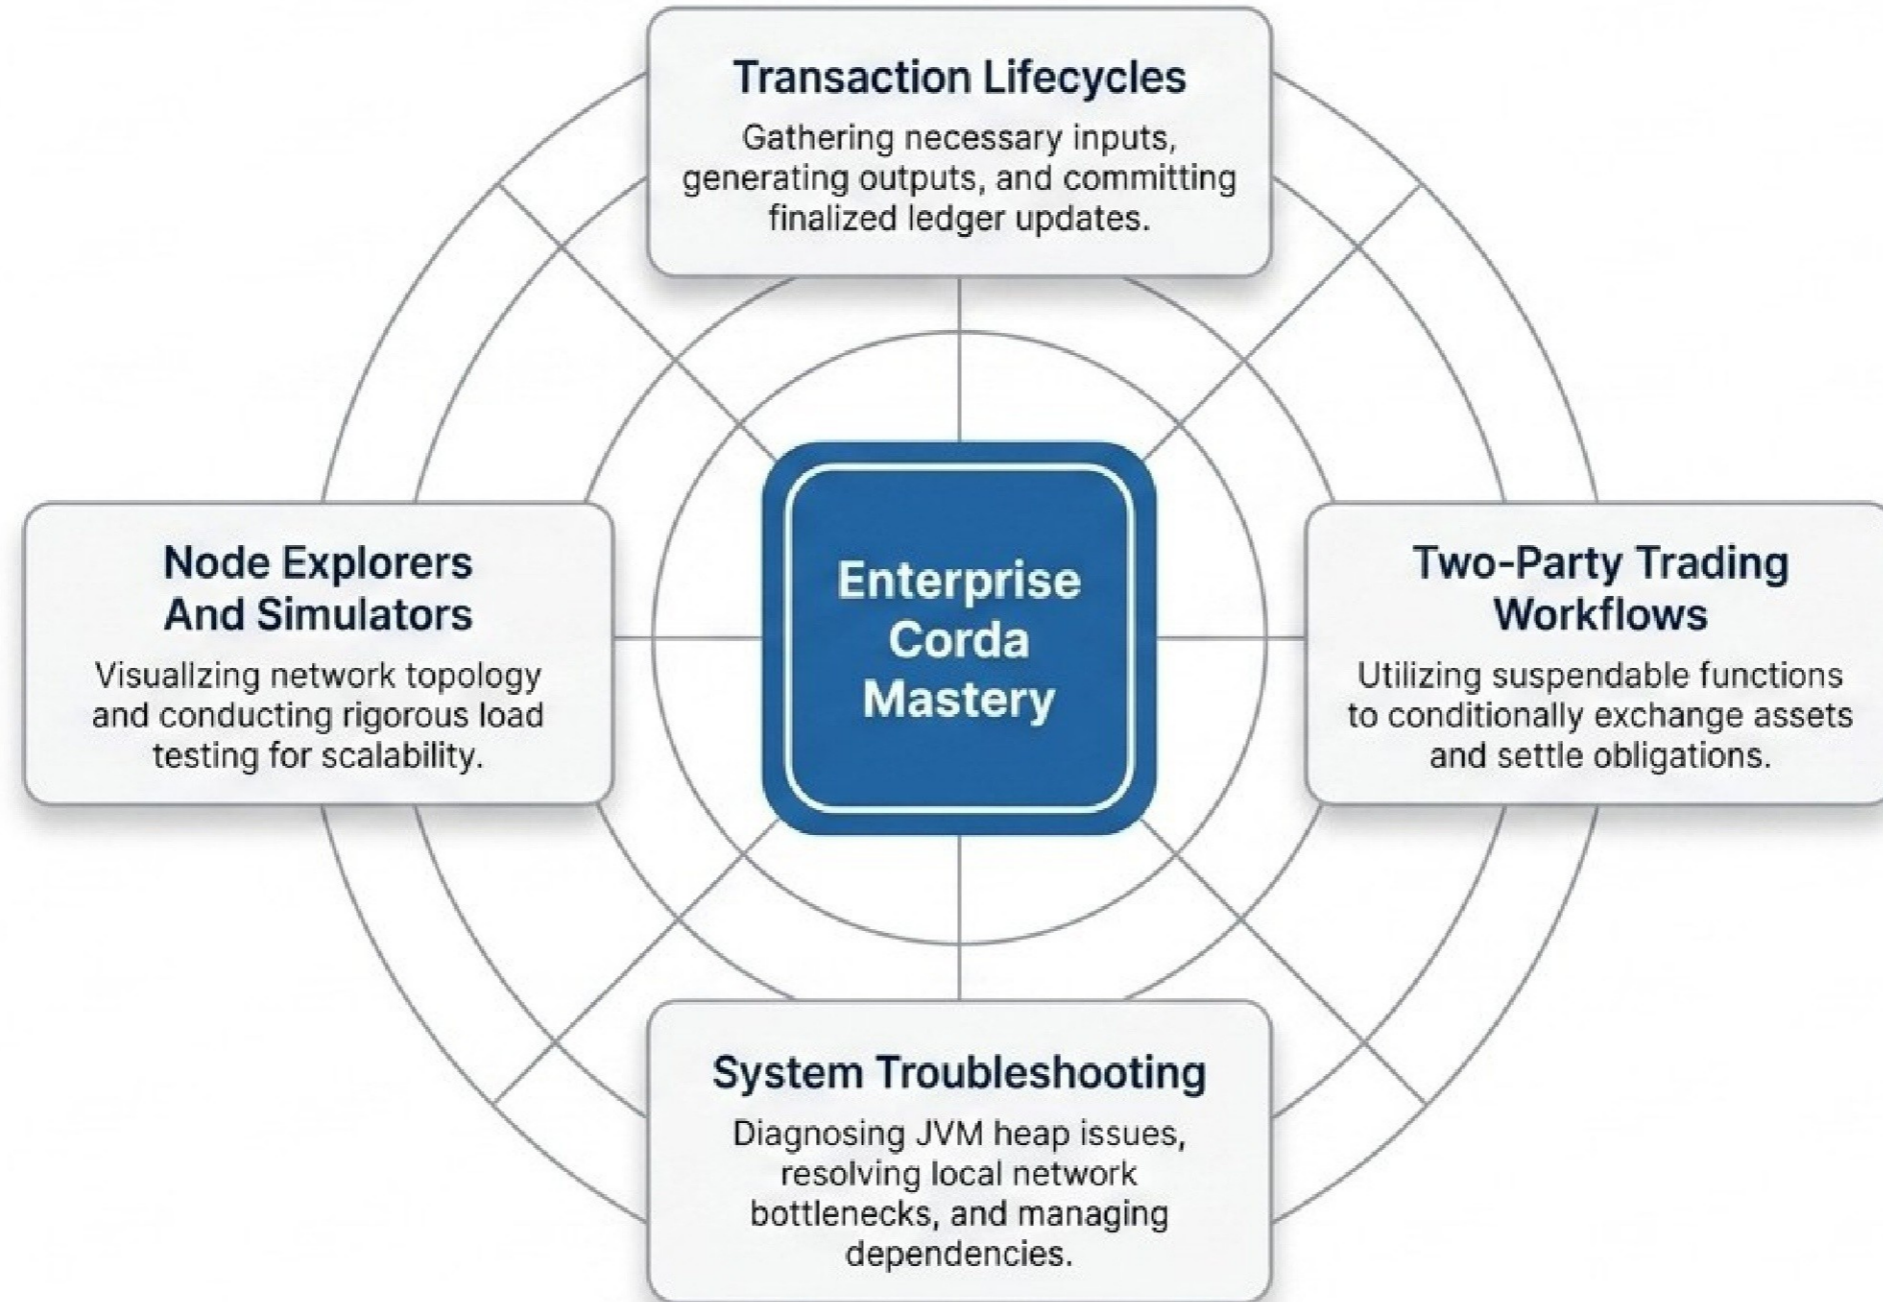

State Lifecycle Methods

Defining precise shared and private state transitions within smart contracts.

Client RPC Integrations

Connecting external applications securely to query ledgers and submit commands.

