

3RD NEWSLETTER – JUNE 2023

1. The DigiTech – WebPlatform

2.- Video series

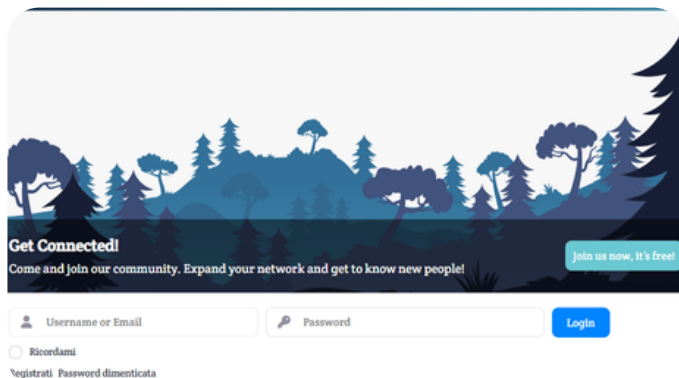

3. Next steps and updates

1. The DigiTech – WebPlatform

The Consortium will undertake the development of a comprehensive and interactive web platform, which will serve as a hub for e-learning and showcase the project results. The platform will be designed to provide open access to users and will include sections in English as well as in all the languages spoken by the project partners.

One of the key features of the web platform will be the storage of a digitalized version of the project Guide. This guide will be available in all its language versions and will be fully accessible and downloadable for interested individuals, NGOs, associations, and social enterprises not only in partner countries but also across Europe.

The platform will offer a user-friendly interface that encourages interactivity. It will provide various sections and functionalities to enhance the learning experience.

<https://www.digitechproject.eu/explore/>

The web platform developed by the Consortium will serve as a comprehensive and interactive hub for showcasing and sharing the project's results and analysis with the wider public and relevant stakeholders. Here are the key features and functionalities of the platform:

- **Interviews with Sustainability Professionals and Green Entrepreneurs:** The platform will include a dedicated section where interviews with sustainability professionals and green entrepreneurs will be uploaded. These interviews will be translated into multiple languages to ensure accessibility to a wider audience. Users will be able to watch or listen to these interviews to gain insights and learn from the experiences of experts in the field.
- **Guidelines and Instructions on Measuring Carbon Footprint:** The platform will host guidelines and instructions on how to use mobile applications for measuring the carbon footprint of organizations and individuals. These resources will be made public and easily accessible through the platform. Users interested in understanding and reducing their environmental impact will have access to step-by-step instructions and practical tools to measure their carbon footprint.
- **Learning and E-Learning for Adults:** The platform will cater to adults from all over Europe who are interested in learning about environmental issues, digitalization, and green entrepreneurship. It will offer a range of learning resources, including e-learning courses, interactive modules, and educational materials. Users will be able to engage in self-paced learning or participate in structured courses to enhance their knowledge and skills in these areas.
- **Innovation Section for Networking and Cooperation:** The platform will feature an innovation section designed to facilitate networking and cooperation among entrepreneurs, NGOs, associations, and social enterprises.
- This section will provide a space for these stakeholders to connect, collaborate, and share best practices. Users will be able to showcase their innovative projects, seek partners for collaboration, and exchange knowledge and expertise.

2. Video series

The Consortium will dedicate resources to elaborate and finalize video interviews with green entrepreneurs. These interviews will serve as valuable content for the web platform, providing insights into the experiences and perspectives of successful individuals in the field of green entrepreneurship. The following steps will be taken to ensure the production and integration of these video interviews into the platform:

- **Selection of Green Entrepreneurs:** The Consortium will identify and select a diverse range of green entrepreneurs who have achieved notable success in their respective fields. These entrepreneurs may have launched innovative eco-friendly products or services, implemented sustainable business practices, or made significant contributions to environmental conservation and sustainability.
- **Interview Preparation:** The Consortium will conduct thorough research on the selected green entrepreneurs to gather background information and insights about their achievements and

- **experiences.** This will help in formulating relevant interview questions that delve into their entrepreneurial journey, challenges faced, lessons learned, and their vision for a sustainable future.
- **Video Production:** The interviews will be recorded in a professional manner, ensuring high-quality audio and visuals. The Consortium may collaborate with videographers or production teams to handle the technical aspects of filming and editing. The interviews will be conducted in an engaging and conversational style, allowing the entrepreneurs to share their stories authentically.
- **Translation and Localization:** To ensure wider accessibility, the interviews will be translated into multiple languages. The Consortium will enlist the support of professional translators or language experts to accurately translate the interviews. This localization effort will enable individuals across Europe and beyond to understand and benefit from the insights shared by green entrepreneurs.

Digital Training for Entrepreneurs
and Climate Heroes

In the near future, the Consortium will convene a meeting with all its members to prepare for the final report. This meeting will be crucial in ensuring that the report accurately reflects the achievements, outcomes, and key findings of the project.

The final meeting of the Consortium is scheduled to take place in Iasi, Romania, from July 3 to July 5, 2023. This meeting will serve as a crucial milestone in wrapping up the project and preparing for the final report.

Moreover, to the final meeting and report, the Consortium plans to continue organizing events to disseminate the results of the project across all the countries involved. These events will serve as valuable platforms to showcase the project's outcomes, engage with stakeholders, and raise awareness about the project's achievements.

In addition to the final meeting and report, the Consortium plans to continue organizing events to disseminate the results of the project across all the countries involved. These events will serve as valuable platforms to showcase the project's outcomes, engage with stakeholders, and raise awareness about the project's achievements.

By thoroughly analyzing the progress, challenges, and opportunities for each objective, the Consortium can develop a comprehensive understanding of the project's achievements and areas for improvement. This reconciliation process will enable the identification of new opportunities, the resolution of challenges, and the alignment of project outcomes with the initial objectives.
