	Credential	Course Completion Certificate

The Competency Ladder: From Novice to Practitioner

The Three-Phase Curriculum Model

Phase 1 Deep Dive: Foundations & Assessment

Overview of ERM

- Global risks context
- Silos vs integrated management
- Methodology and evolution

Enterprise Risk Assessment

- ERA methodology application
- Data collection toolkits
- Risk matrix categorization

Outcome: Identify and evaluate potential risks across various business scenarios.

Phase 2 Deep Dive: Frameworks & Implementation

Frameworks & Implementation

- COSO, ISO 31000, Basel 2
- Avoiding common documentation pitfalls

ERM & Risk Appetite

- Appetite vs tolerance statements
- Board roles and oversight
- Effective program steps

Outcome: Make informed, strategic decisions balancing operational risks and strategic opportunities.

Phase 3

Deep Dive: Governance & Maturity

Risk Governance

- Typical governance models
- Systemic governance drivers
- Steps for board effectiveness

Avoiding Pitfalls

- Monitoring ERM maturity
- Financial crisis lessons learned
- Implementation keys to success

**Outcome: Develop
leadership skills to guide
enterprise-wide risk
management practices.**

Core Competency Acquisition Matrix

Risk Mitigation

Assess and prioritize risks to minimize enterprise impact.

Risk Identification

Proactively recognize potential hazard impacts on operations.
