Important: The colors used may differ from piece to piece due to the natural properties of clay and the unique application of color. Each creation is one of a kind and cannot be exactly reproduced. Natural variations and irregularities may occur, enhancing the product's authentic and organic character. These variations do not affect its quality.

GLAZE FINISH DETAIL

Glaze, Green 4, smooth exterior finish, shown on the bathtub interior.

The Glaze finish involves spraying the selected color onto the surface, followed by a delicate glass layer, then firing in a kiln. This combination creates an exceptionally smooth, soft, and glossy texture.

The palette offers 31 engobe colors, complementing the nine existing base colors, for personalized designs.
