Individual Session Data Sheet

Record one student's targets, scored opportunities, cues, and next steps.

STUDENT ID

DATE

PROVIDER

ACTIVITY / CONTEXT

DURATION / SETTING

Goal or session target	Independent correct	Correct with cue	Total scored trials	Cue level / other measure or note

HOW TO SCORE

Total scored trials include incorrect responses. Exclude trials that were not attempted.

Use the same scoring rule as the goal. Keep cue details separate from the count.

Session notes / next step

Group Session Data Sheet

Use one row per student and target. Keep each student's counts separate.

GROUP / SESSION ID

DATE

DURATION

SHARED ACTIVITY / CONTEXT

PROVIDER

Student ID	Target	Independent correct	Correct with cue	Total scored trials	Cue level / other measure or note

GROUP SCORING

Tally only each student's own scored opportunities. Use a new row if the target changes.

For individual records, transfer only the relevant student's data.

Activity notes / next steps

Articulation Trial Data Sheet

Mark each scored production and separate independent from prompted accuracy.

STUDENT ID _____ DATE _____ CONTEXT / TASK _____

TARGET LEVEL _____ CUE TYPE OR LEVEL _____

TRIAL KEY
I = independent correct | P = correct after a cue | X = incorrect
Leave unattempted trials blank. Use a consistent scoring rule for each target.

Target / position	1	2	3	4	5	6	7	8	9	10	I total	P total	Scored trials

SCORING
Independent accuracy = I ÷ scored trials.
Correct with cues included = (I + P) ÷ scored trials.

Cue details / error patterns / next probe

Filled-In Example

Fictional example: score independence and accuracy separately.

STUDENT ID	DATE	CONTEXT / TASK
Sample A	11/12/2026	Picture naming

TARGET LEVEL	CUE TYPE OR LEVEL
Single words	One verbal cue

TRIAL KEY

I = independent correct | P = correct after a cue | X = incorrect

Leave unattempted trials blank. Use a consistent scoring rule for each target.

Target / position	1	2	3	4	5	6	7	8	9	10	I total	P total	Scored trials
Initial /k/ in words	I	I	P	I	I	X	I	P	I	I	7	2	10

INDEPENDENT ACCURACY: 7 / 10 = 70%

Correct with cues included: (7 + 2) / 10 = 90%.

One production remained incorrect after the cue. All 10 attempts were scored.

Brief session note

Initial /k/ was independently correct on seven of ten word trials.

Two additional trials were correct after one verbal cue.

Next session

Repeat the same word-level probe and record cued responses separately.