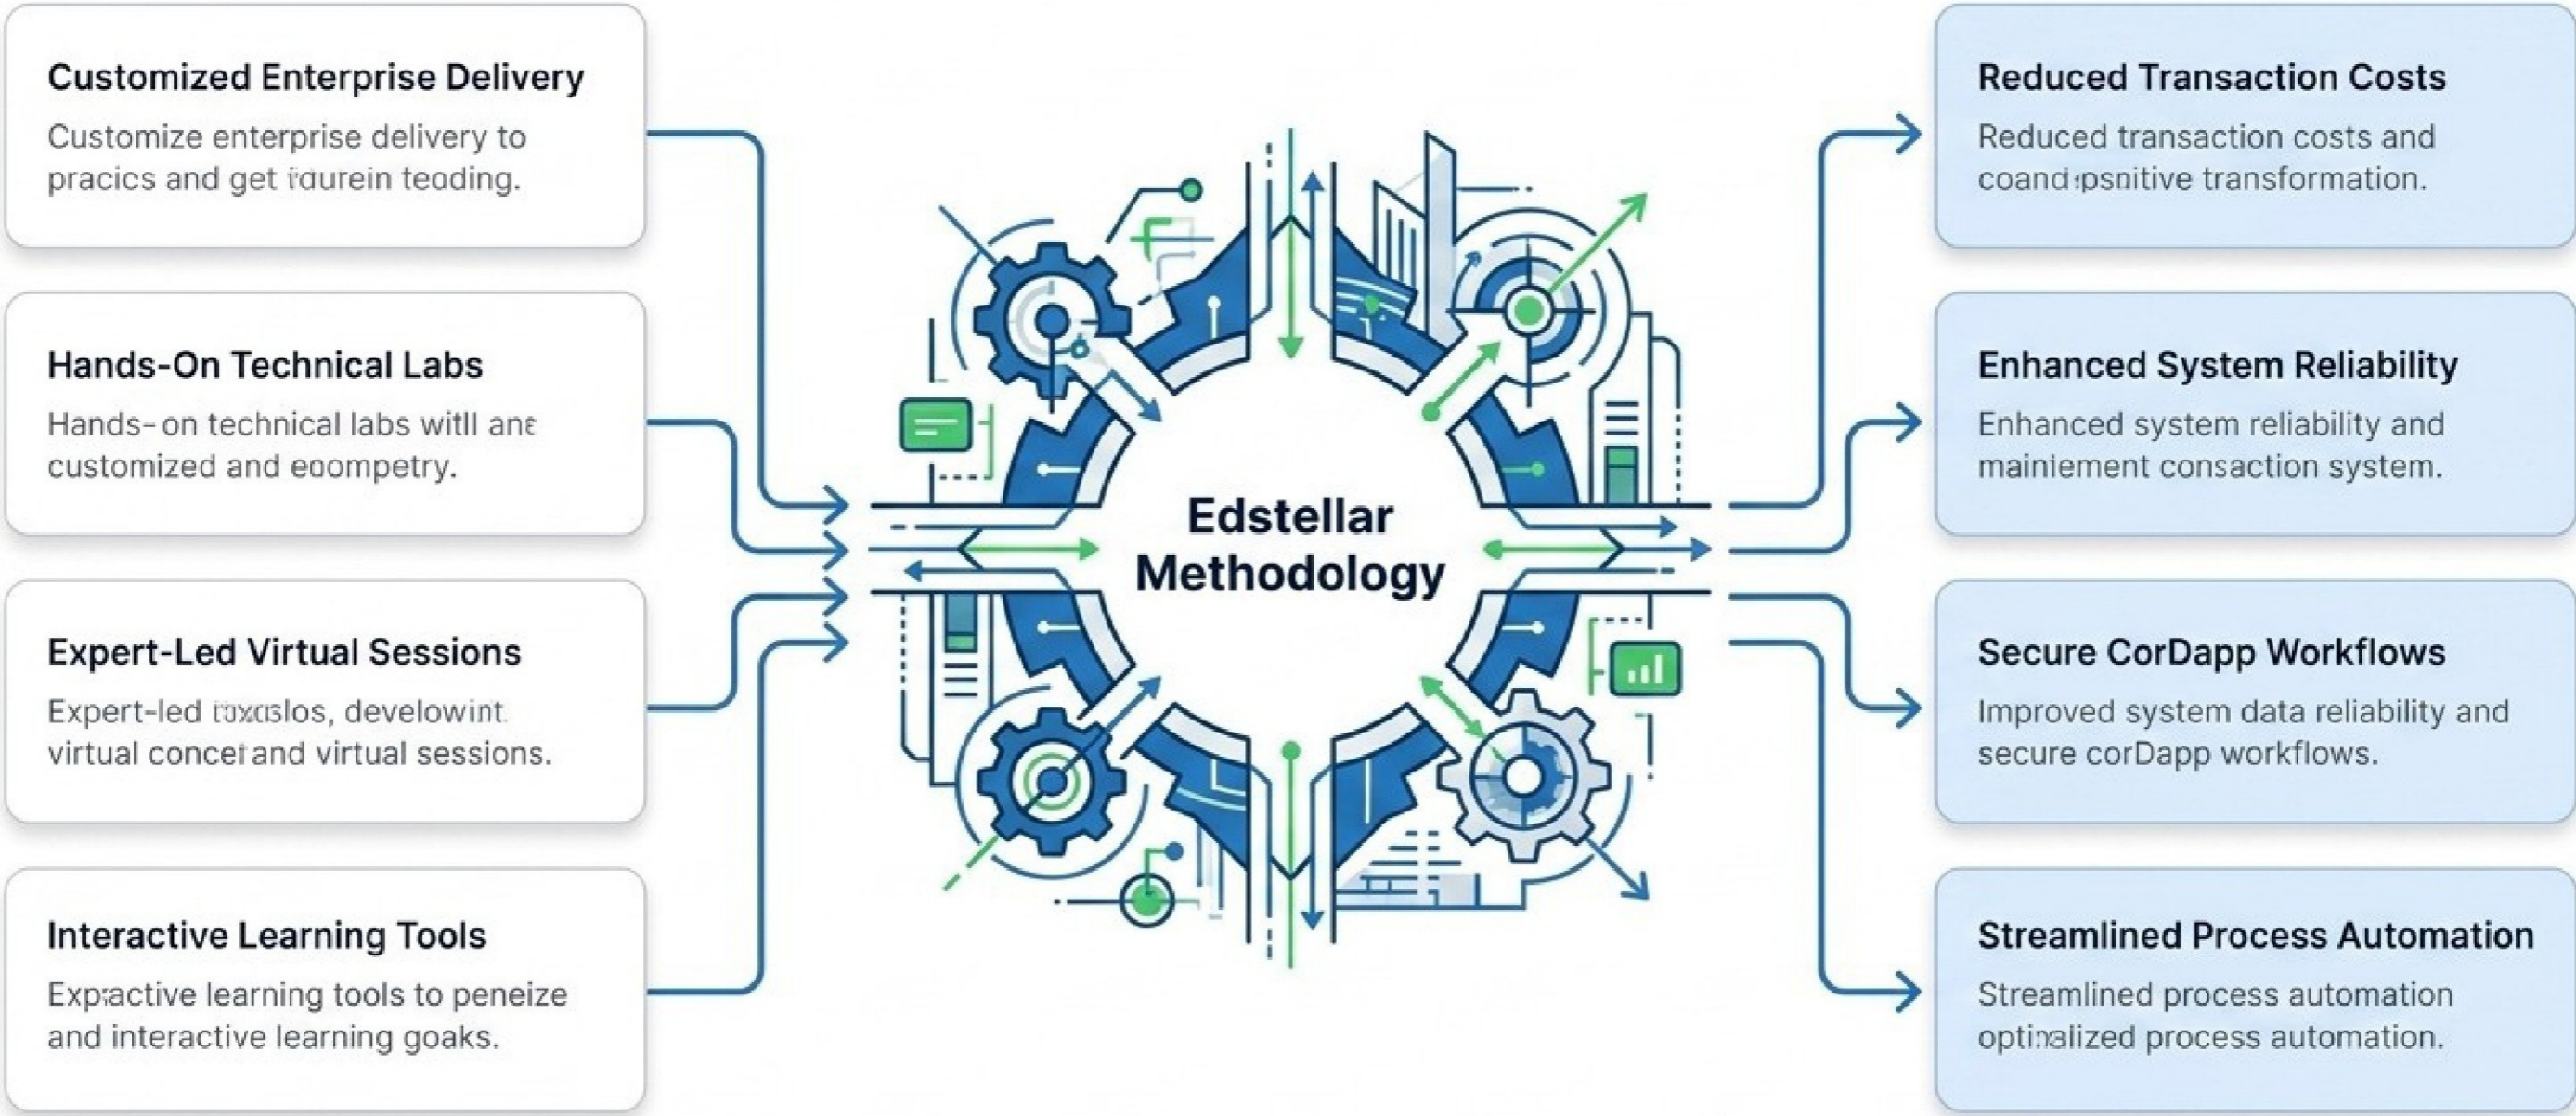

Phase Three: Optimization And Mastery

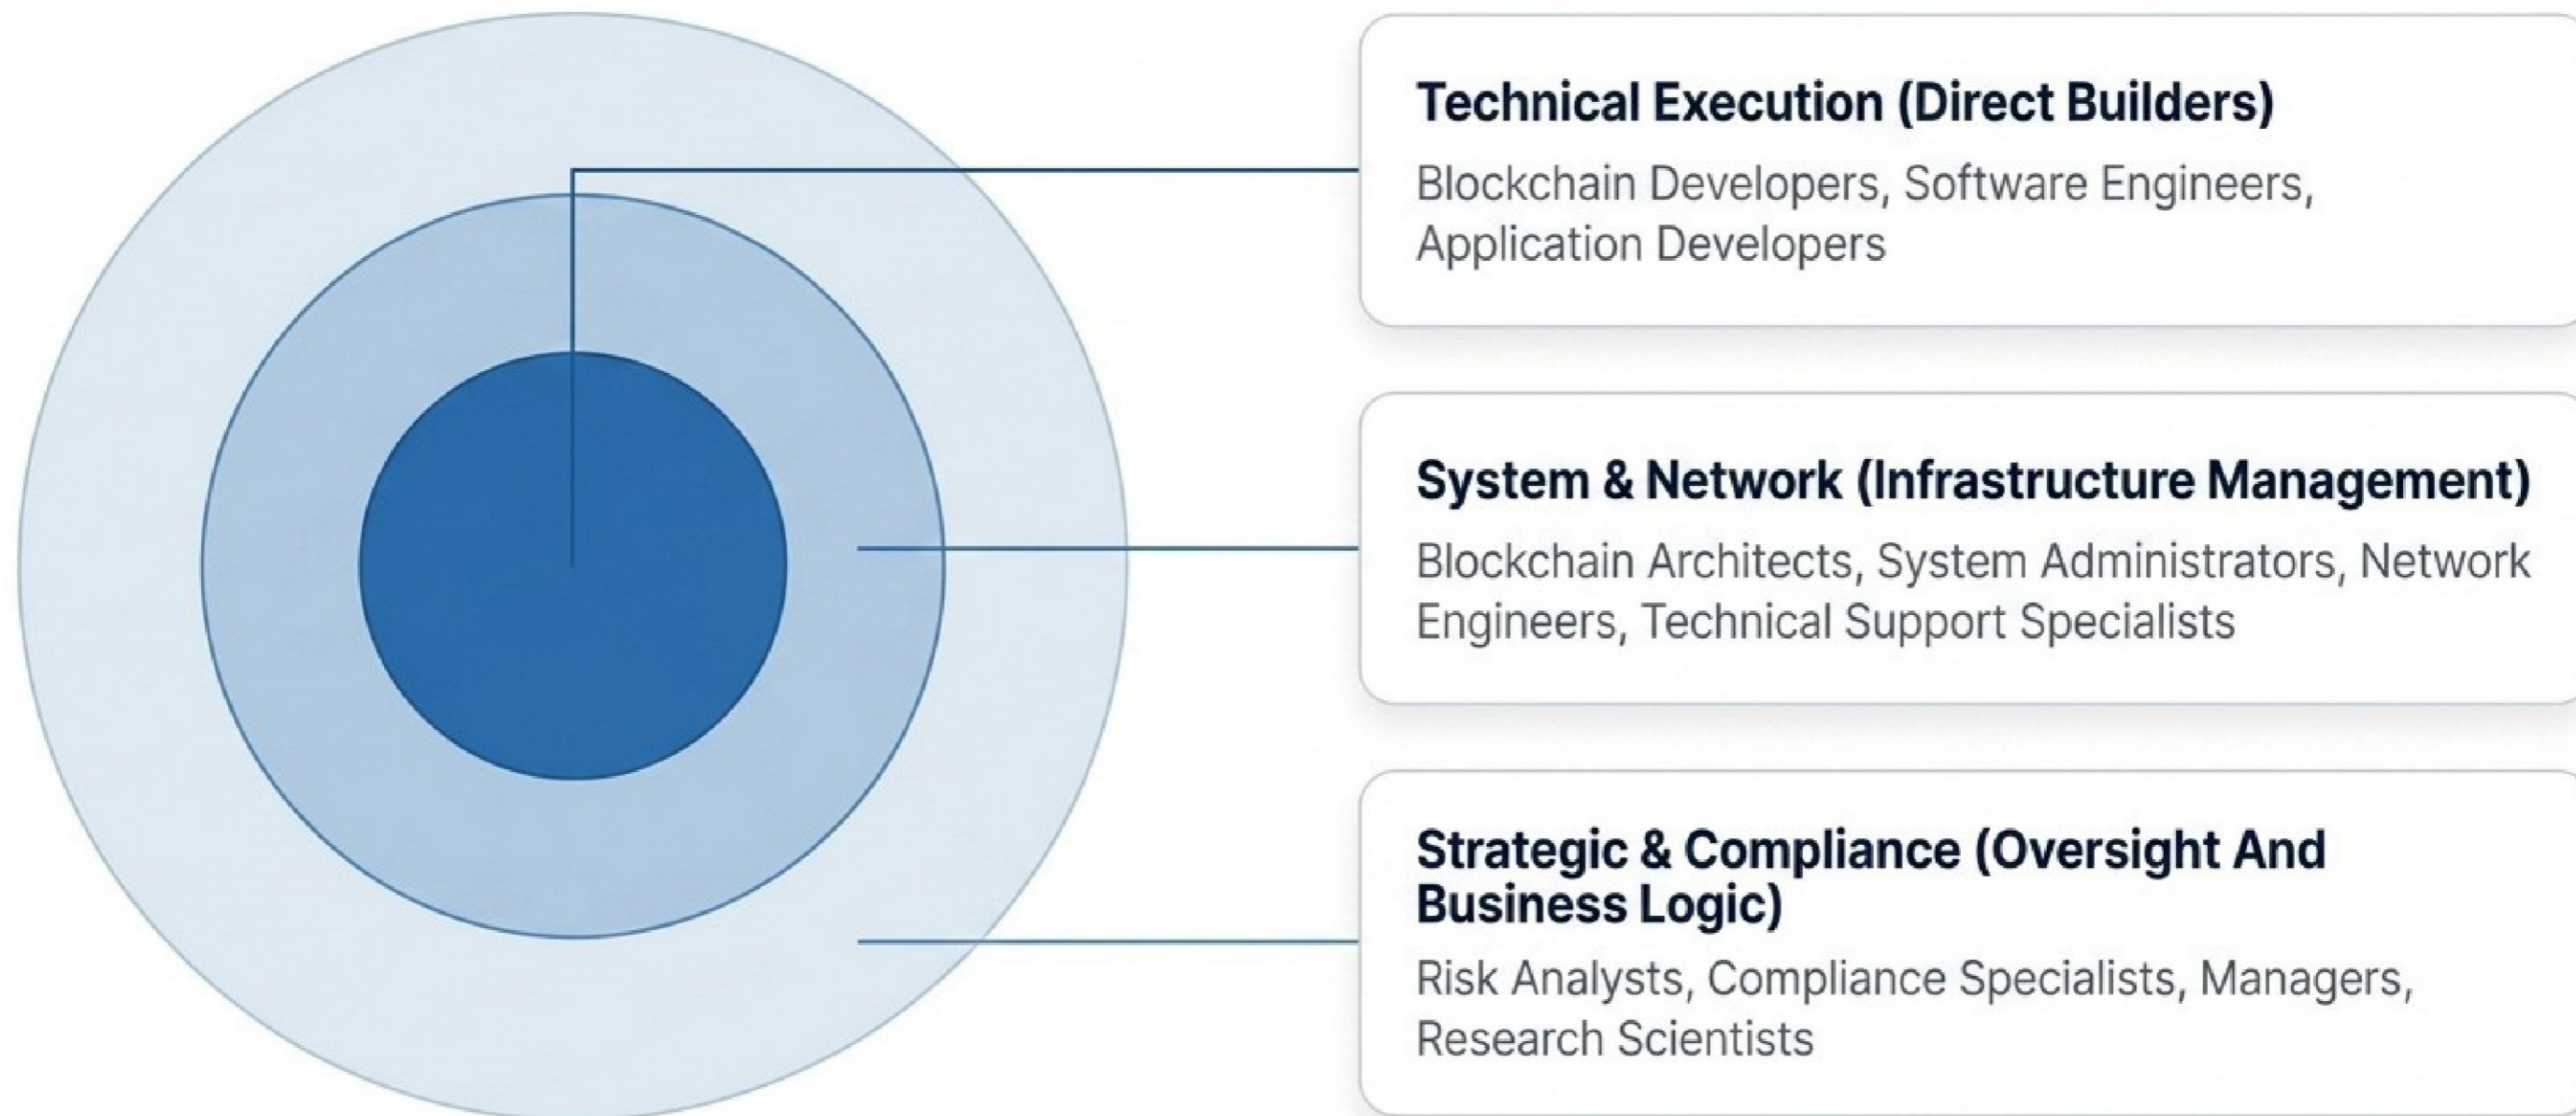

Organizational Competency Matrix

Target Role	Core Skill Acquired	Business Outcome
Blockchain Developers	CorDapp Development And Smart Contract Design	Secure, Scalable Decentralized Application Deployment
System Administrators	Node Management And RPC API Configuration	High Availability And Seamless Ecosystem Connectivity
