What Your Team Will Master

Life Cycle Management

Overseeing a product's entire life span, from inception to disposal, ensuring efficiency and cost-effectiveness.

Cleaner Production

Minimizing waste and reducing environmental impact during manufacturing processes, ensuring efficiency and compliance.

Sustainable Business Model Development

Creating strategies that balance profitability with environmental and social responsibility for long-term viability.

Green Marketing Strategies

Promoting products based on their environmental benefits, driving eco-conscious consumer engagement and brand loyalty.

Policy and Regulatory Compliance

Understanding and adhering to laws and regulations, ensuring organizations operate within legal frameworks.

Resource Efficiency

Using resources effectively to minimize waste and maximize productivity, driving cost savings and environmental responsibility.

Circular Economy Principles

Designing systems that minimize waste and promote resource reuse, enhancing efficiency and innovation.

Environmental Impact Assessment

Evaluating potential environmental effects of projects, ensuring sustainable development and regulatory compliance.

Stakeholder Engagement

Effectively communicating and collaborating with individuals or groups affected by a project to foster trust and align goals.

Sustainability Performance Measurement

Assessing environmental, social, and economic impacts to ensure effective resource use and compliance.

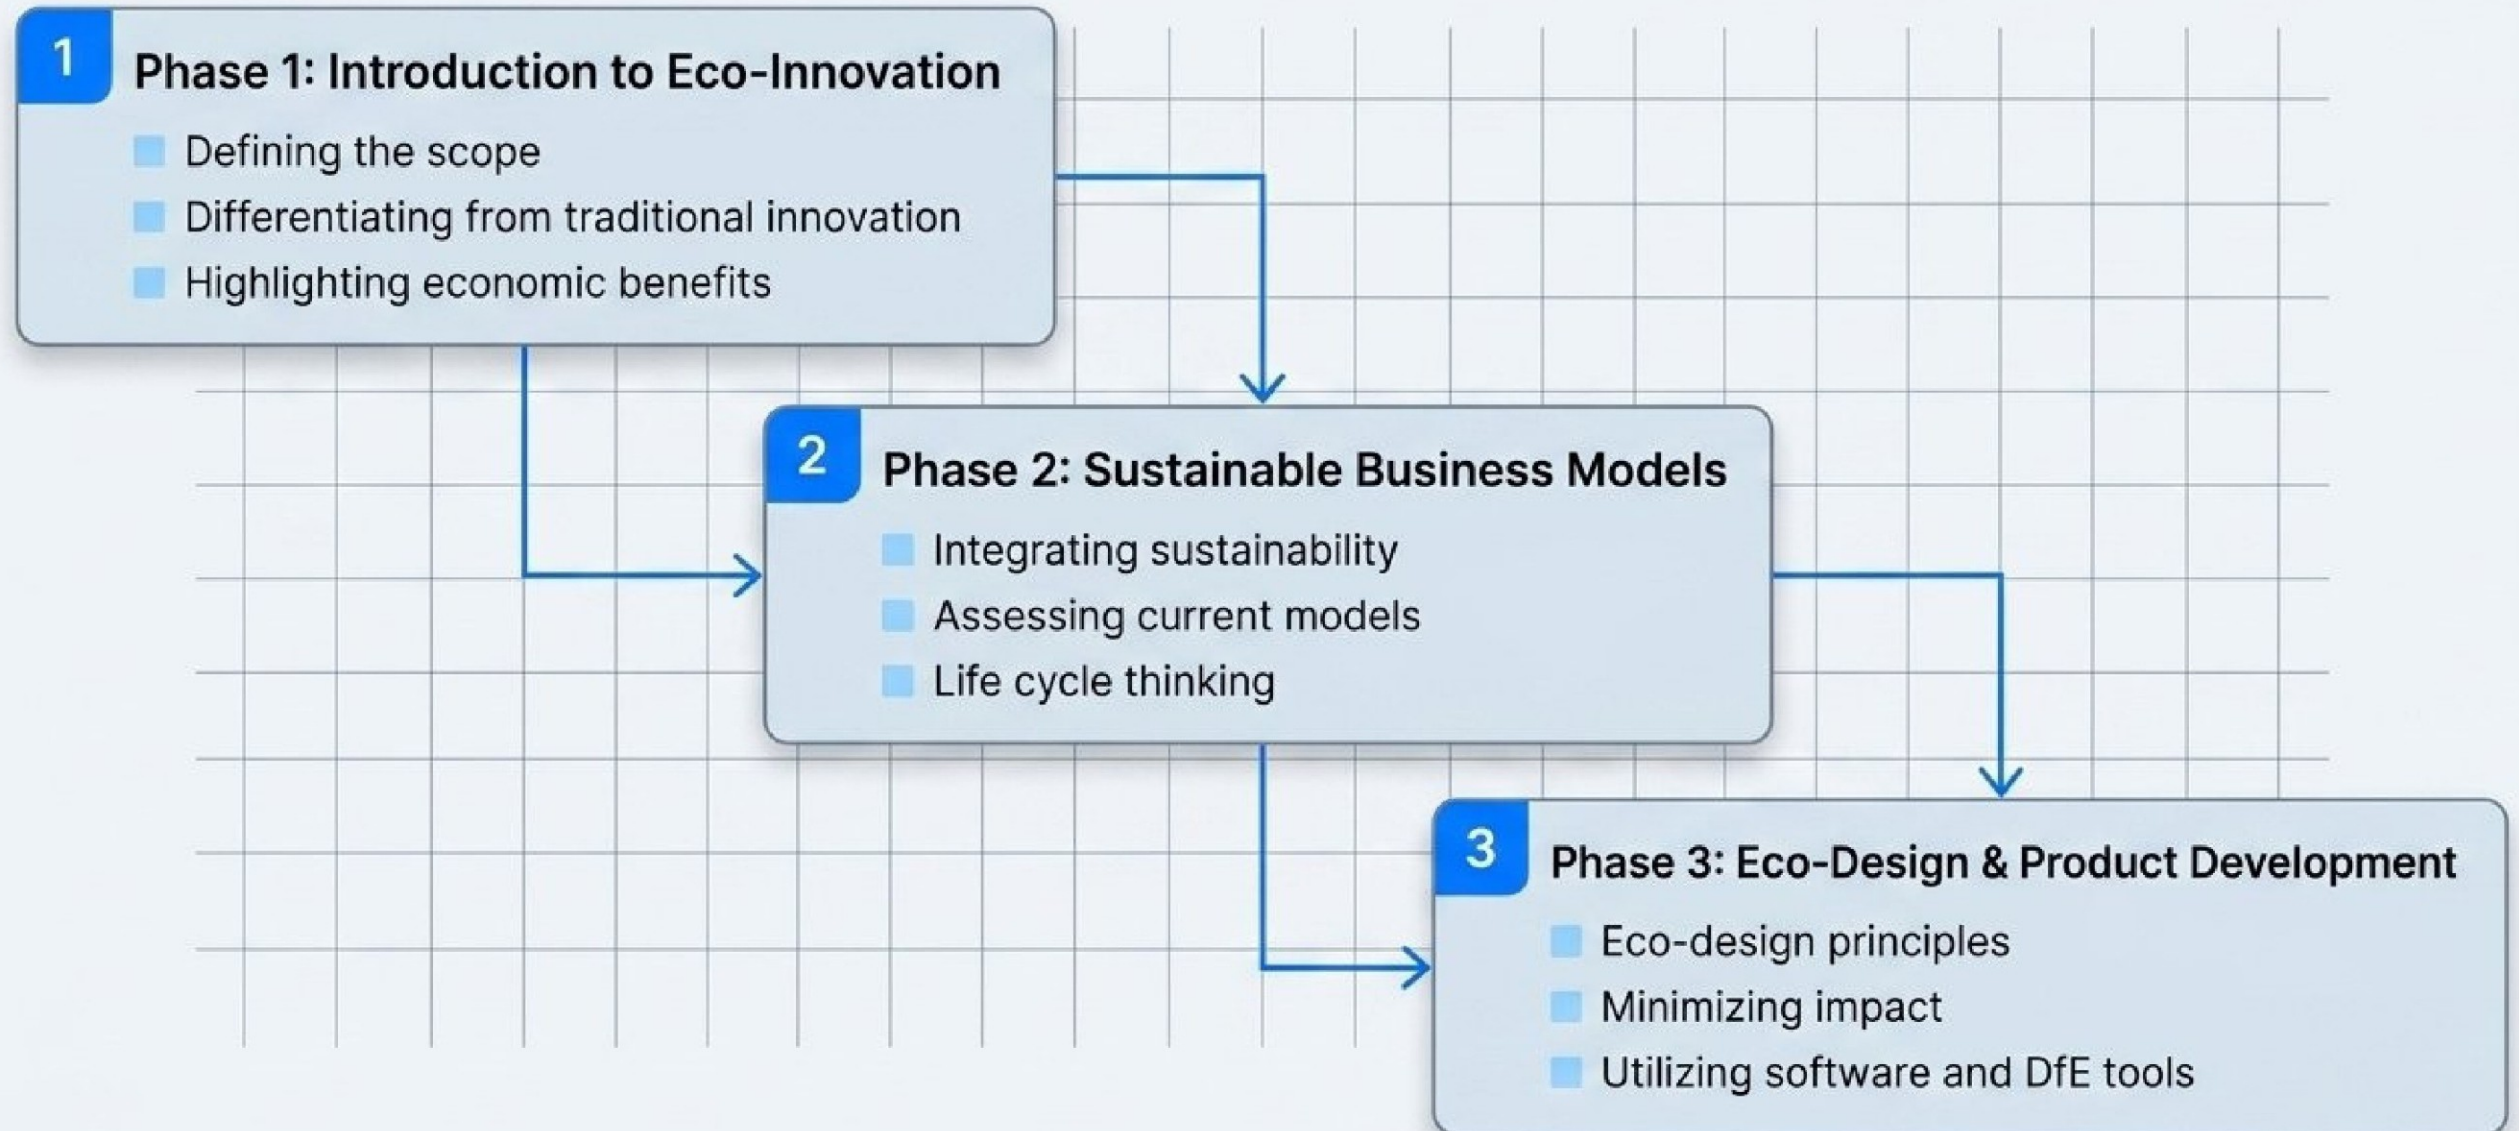

Validates acquired skills and empowers long-term operational impact.

