

Oracle WebCenter: Strategic Capability for What Comes Next

Empower your teams to build integrated, high-performance enterprise portals that streamline business processes and unify organizational knowledge.

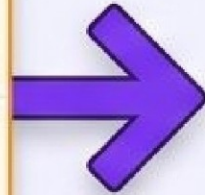

**Fragmented
enterprise content.**

**Siloed team
communication.**

**High maintenance
on rigid legacy
portals.**

**Edstellar
Oracle
WebCenter
Expert-Led
Training.**

**1. Streamlined
enterprise
workflows.**

**2. Integrated data
& enterprise
search.**

**3. Optimized user
experience
management.**

The Program in Five Numbers

24–32

Hours of Intensive
Instruction

9

Comprehensive
Technical Modules

10

Languages
Supported Globally

100+

Countries with
Delivery Capability

3

Delivery Modes
(Virtual, On-site, Off-site)

What Your Team Will Master

Job-Relevant Capabilities

1

Content Management

Organizing and maintaining secure digital content lifecycles.

2

Document Management

Systematic storage, JCR integration, and rapid compliance retrieval.

5

Business Process Management

Streamlining operations and configuring dynamic worklists.

6

User Experience Design

Building responsive interfaces with ADF Faces rich clients.

3

Web Experience Management

Optimizing user interactions and runtime customization.

4

Enterprise Search

Efficiently locating critical intelligence across federated organizational data.

7

Runtime Customization

Utilizing Oracle Composer for instant metadata updates via MDS.

8

Inter-portlet Communication

Enabling seamless data passing across unified enterprise spaces.

The Strategic Learning Arc

Foundational Architecture

(Fusion Middleware & JDeveloper integration)

Component Engineering

(Custom Portlets & Oracle Composer basics)

Service Integration

(Wiki, Blogs, Mail, and Calendar pipelines)

Enterprise Spaces

(Group Space Administration and Security Models)

High-Performance Deployment

(Installation, Diagnostics, and Optimization)

Curriculum Architecture: Three-Phase System

Phase 1: Core Architecture & Framework

Synthesizing Modules 1–3. Fusion Middleware, JDeveloper, ADF, and WebCenter Framework fundamentals.

