

# Accessibility Statement

## Our commitment

We are committed to ensuring digital accessibility for all users, including people with disabilities. Accessibility is a core principle of our indoor mapping approach and is embedded in how our solutions are designed, developed, and maintained.

### Inclusive Design

Visioglobe maps integrate seamlessly with your existing ecosystem.

### Adaptive routing

Visioglobe maps integrate seamlessly with your existing ecosystem.

### Multi-Language support

Visioglobe maps integrate seamlessly with your existing ecosystem.

## Standards and Legal Framework

Our website and digital services are designed with reference to the Web Content Accessibility Guidelines (WCAG) 2.1 Level AA and the harmonised European accessibility standard EN 301 549. These standards form the basis of accessibility obligations in the European Union under current accessibility laws, including the European Accessibility Act (EAA) and the Web Accessibility Directive (WAD).

## Compliance Status

We regularly evaluate our website and digital services to assess compliance with accessibility standards. Where full conformance is not yet achieved, we are actively addressing issues and implementing improvements. We will update this accessibility statement to reflect significant changes in compliance status and testing outcomes.

## Accessible Navigation and PMR-Friendly Routing

In line with our accessibility philosophy, we ensure that our indoor mapping solutions provide PMR-friendly routing, prioritizing accessible paths such as elevators and ramps over stairs and other barriers. This enables people with reduced mobility to navigate indoor spaces independently and safely.

## Inclusive Interface Practices

In addition to navigation features, we follow accessibility best practices across our interfaces, including screen reader compatibility, keyboard operability, meaningful labels, clear structure, and predictable interactions.

## Feedback and Contact

If you encounter accessibility barriers or have questions about accessibility, please contact us at [insert contact email or form link]. We welcome feedback and aim to respond promptly.