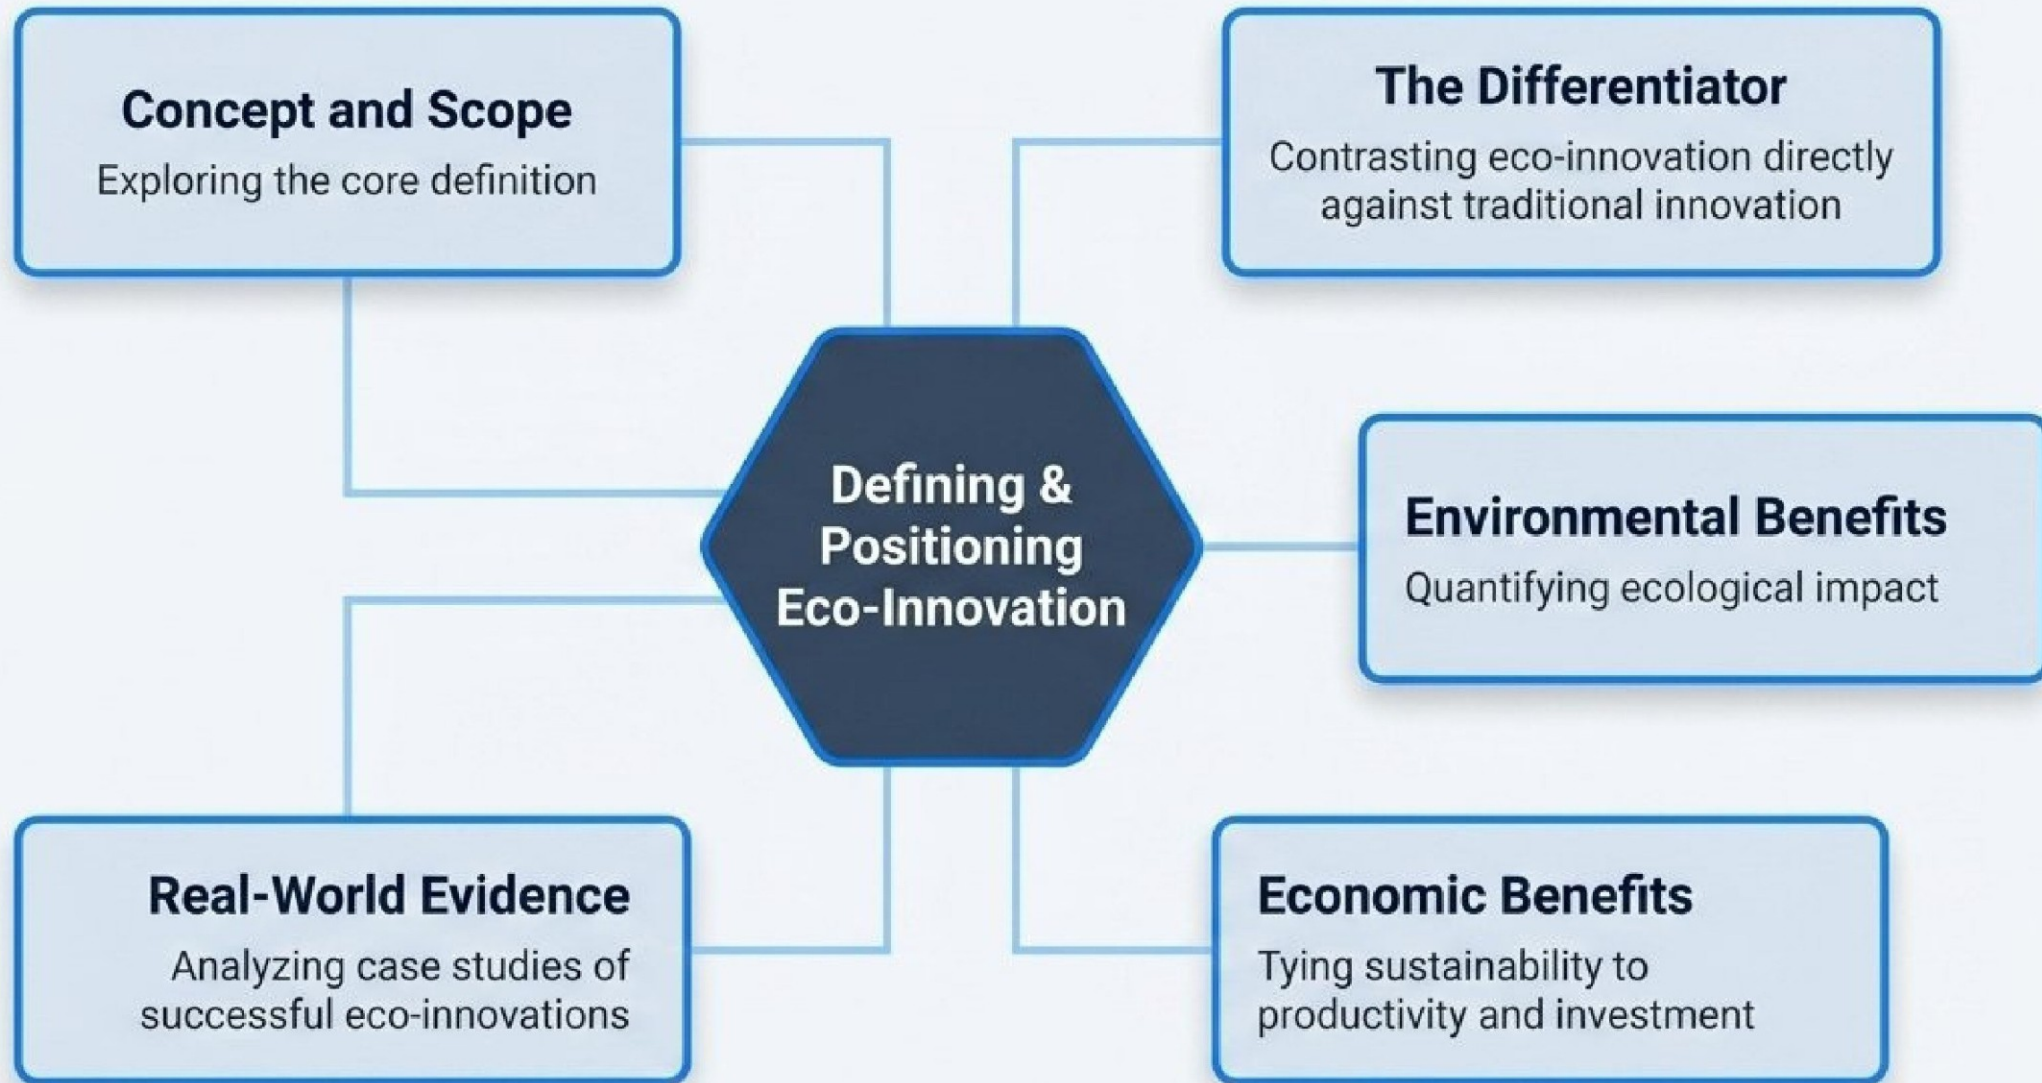

From Current State to Certified Mastery

Curriculum Architecture

Phase 1 Deep Dive: Introduction to Eco-Innovation

Phase 2 Deep Dive: Sustainable Business Models

Path A (Assessment)