Phase 2: Dynamic Components & Services

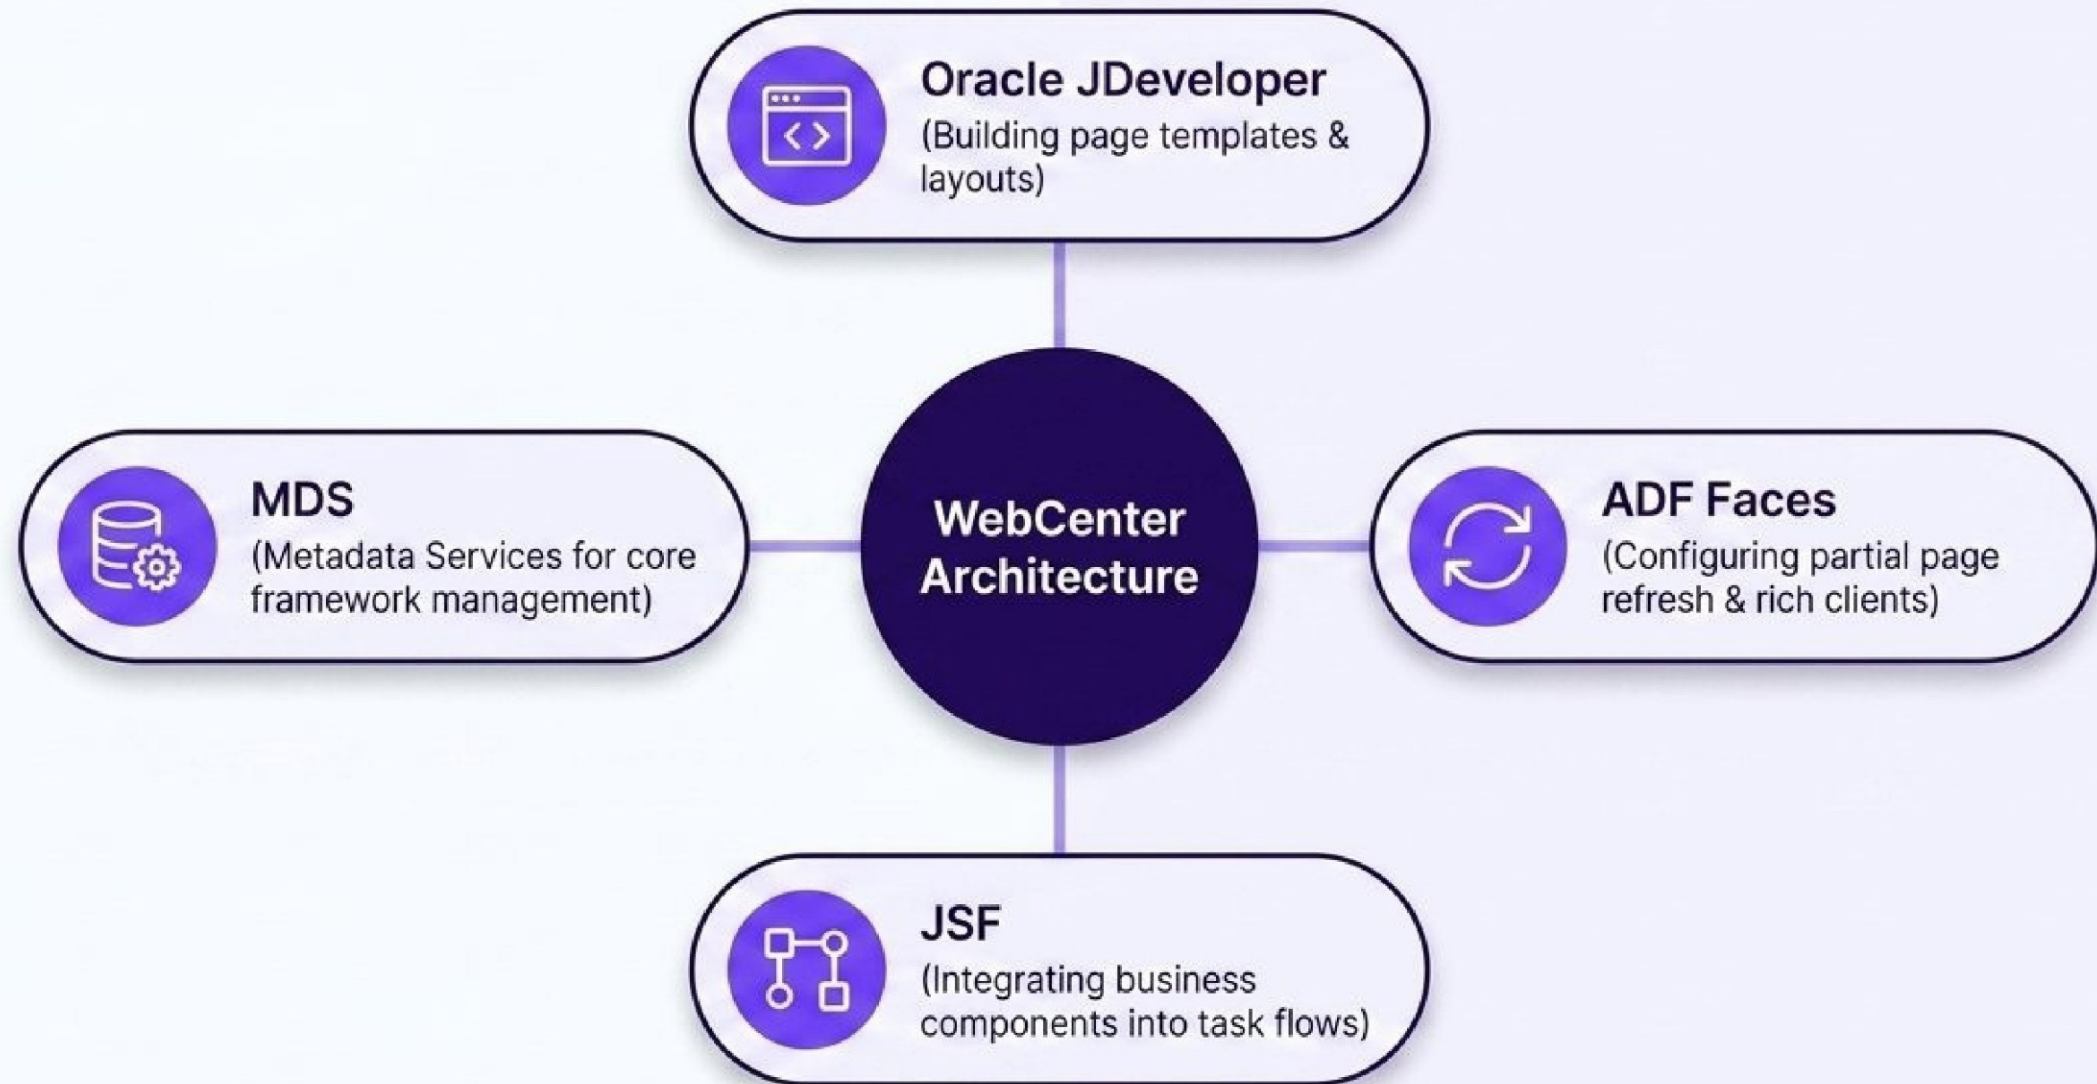

Synthesizing Modules 4–6. Portlet integration, Oracle Composer runtime editing, and Enterprise Services.

