Free to Use

Students and schools enjoy complete access at no cost.
- Customizable for Schools**

Schools can tailor their dashboards to fit their needs.
- Improve Students' CV**

Offers roles for students to gain real-life work experience to enhance their CVs.

Discover More About POV Academics

Learn how POV Academics enhances education with customizable dashboards, secure access, and real-world learning opportunities.

1 What is the **POV Academics** School Dashboard?

When a school collaborates with us, we create a free, fully customized dashboard tailored to its students' needs. This dashboard includes features such as:

- **Previous Exams:** A collection of exams shared by students from the same school to aid in revision.
- **Revision Sheets:** Summaries of key formulas and content, created and shared by students to help prepare for exams.
- **Notes:** A platform for students to exchange their personal notes for better understanding.
- **Tutoring:** An online system where students can tutor or learn from one another.

And much more, depending on the features the school chooses to include in their dashboard.

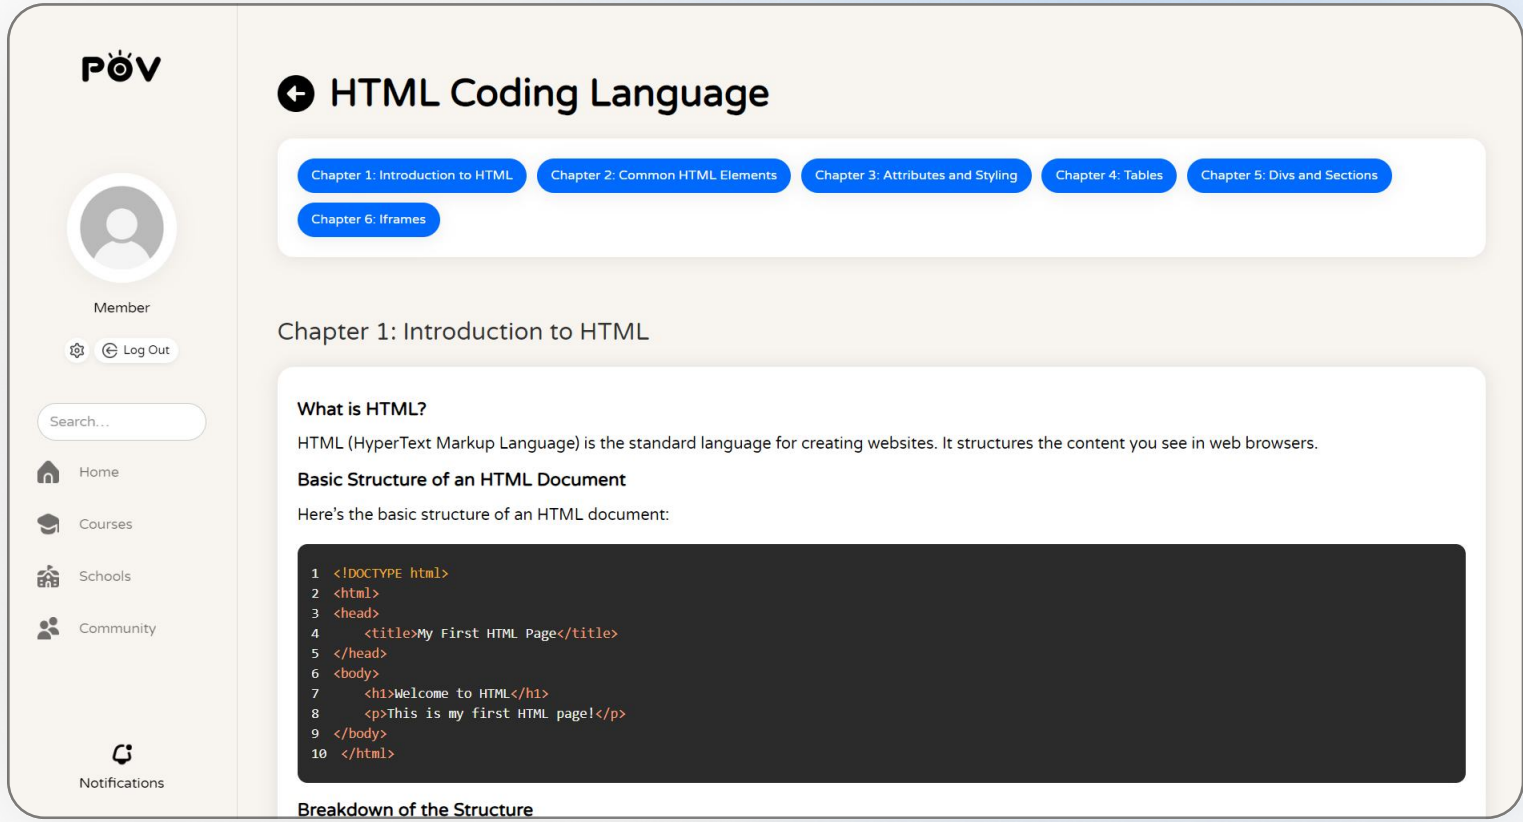

2 How Do We Ensure the **Safety** of School Resources?

Safety and privacy are our top priorities. To access a school's dashboard, users must create an account and contact an IT representative to request access. We verify each user to ensure they are current students of the respective school, strictly excluding alumni or unauthorized users. Additionally, we can provide schools with an Excel file containing the full names and email addresses of students who have access to their dashboard, ensuring full transparency and accountability.

3 How Do We Cover Our **Costs** if the Whole Website Is Free?

We sustain our platform by offering professional courses in various fields, particularly coding. These courses are designed to simulate real-life scenarios and challenges, providing students with hands-on experience. At the end of each course, students tackle a real-life problem-solving exam to test their skills. By paying to enroll in these courses, students gain valuable certifications for their CVs while supporting the maintenance and development of POV Academics.

Improve Your CV with POV Academics

Students can enhance their CVs at no cost by taking charge of their school's POV dashboard. By gathering key information, organizing educational events, and leading projects, students develop valuable skills like leadership, communication, and project management. POV Academics provides training and a team hub with tasks, resources, and meetings to help students take initiative, gain hands-on experience, and build a strong professional profile.

No Extra Work for School Administrations

With POV Academics, schools can rest assured knowing they won't have to spend time managing their dashboards. The school's only responsibility is to approve events, activities, and announcements organized by POV students. This streamlined approach allows schools to focus on their core objectives while providing students with the opportunity to take charge and grow.