- Assessing Current Business Models for Sustainability
- Understanding Product Life Cycles

Strategic Integration

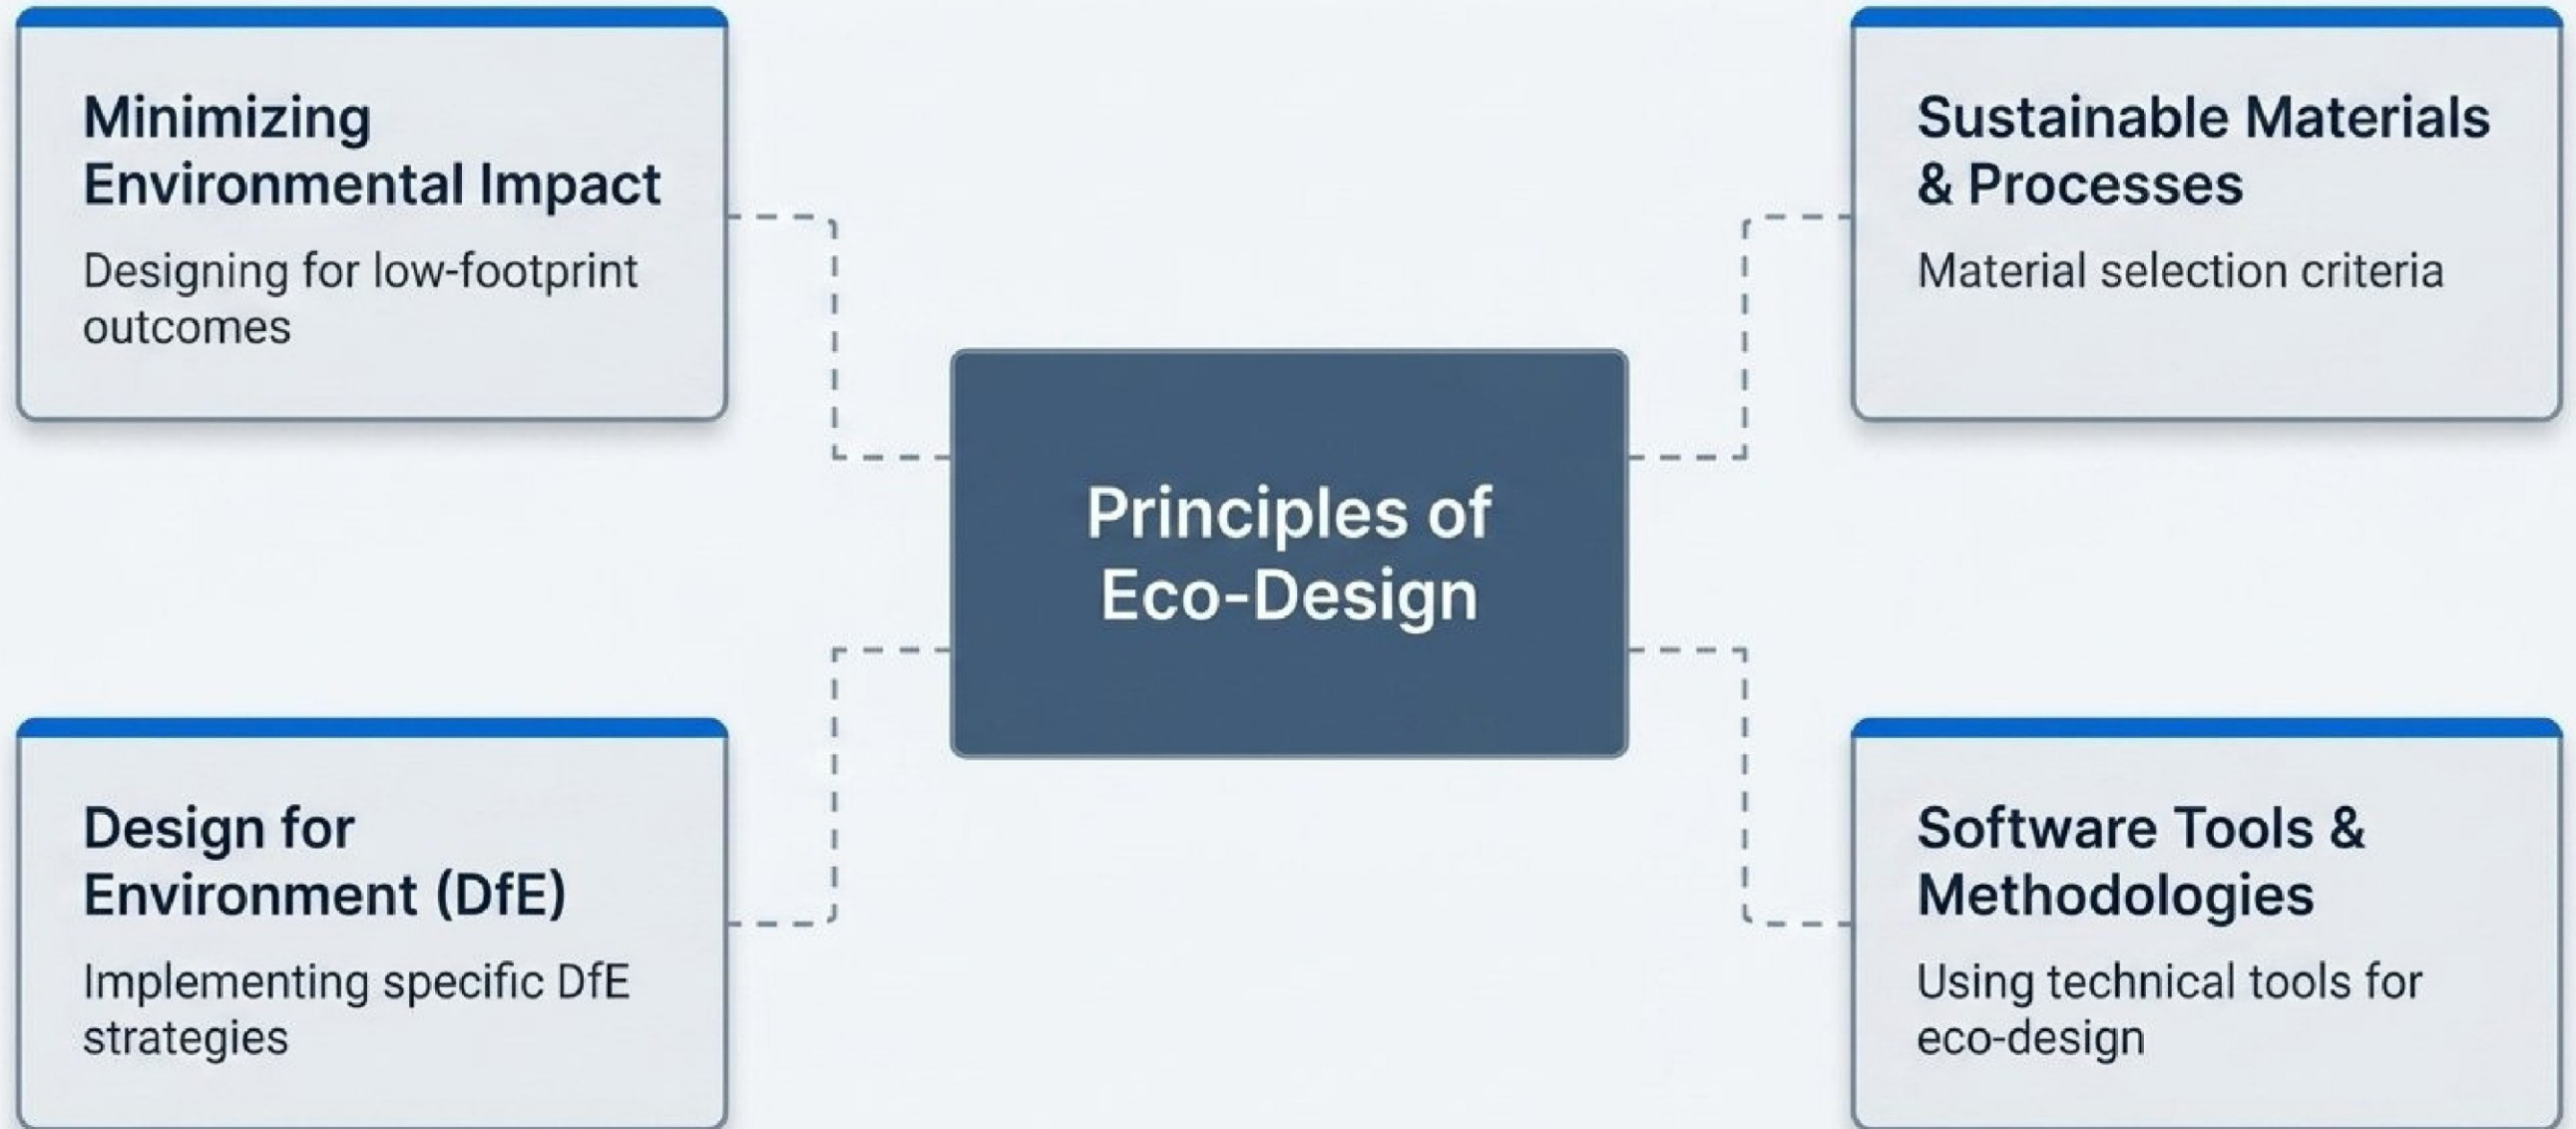

Path B (Transformation)

- ✓ Developing Strategies to Incorporate Sustainable Practices
- ✓ Applying Life Cycle Assessment (LCA) Tools

Core Mechanisms

- Life Cycle Thinking
- Market Trend Analysis
- Profitability Balancing
- Long-term Viability