Phase 3: Content Deployment & Administration

Synthesizing Modules 7–9. Document Libraries (JCR), Enterprise Spaces, Installation, and Diagnostics.

Phase 1 Deep Dive: Core Architecture & Framework

Phase 2 Deep Dive: Dynamic Components & Services

Legacy Static Portals

High maintenance, rigid deployment, code-dependent.

WebCenter Composer & Portlets

Dynamic runtime editing, JSF portlet bridge, instant customization.

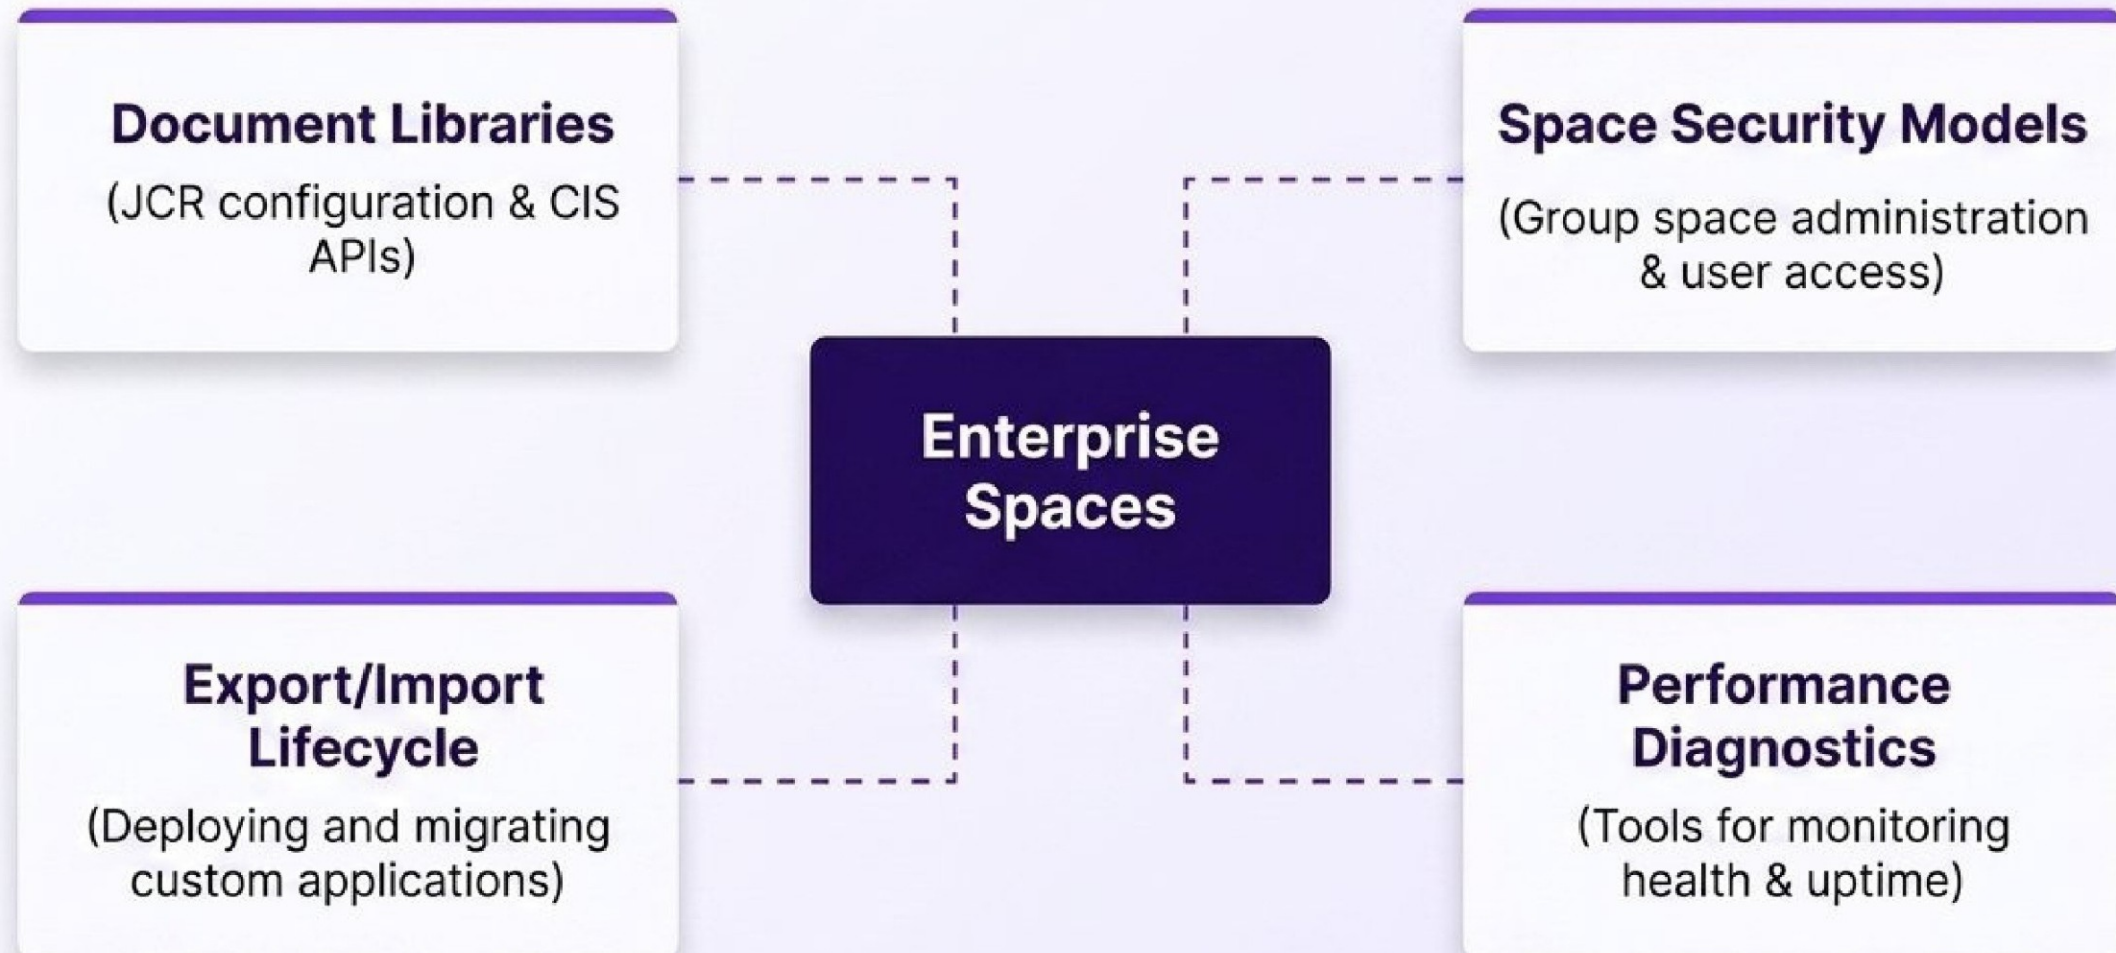

Dynamic Enterprise Environment

Services Mastered

- Enterprise Wikis & Blogs
- WebCenter Mail & Calendars
- Inter-portlet Communication
- People Connection Networks

