

VMware vCloud Director Corporate Training

Equip professionals to deploy, optimize, and secure vCloud environments. Streamline operations, enhance collaboration, and innovate with agility.

Fragmented Infrastructure

Manual resource provisioning creating deployment bottlenecks.

Inefficient storage allocation leading to spiraling costs.

Fragmented network security and access vulnerabilities.

The Turning Point

Edstellar vCloud Training

Optimized Cloud Ecosystem

Streamlined organizational resource management.

Rapid scaling via efficient catalog and vApp deployments.

Robust Role-Based Access Control (RBAC) and network security.

Course At-a-Glance

32 - 40 hrs

Comprehensive Duration

Instructor-Led

Expert Group Training

Virtual / On-site / Off-site

Flexible Training Modes

10+ Languages

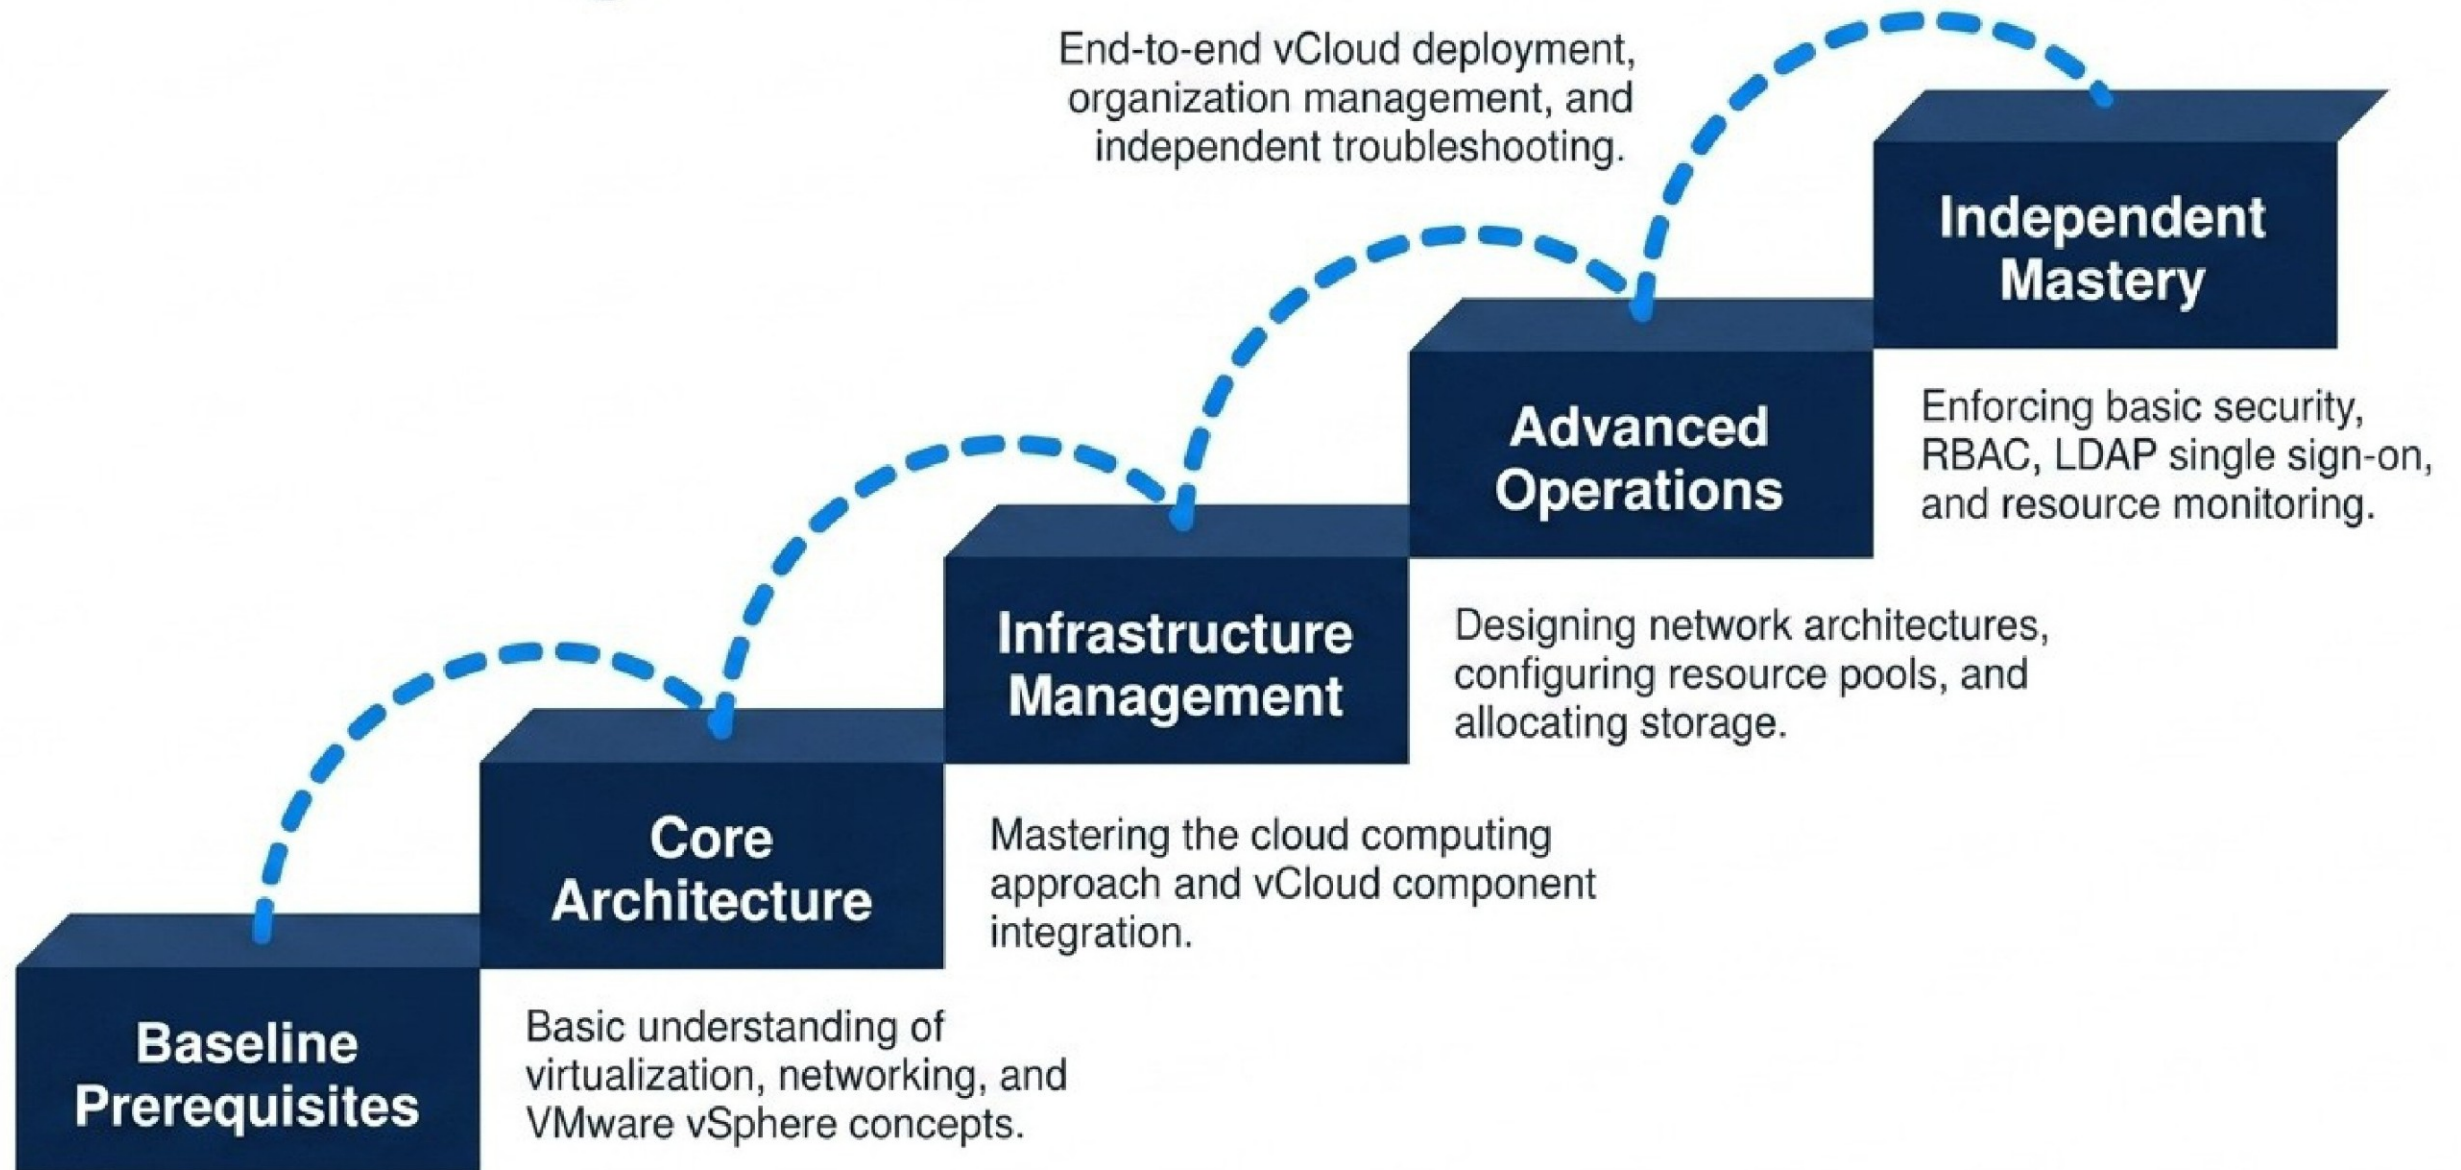

Global Delivery Capability

Edstellar Certificate

Verified Post-Course Outcome

The Learning Ascent

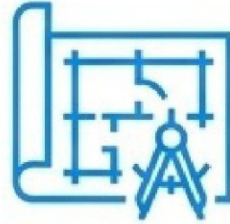

The Cloud Capability Framework

Phase 1

Foundation & Infrastructure

Modules 1-5

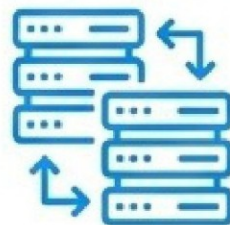

Architecture & Components

Understanding the cloud computing approach. Identifying vCloud Director components, component functions, integration with existing VMWare products, and licensing needs.

Networking Architecture

Available network types in vCloud Director. Configuring organization and vApp traffic options, managing network pools, and sharing content safely between organizations and vApps.

Storage & Provider Allocation

Identifying storage resources, allocating provider space to organizations, and managing vSphere integration (including Storage vMotion issues and linked clone requirements).

Operations & Security

Modules 6-11

Phase 2

Basic Security & Access

Implementing Role-Based Access Control (RBAC) and custom security roles. Configuring LDAP integration with Microsoft Active Directory and establishing Single Sign-On.

