LAMELLA SCREENING

FLEXIBLE SOLUTIONS

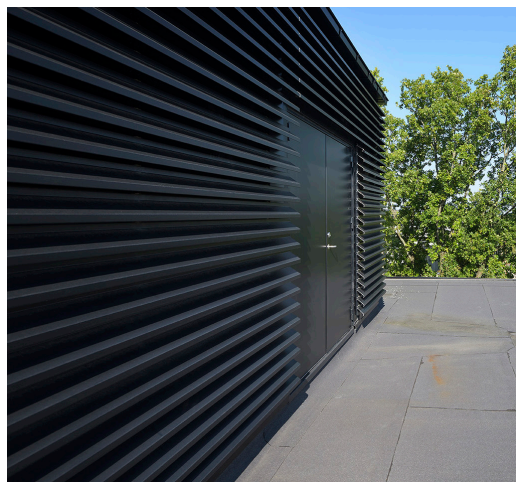

ATTRACTIVE SCREENING AND ROBUST PROTECTION IN ONE

Screening is often a necessity – both on a large and small scale. This could include bicycle shelters, waste areas, technical installations, or stairwells where both design and functionality are required.

At Nordisk Profil, you get a functional and high-quality solution that is easy to install and can be adapted to your project.

At the same time, you receive a well-documented solution with leading EPDs and certifications, ensuring full transparency of the material properties.

VARIOUS POSSIBILITIES

OPEN FACADE SOLUTIONS

Woodfac Click with wooden lamella
Napsu with aluminium lamella

CLOSED FACADE SOLUTIONS

Woodfac Panel with wooden lamella
Alufac Panel with aluminium lamella

ADVANTAGES OF LAMELLA SCREENING

PROTECTS

and ensures good ventilation for technical installations

REDUCES NOISE

with respect for the surroundings

ADDS ARCHITECTURAL VALUE

with a clean and modern expression

ROBUST SYSTEMS

with built-in thermal movement

DOCUMENTED SYSTEMS

for quality-conscious customers

MODULAR AND CUSTOMISABLE DESIGNS

with no visible screws or joints

SIMPLE AND STRAIGHTFORWARD

from design to installation

DESIGN AND EXPRESSION

Vertical, horizontal, open, or closed screening?

The lamellae can be customized in size, allowing you to design your own facade with the exact dimensions and expression that match your project.

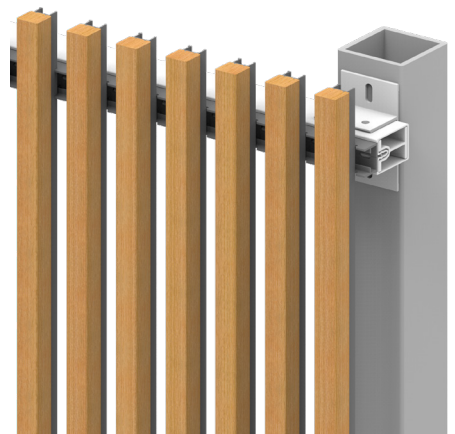

Our screening systems are available in certified wood types and our Greenline® aluminium – with any desired surface and RAL colour.

We only work with materials that have long lifespans and documented fire classifications and EPDs showing their environmental properties.

Horizontal installation

Vertical installation

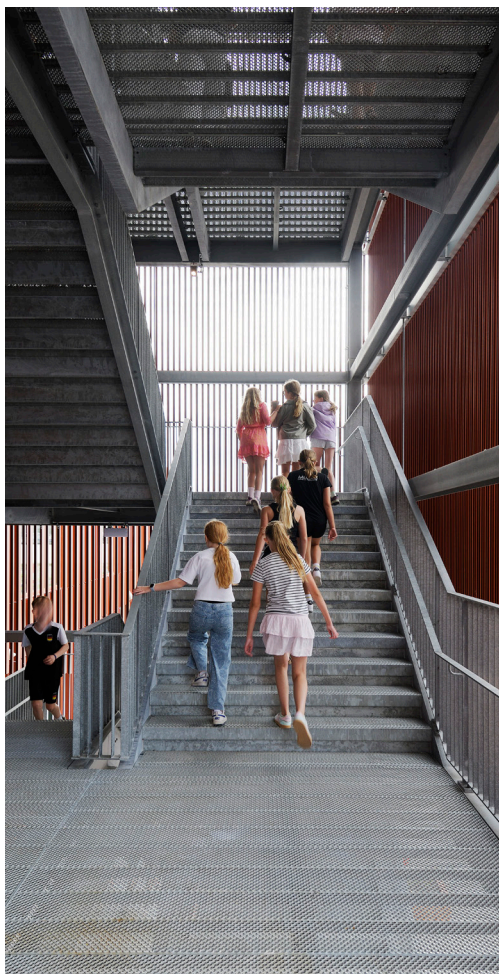

A COMPLETE, FUNCTIONAL PACKAGE SOLUTION

No matter your needs, we deliver an attractive, functional, and high-quality screening system – built from robust systems with built-in thermal movement and no visible screws.

To ensure the best possible solution, we offer a wide range of accessory profiles that can be integrated into the project and adapted to the underlying structure.

We also assist with design, static calculations, and wind load assessment – ensuring a stable, safe, and durable result.

Our focus is always on creating the right balance between profitability, buildability, and aesthetics – ensuring that the solution not only looks good but is also practical to execute and lasts for many years.

GET STARTED EASILY

We can design, plan, and deliver – all we need are your requirements and wishes. The process is straightforward, from idea to installation, and we support you all the way.

Would you like to see how our lamella systems work in practice and hear our recommendations?
