**Response Regarding EU Regulation 2025/40 Packaging and Packaging Waste Regulation(PPWR)**

Thank you for your inquiry regarding Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR).

Rapid Rivet & Fastener Corp. recognizes the requirements of the Packaging and Packaging Waste Regulation (PPWR) and is committed to supporting our customers' compliance efforts.

As a distributor of aerospace and commercial fasteners, we do not manufacture the packaging materials used by our suppliers. Accordingly, we rely on packaging manufacturers and our supply chain partners to provide applicable compliance information regarding the packaging they produce.

At this time:

- We are reviewing the PPWR requirements applicable to our operations and supply chain.
- We are requesting compliance information from our packaging suppliers and manufacturers where appropriate.
- To the best of our knowledge, we are not aware of any intentional use of packaging materials that would conflict with the applicable provisions of Regulation (EU) 2025/40.
- Upon receipt of supporting documentation from our suppliers, we will make the relevant information available upon request.

Should you require documentation for a specific shipment or packaging configuration, please identify the applicable part number(s) or order, and we will work with our packaging suppliers to obtain the appropriate information.

We appreciate your understanding and look forward to continuing to support your requirements.
