One Senior Care Commends Senate Finance Committee for Exploring More Affordable Home Care for American Families

Senate lawmakers specifically request input on scaling the PACE model of care

Pittsburgh, Pennsylvania (October 20, 2026) – [One Senior Care](#)—a leading rural PACE provider—today applauded Senate Finance Committee lawmakers for releasing a Request for Information (RFI) entitled “Request for Information: Delivering an Affordable Home Care Guarantee for American Families.”

The RFI seeks input on strategies to make home care more affordable and accessible, improve nursing home care, and strengthen the long-term care workforce. It also explores how PACE can help modernize the long-term care system.

“We are seeking input on strategies to scale the PACE model—including mechanisms to lower high upfront capital entry barriers for prospective provider organizations, streamline state-federal regulatory approval processes, expand geographic service areas into rural and underserved communities, and broaden eligibility criteria to reach younger individuals with disabilities who could benefit from integrated, community-based care,” the RFI reads.

“We thank Senate Finance Committee Ranking Member Ron Wyden and members of the Committee for leading this effort and for recognizing the immense value of PACE in keeping older adults at home and in their communities, where they most want to be,” said Craig Worland, CEO of One Senior Care. “One Senior Care looks forward to sharing thoughtful recommendations with the Committee, including targeted reforms to build upon the model’s strong foundation and remove barriers to care for older adults who want to age at home.”