Managing Resources & vSphere

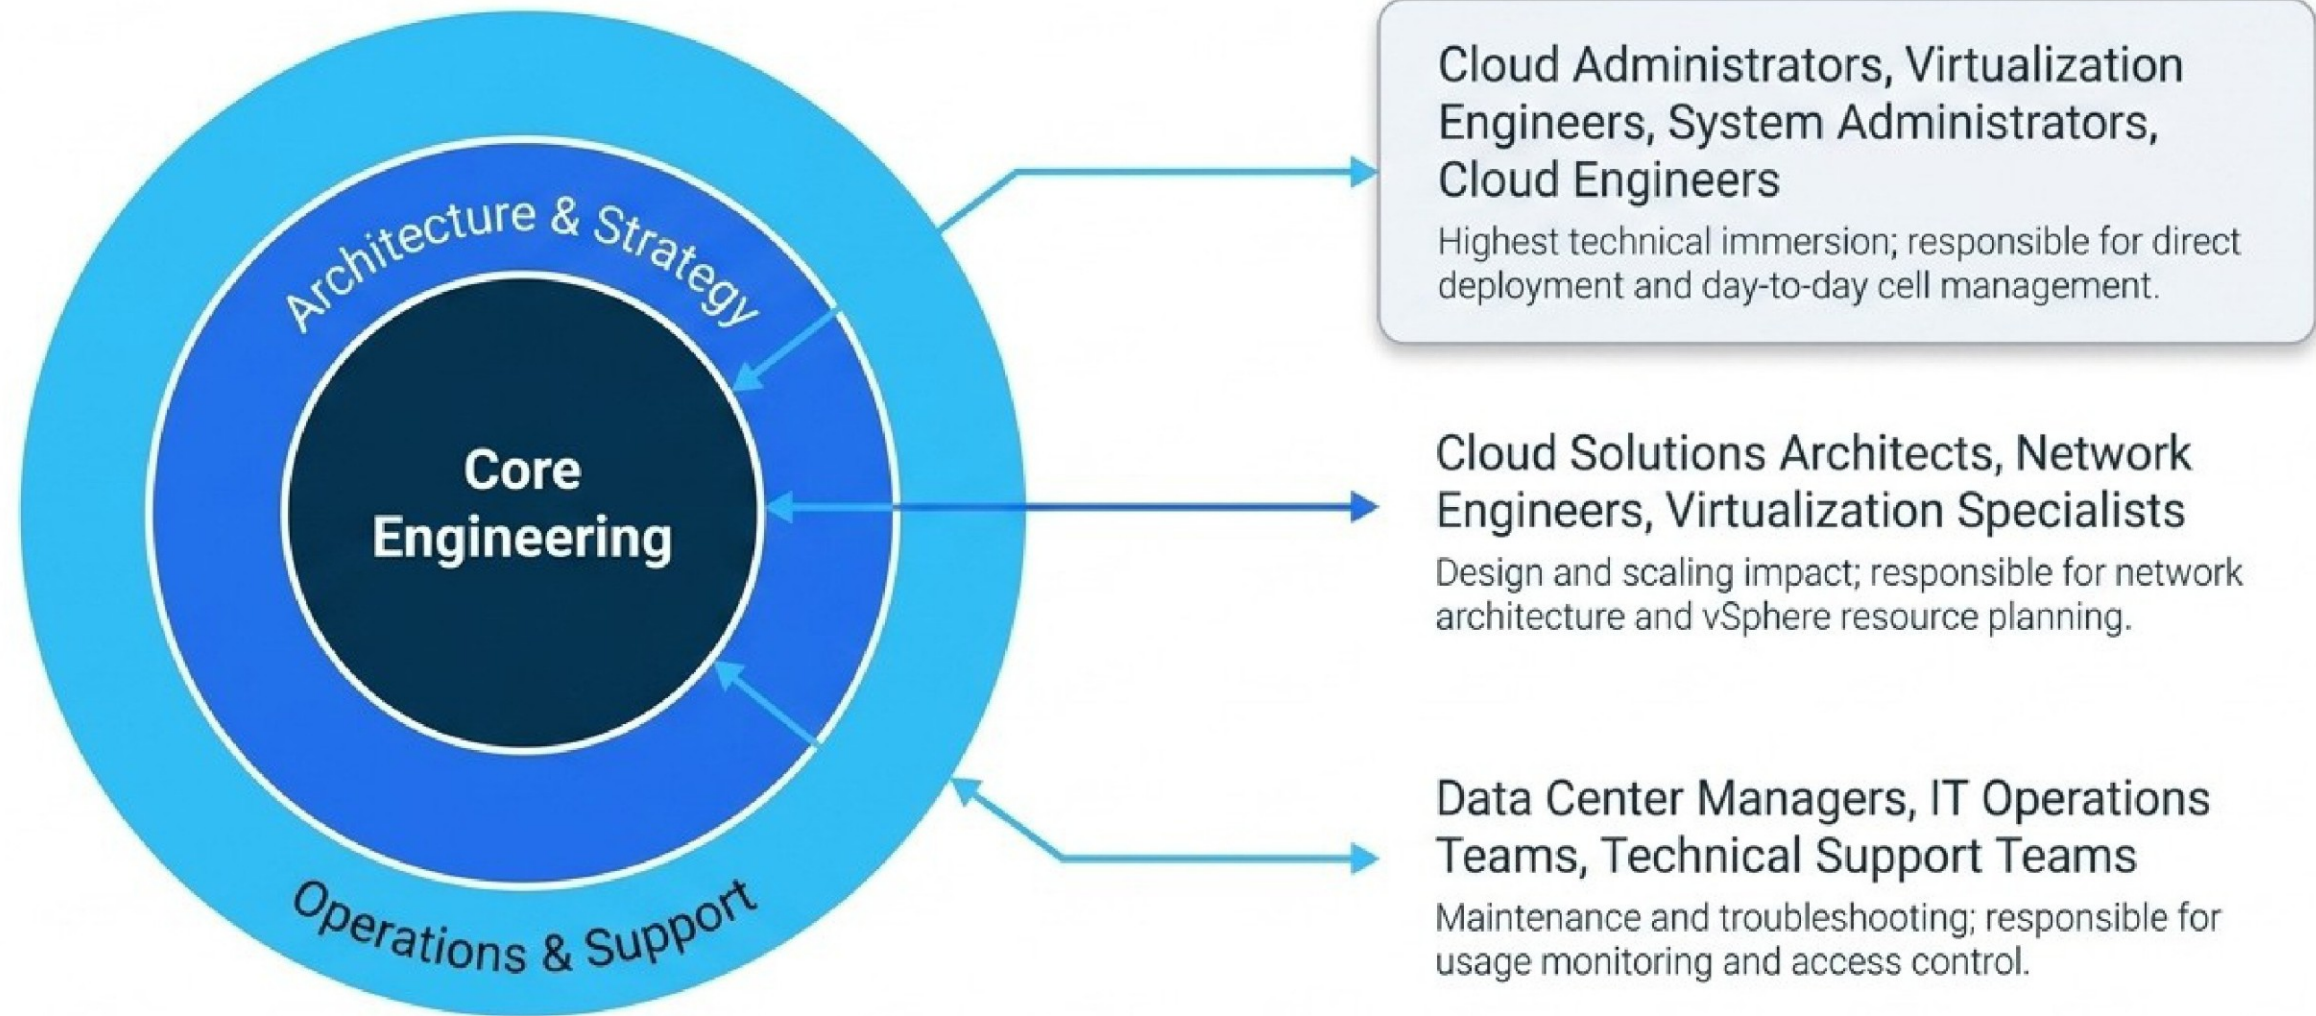

Managing Virtual Data Centers (provider and organization). Integrating vCenter Server management, ESXi host oversight, datastore limits, and handling stranded items/resource pools.

Monitoring & Installation

Conducting usage monitoring at provider/organization levels and log analysis for vCloud Director cells. Executing end-to-end vCloud Director installation prerequisites and processes.

Target Audience: The Organizational Impact Map

Prerequisites: Participants must have a basic understanding of virtualization, networking, and VMware vSphere.

Modality Comparison Matrix

	Virtual Live	In-House On-Site	Off-Site Face-to-Face
Best For	Globally distributed teams	Teams requiring tailored workplace context	Teams needing intensive, focused upskilling
Environment	Scalable, individual spaces via interactive digital tools	Familiar office setting with tailored configurations	Dedicated, distraction-free external venue
Engagement Style	High flexibility, digital collaboration	High face-to-face team collaboration	Deep immersion and team bonding activities
Key Benefit	 Scale & Flexibility (Accommodate large global groups without travel)	 Contextual Learning (Direct demonstration on familiar processes)	 Focus & Morale (Reflects organizational commitment to development)

The Global Scale Engine

100+ Countries

Seamless global delivery capability for distributed enterprise teams.

10+ Languages

Native instruction available in English, Español, 普通话, Deutsch, Français, 日本語, and more.

2,000+ Trainers

