

Please help us prevent harm and save lives

PWC has assessed MedicAlert saves the public and private health system 56 million dollars every year. For much less, Government could provide equitable service access funding to support people who have life threatening medical problems, allergies, implanted devices, or other disabilities and need MedicAlert Emergency Clinically Verified Identification, if they experience an accident or medical emergency nationwide and cannot cognitively communicate or are unconscious.

In emergencies every minute counts

In less than a minute, you can scan this QR code and sign our parliamentary petition to support kiwis in need.