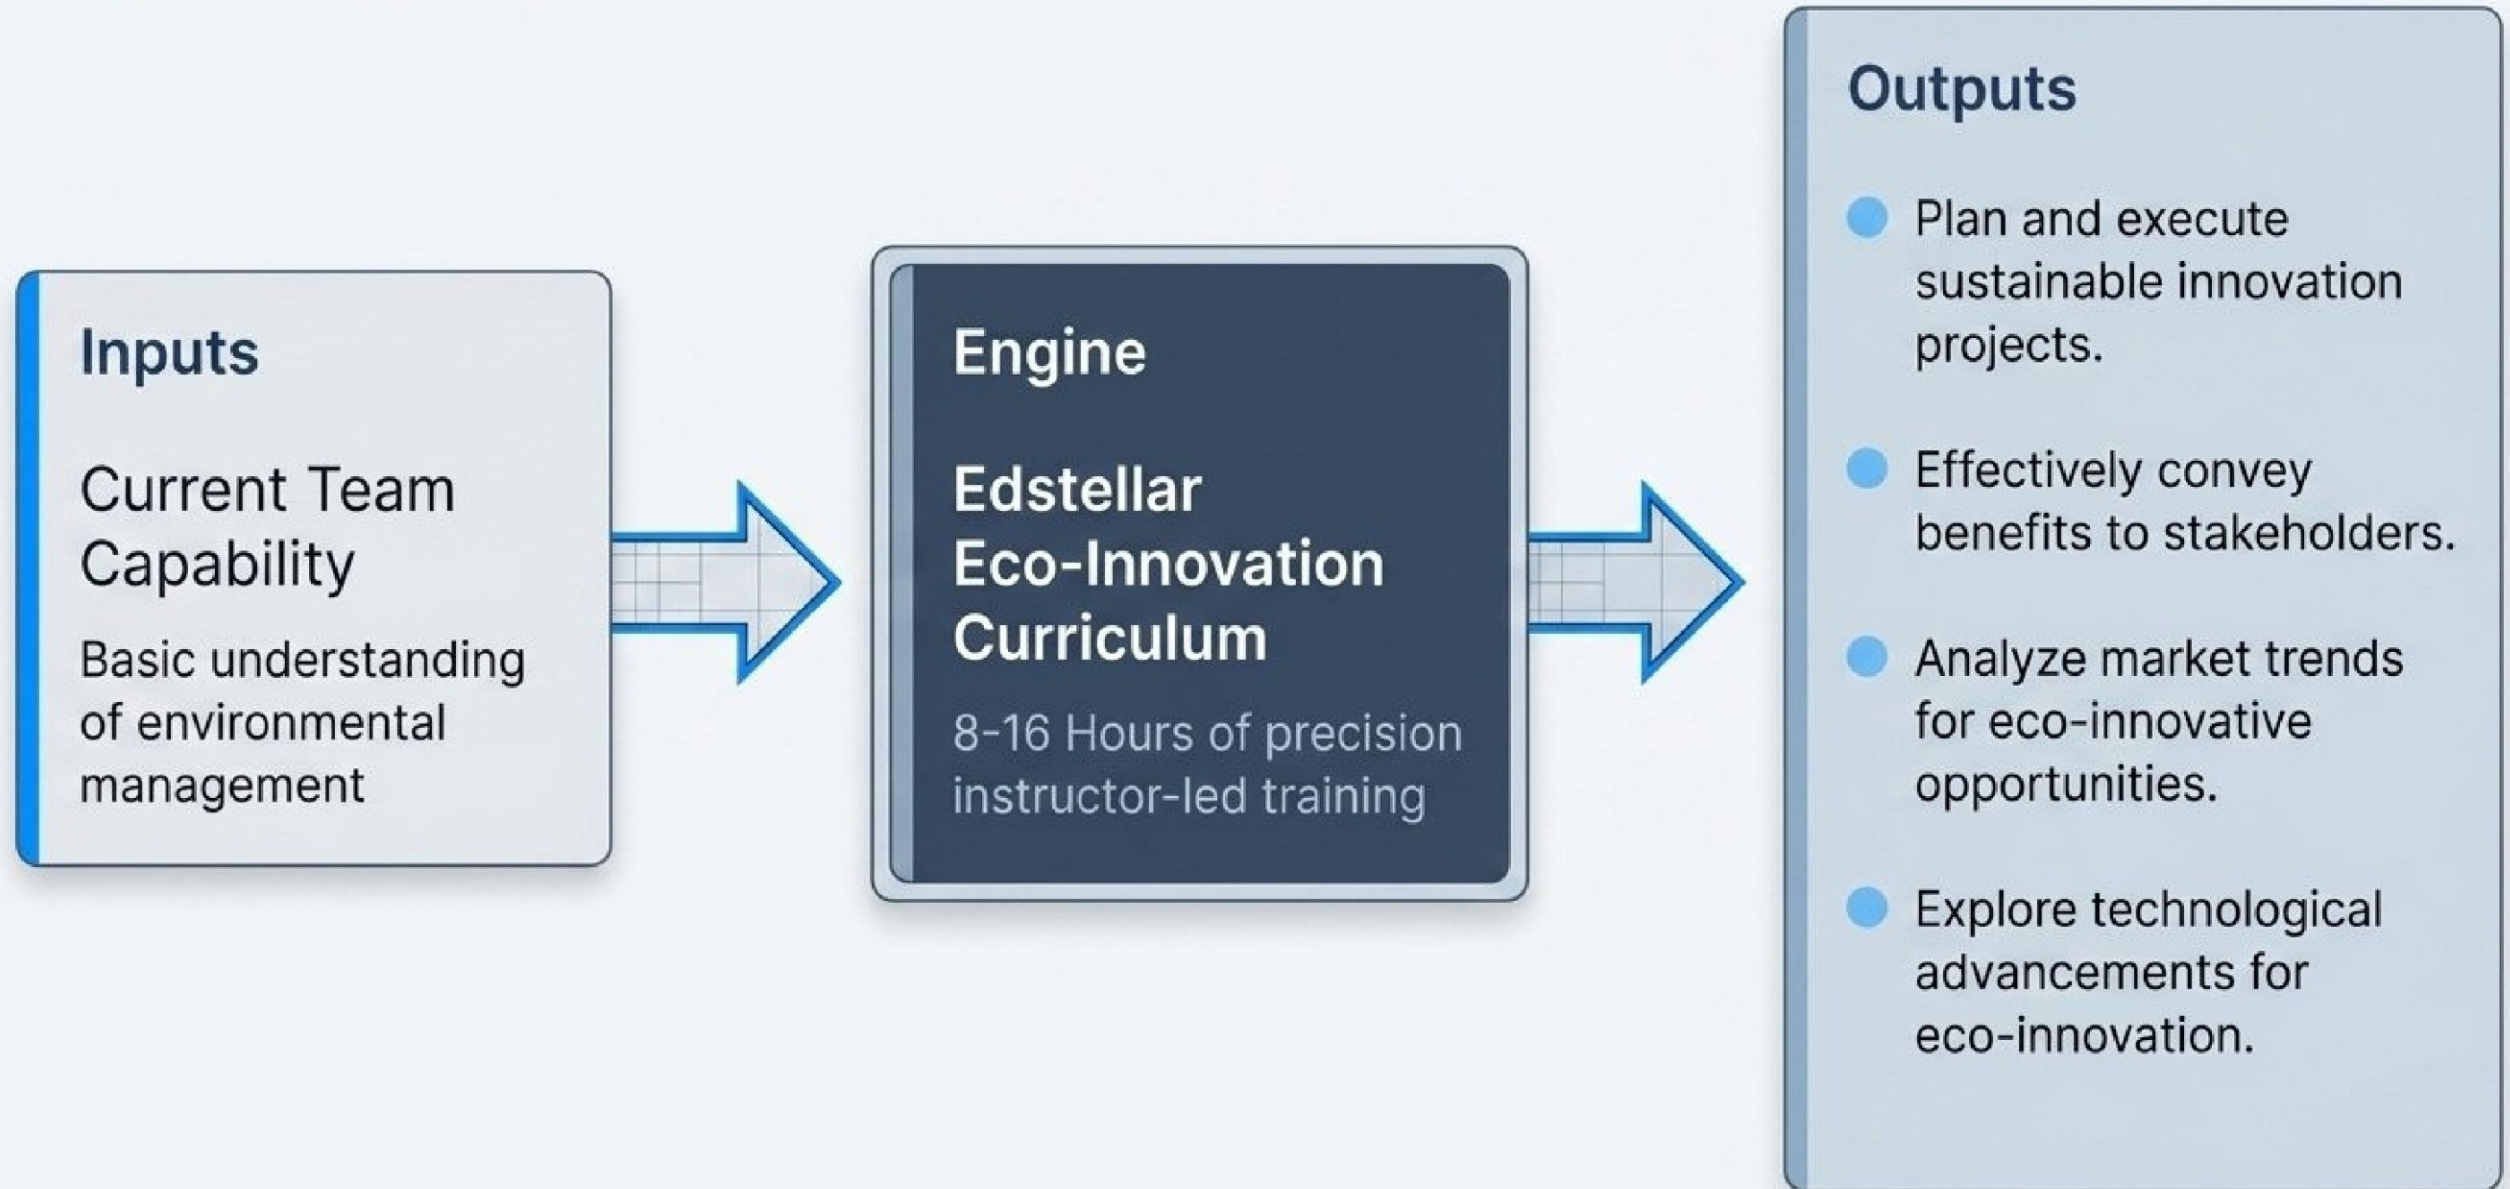

Phase 3 Deep Dive: Eco-Design & Product Development

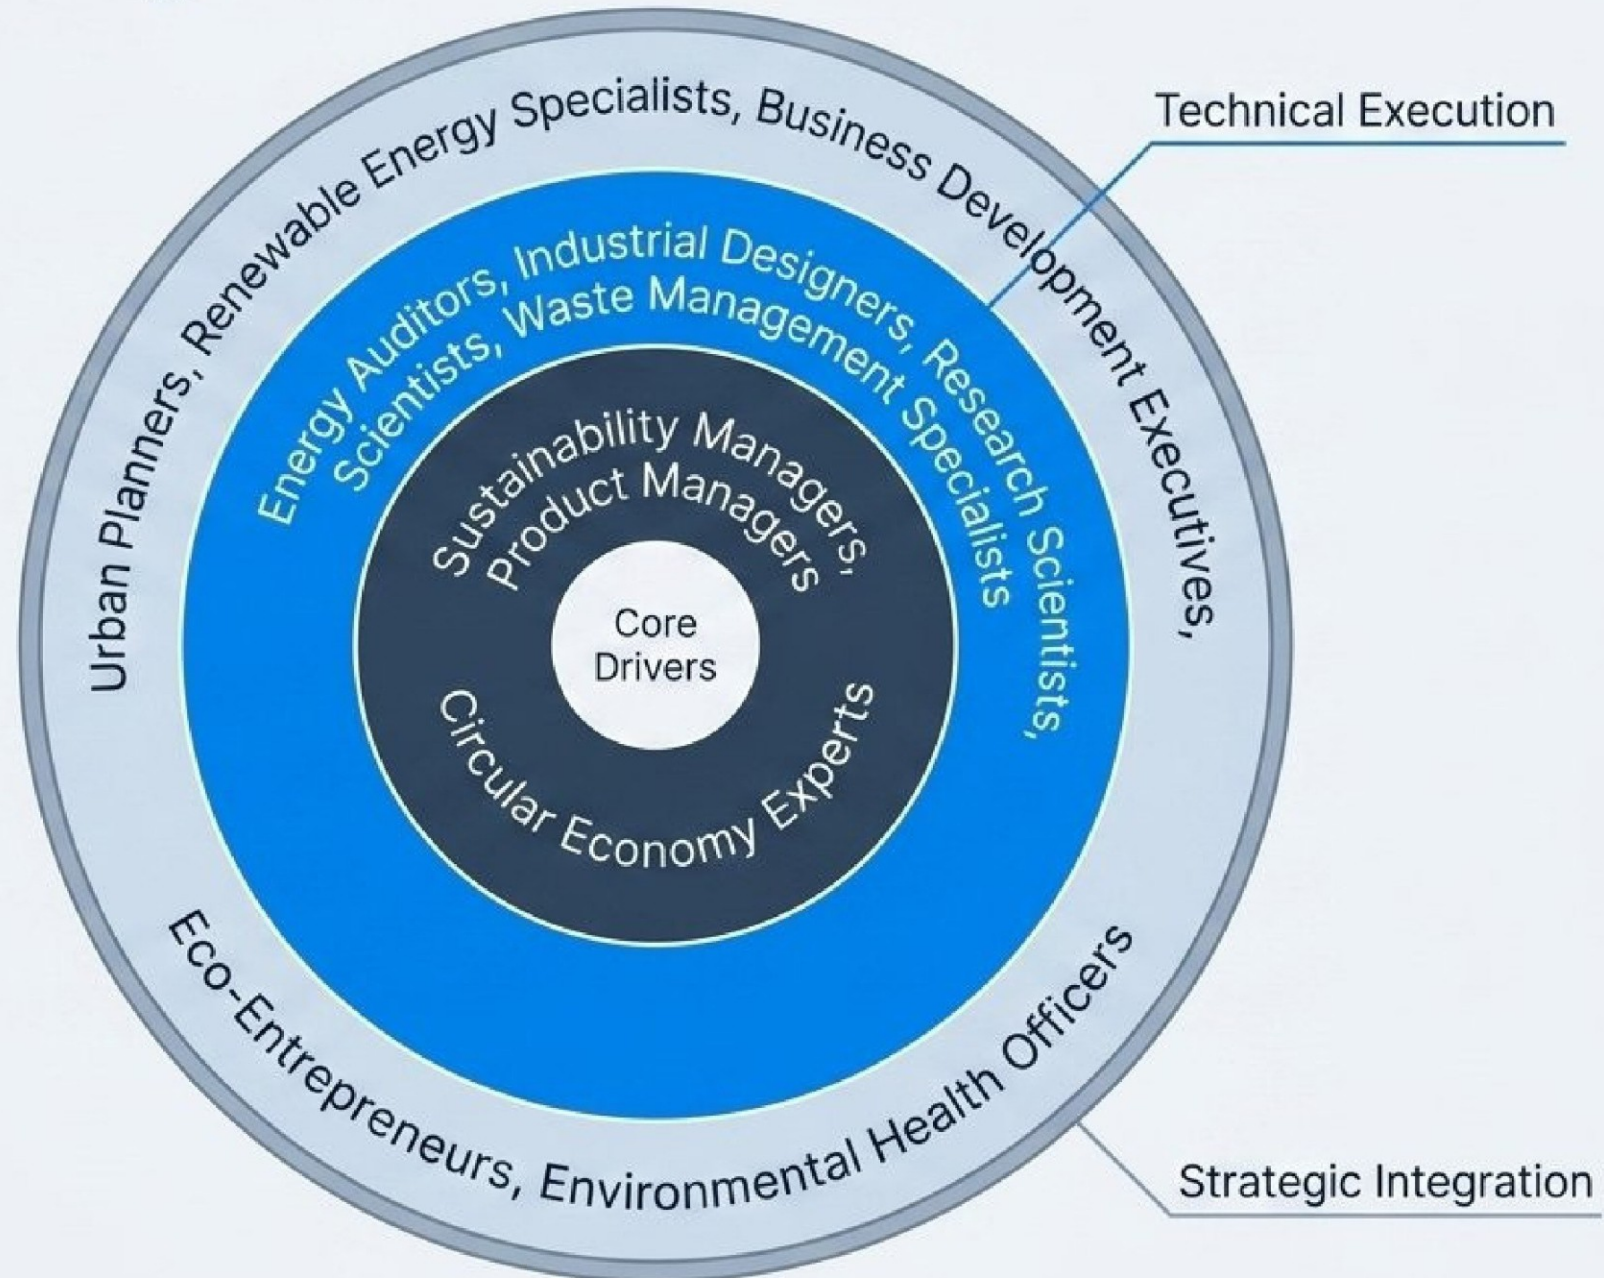

Cross-Functional Skills Diagnostic Matrix

	Strategic & Planning	Operational & Technical	Market & Compliance
Leadership & Strategy	Sustainability Managers, Eco-Entrepreneurs, Business Development Execs.		
Product & Engineering		Product Managers, Industrial Designers, Research Scientists.	
Operations & Audit			Energy Auditors, Waste Management Specialists, Environmental Health Officers.
Infrastructure	Urban Planners, Renewable Energy Specialists, Circular Economy Experts.		

Capability In, Results Out

Target Audience Alignment

Three Delivery Formats Engineered for Your Team

Virtual Live Instructor-Led

**Scale to large groups
across sites.**

- ✓ Standardized content
- ✓ Zero travel required
- ✓ Interactive remote tools
- ✓ Consistent global outcomes

On-Site Face-to-Face

Immersive, in-house learning.

- ✓ Tailored setup/content to workplace
- ✓ Group collaboration exercises
- ✓ Live demos
- ✓ Direct trainer access for doubt clarification

Off-Site Face-to-Face

Uninterrupted focus.

- ✓ Hosted at preferred venue
- ✓ Built-in team bonding
- ✓ Full schedule retention
- ✓ Boosts morale and commitment

Proof of Impact

“Edstellar’s Social Impact training programs have helped our organization strengthen its commitment to responsible practices, sustainability, and community well-being. The sessions offer actionable insights, structured sustainability frameworks, and real-world case studies that empower teams to embed ethical practices, create measurable social value, and drive meaningful, long-term impact across business operations.”

Leena Thomas

Head of Sustainability & CSR, A Global Industrial Group