Expert, industry-ready instructors with practical vCloud architecture experience.

Proof of Impact: Enterprise Success

Edstellar's IT & Technical training programs have been instrumental in strengthening our engineering teams and building future-ready capabilities. The hands-on approach, practical cloud scenarios, and expert guidance helped our teams improve technical depth and execution.

Aditi Rao

L&D Head, A Global Technology Company

The VMware vCloud Director training exceeded my expectations. I gained comprehensive knowledge of industry best practices that transformed my approach to be strategic and immediately applicable. The expertise made complex concepts crystal clear and actionable.

Ashley Hopkins

Principal Azure Engineer, Cloud Security
Platform Company

Certified vCloud Mastery

Upon successful completion, employees receive formal recognition symbolizing their capability to navigate and manage advanced cloud infrastructure.

- ✓ Validates acquired vCloud deployment and optimization skills.
- ✓ Demonstrates organizational dedication to ongoing employee learning.
- ✓ Motivates continuous professional development and capability maturity.

Enterprise Licensing Packages

Most Popular

Starter

Tailored for SMBs

- 120 Trainee Licenses
- 64 Hours Group Training

Growth

Ideal for growing SMBs

- 320 Trainee Licenses
- 160 Hours Group Training

Enterprise

Designed for large corporations

- 800 Trainee Licenses
- 400 Hours Group Training

Custom

Scale without limits

- Unlimited Licenses
- Unlimited Duration

All packages include VILT or In-person On-site delivery options.

The Implementation Roadmap