Phase 3 Deep Dive: Enterprise Spaces & Deployment

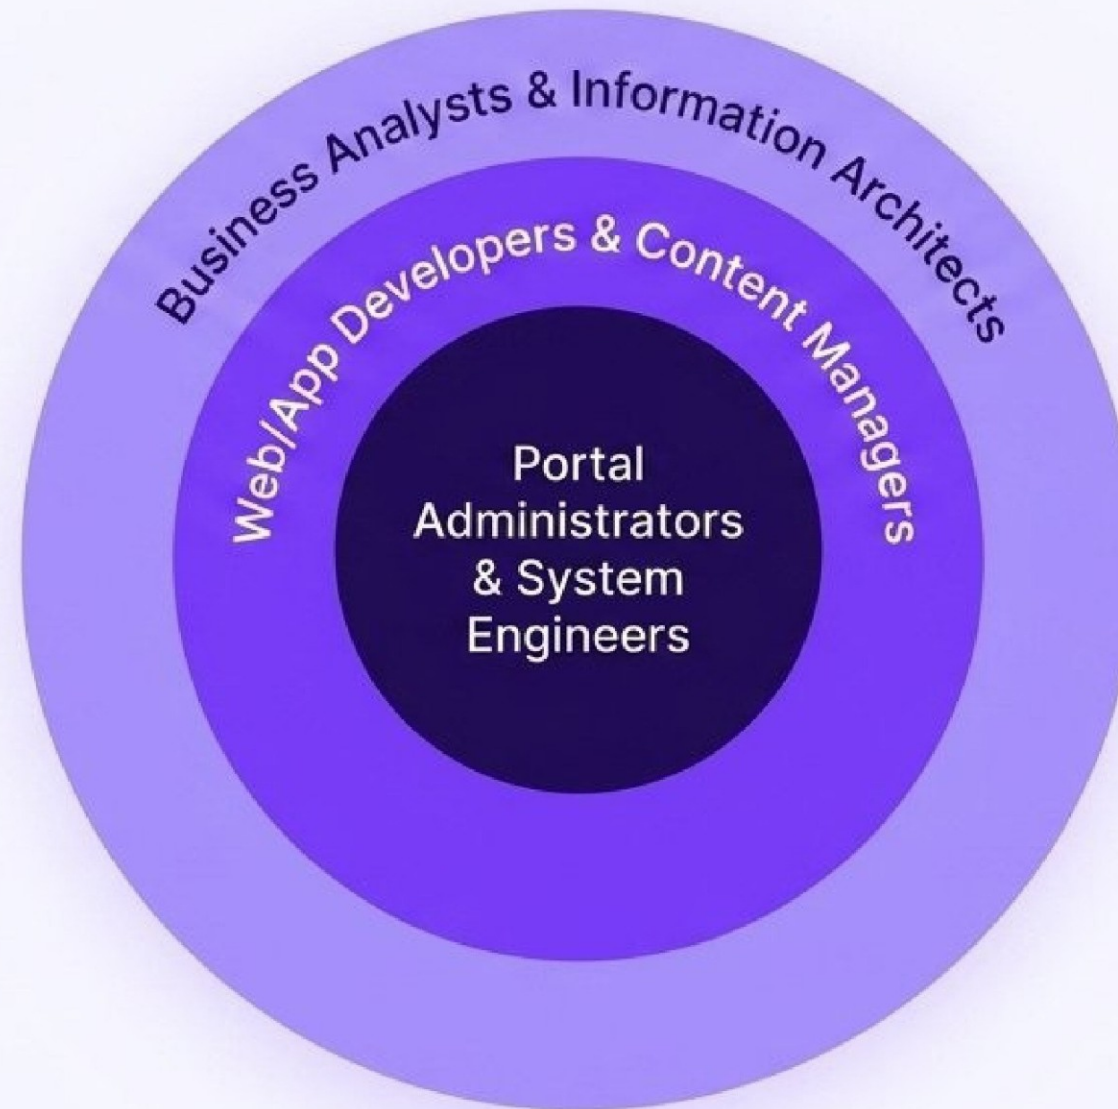

Diagnosing Strategic Capability Gaps

Target Role	Current Capability Gap	Target Program Mastery
System Administrators	Deployment bottlenecks & rigid security	Installation, Diagnostics, MDS & Security Models
Web & App Developers	Hard-coded, inflexible UIs	ADF Faces, JSF Portlet Bridge, Oracle Composer
Content Managers	Siloed documents & fragmented sharing	JCR Integration, Content Presenter, Group Spaces

Strategic Capability In, Leadership Results Out

Target Audience Alignment: The Complete Ecosystem

Delivery at the Scale of Your Organization

Virtual Live Instructor-Led

- Global reach for distributed teams.
- Zero travel required.
- Interactive digital engagement tools.

On-site Face-to-Face

- Delivered at your offices.
- Tailored directly to your workplace environment.
- High team collaboration and direct technical troubleshooting.

Off-site Face-to-Face

- Distraction-free immersion.
- Dedicated scheduling away from daily ops.
- Strong team bonding and morale boosting.

Proof of Impact

“

This Oracle WebCenter course transformed my approach to content management solutions. The comprehensive modules on content server were invaluable for our enterprise projects... Our client satisfaction scores improved by 35% across all accounts.

Yevgeny Romanov

Oracle WebCenter Administrator, Enterprise Data Platform Provider

The Next Strategic Move: Certification & Scaling

Edstellar Course Certificate

Validate employee expertise and motivate your teams with globally recognized credentialing.

Starter: 120 Licenses

(64 hrs group training, ideal for SMBs)

Growth: 320 Licenses

(160 hrs, most popular)

Enterprise: 800+ Licenses

(400 hrs, large corporations)
