Specifications

Wind Turbine

Type	Off-grid wind energy generator
Power Output	1600W (48V system)
Voltage Options	12V, 24V, or 48V
Output Current Type	3-phase AC
Blades	9 blades (Raptor Gen 4 design)
Materials	Weather-resistant
Durability	Designed for year-round reliability
Startup Wind Speed	~6 mph (~2.7 m/s)
Brake	Mechanical brake switch included
Noise	Slight hum during operation (normal)
Break-in Period	100 hours

Safety Notes

Do not brake in winds	over 20 mph
Must be properly grounded	

Mounting

Recommended tower: at least 30 ft above obstructions
Guy-wire supported steel pole or tilt tower recommended
Hub and blade assembly secured with self-locking nuts
