

## DESCRIPTION

The peculiarity of the coffee table Cheope lies in the eccentric decoration that covers the bases, the designer’s artistic expression. A thin metal sheet is molded thus creating a surface with a strong three-dimensionality emphasized by a chromatic finish that enhances its texture. Available in different chromatic finishes to obtain the best match with the type of “amorphous shape” top in marble. The availability of different sizes allows their use in living areas also in combination with other pieces of different sizes belonging to the same collection.