Risk Analysts	Consensus Mechanisms And Workflow Modeling	Uncompromised Transaction Integrity And Dispute Resolution

The Performance Transformation Engine

Target Audience Alignment

Enterprise Delivery Frameworks

Virtual Live Training

- ✓ Consistent quality ensuring uniform learning outcomes.
- ✓ Allows participants to attend securely in their own space.
- ✓ Highly scalable for accommodating large distributed groups.

On-Site Face-To-Face

- ✓ Workplace environment tailored to exact learning requirements.
- ✓ Team collaboration improves overall training effectiveness.
- ✓ Direct interaction for immediate doubt clarification.

Off-Site Face-To-Face

- ✓ Distraction-free environment improves deep learning engagement.
- ✓ Dedicated schedule away from the office boosts focus.
- ✓ Improves team bonding and boosts employee morale.

Proof of Impact

“The R3 Corda Blockchain training provided me with comprehensive capabilities that elevated my expertise. As a Principal Analytics Architect, I needed to understand practical applications deeply, and this course delivered hands-on exercises gave me hands-on experience with industry best practices. The knowledge gained has been immediately applicable to mission-critical projects and initiatives. Highly recommend for anyone serious about this field.”

Ashley Black

Principal Analytics Architect

Blockchain Technology Solutions Provider

Unrestricted Global Delivery

A light blue world map is visible in the background, showing the outlines of continents and countries. Two callout boxes are overlaid on the map, one over North America and one over Europe/Asia.

100+ Delivery Countries

Seamless coordination across North America, Europe, Asia-Pacific, and emerging markets.

10+ Available Languages

English, Español, 普通话 (Mandarin), Deutsch, العربية (Arabic), Português, हिंदी (Hindi), Français, 日本語 (Japanese), and Italiano.
