U.S. POSTAL SERVICE FORM 1583 SUPPLEMENT

This U.S. Postal Service Form 1583 Supplement ("**PS Form 1583 Supplement**") is attached to and incorporated into the Proof General Terms ("**General Terms**"). Capitalized terms not otherwise defined have the meanings given in the General Terms, the Proof Glossary, or the Order Form.

1.   Applicability.   Subscriber has elected to receive Services that are conditioned upon Subscriber's acknowledgment and acceptance of additional terms and conditions associated with those Services. Except solely as supplemented by these additional terms, the Agreement remains fully in force and effect in accordance with its terms. In the event of any conflict between these additional terms and the Agreement, the additional terms shall control.

2.   Definitions. The definitions below apply to this PS Form 1583 Supplement.

2.1 "**Customer**" means certain of Subscriber's customers for whom Subscriber desires Proof provide access, through its Platform, to connect with a Notary to perform online Notarizations with respect to the PS Form 1583 and in accordance Section 1.8.2(a) of the Domestic Mail Manual ("**DMM**") 508 as issued by the U.S. Postal Service ("**USPS**").

2.2 "**Acknowledgement**" means a Notary will perform and confirm the specific items set forth in the PS Form 1583 and in Section 1.8.2(a) of the DMM 508 and will also perform those additional functions as are required by an Acknowledgment under Applicable Notarial Law.

2.3 "**Verification of Fact**" means a Notary will perform and confirm the specific items set forth in the PS Form 1583 and in Section 1.8.2(a) of the DMM 508 as part of the Notary's review of public records and confirmation of facts relating to the identification documents provided by the Customer.

3.   Acceptable ID Guidance. The parties acknowledge that the updated DMM 508 now incorporates the updated DMM 608.10.0 regarding the identity verification processes for the PS Form 1583, and that these publications provide USPS guidance for acceptable forms of primary photo identification and secondary identification to be used by signers in connection with the PS Form 1583. These additional terms are intended by the parties to apply to the foregoing guidance and instructions for the PS Form 1583, and as updated by the USPS from time to time after the date hereof.

4.   Requests for Acknowledgement or Verification of Fact. For each Customer from whom Subscriber seeks to obtain a completed PS Form 1583, Subscriber will determine, in its sole discretion, whether to request that such Notary perform an Acknowledgment or a Verification of Fact. As part of each Transaction Request that contains a request for Services in relations to a PS Form 1583, Subscriber must indicate whether Proof is to perform an Acknowledgment or a Verification of Fact for each Customer. The parties anticipate that Subscriber will elect to request an Acknowledgment for every customer who has, or should have, a U.S. Social Security Number.

4.1 If an Acknowledgment notarial act is requested, among the other applicable requirements, in order for a Notary to perform an Acknowledgment, the Customer must have a valid U.S. Social Security Number and be able to successfully pass dynamic knowledge-based identity authentication, so that the Notary can determine and record satisfactory evidence of the Customer's identity in accordance with Applicable Notary Law. Transaction Requests from Subscriber to perform an Acknowledgment will be performed in accordance with Applicable Notary Law and as outlined in the Agreement.

4.2 A Verification of Fact does not constitute or include the additional functions involved in a notarial Acknowledgment, and specifically does not include confirming satisfactory evidence of the Customer's identity through use of knowledge-based authentication. Accordingly, in a Verification of Fact the Customer does not need to present a U.S. Social Security Number as part of the process; but the Customer's identity is therefore not confirmed to a heightened level by the Notary, as part of the notarial process, as it is when the Notary performs an Acknowledgment. Transaction Requests from Subscriber to perform Verifications of Fact will be processed in accordance with Applicable Notary Law as well as the following specific procedures:

(a)   Subscriber will initiate a Verification of Fact request to Proof by submitting a Transaction Request, designating the pertinent Customer and providing the PS Form 1583 with all appropriate information populated on the form. Such Transaction request shall include the Subscriber's election to have a Verification of Fact performed respecting such Customer.

(b)   The Customer will receive an email invitation or other notification to access the Proof Platform to complete their PS Form 1583 signing.

(c)   The Customer will be notified by Subscriber of the type and nature of the primary and secondary acceptable identity documents required to complete the Verification of Fact respecting the PS Form 1583.

(d)   Customer will connect to the Proof Platform and will provide and confirm his or her required personal information, agree to the Proof General Terms and upload required images of his or her pertinent identity documents. Customer will also create an e-signature for use in electronically signing the PS Form 1583.

(e)   Customer will connect to and appear before a Notary on the Proof Platform by means of an online audio-video connection. The Notary will verify the required information on the Form, that the required identity documents have been provided by the Customer and will otherwise perform the specific acts required of a notary under the PS Form 1583 and as specified in the DMM 508. The Notary will confirm that the provided identity documents are legible and set forth the specified information, and will orally confirm with the Customer, on the audio-video, that the Customer's asserted identity and address on the Form are substantiated by the proffered identity documents.

(f)   Once the foregoing is completed, the Customer and the Notary will sign the PS Form 1583 and the session will be completed.
