TOP NEWS OF THE MONTHS

LAUNCH OF DIGITAL COURSE

The project partners have launched a virtual training course targeted at youth workers. The holistic training offers knowledge, skills and tools that guide and support young people in exploring green careers. The course includes 40 hours of learning with both individual and collaborative activities. The six modules are based on the principles of the green economy, including its positive impact on youth employment, core competencies in green jobs, strategies for engaging young people, and resources that support green entrepreneurship and job opportunities. The participating youth workers will undergo a final assessment and receive a certificate of participation after the course is completed, while the project partners will evaluate the course to identify strengths and weaknesses for future improvements.

The partners have developed a manual of good practices targeted at youth workers. This manual provides real-world examples and cases of successful green career paths and serves as a resource for young people, job seekers, educators and career counsellors. It presents a structured review of the green economy across different countries, and helping youth workers to identify best practices and gaps in existing approaches. The manual contains 30 exemplary practices, translated into the partners' respective languages.

DEVELOPMENT OF MANUAL OF 30 GOOD PRACTICES

2ND TRANSNATIONAL PROJECT MEETING

The project partners gathered for the second transnational project meeting of the Green Economy Career Orientation project in Maribor, Slovenia. The meeting was highly beneficial, providing an opportunity to discuss platform enhancements, community engagement strategies, and progress in Work Package 4, focusing on interviews with green job providers. The partners shared valuable insights on adapting project objectives to their respective local contexts and identifying best practices in green career orientation. In addition, we explored ways to improve partnerships and foster meaningful collaboration among stakeholders.

THE NEXT STEPS FOR GREEN ECONOMY CAREER ORIENTATION (GRECO):

5 THINGS IN OUR ROADMAP

>>> CURRICULUM PILOTING

Ongoing piloting of the curriculum with preparations underway for the pilot report.

>>> KEY TOOLS DEVELOPMENT

Development of key tools - including Green Economy Policies template, job providers questionnaires, local project guidelines and a report template.

>>> METHODOLOGY FINALIZATION

Refining and finalizing the Green Workforce Adaptation Methodology for implementation.

>>> UPCOMING TPM AND LTТА:

Preparation for the next Transnational Project Meeting (TPM) and Learning, Teaching and Training Activity (LTТА) in Patras, Greece

>>> YOUTH WORKER SUPPORT

Interim and final online sessions to follow up on local projects, with reviews and feedback on youth workers' reports.

STAY TUNED!

Stay tuned for more updates as we continue our journey toward empowering youth in green careers across Europe! Together we're building a brighter, more sustainable future.
