Custom sizes, materials and configurations available.
Standard lead times apply.

ABOUT

The Sonnet dresser uses the rhythmic patterns of selenite, hand cut and arranged in vertical pattern along with polished metal inlay and handles to create a beautiful luxurious statement piece. Selenite is a naturally occurring crystalline form of gypsum and is hand quarried in small lots and selected exclusively for our studio. While selenite is considered a soft mineral, reasonable care assures its lasting beauty and value. Please feel free to contact us with any questions about its use or to receive a quote.

FINISHES

Available finishes: All level 1, 2, and 3 finishes
