

We'll list your home on Jitty – here's why that gives you an edge.

When you choose us to sell your home, we'll list it on Jitty — a next-generation property platform powered by AI, built to help buyers discover homes they might have missed on traditional sites. It's a smarter, modern way to get your home seen by more of the right people — and it's completely free to list.

New buyers from AI search

Jitty helps more buyers discover your home using travel time, size, features, and layout, not just area.

More of the right buyers see your home — even if they weren't looking there.

Powerful filtered alerts

Jitty sends buyers alerts when a home matches all kinds of criteria, not just area and rooms.

Your home can land in the inbox of someone who didn't search here, but loves what they see.

No downside, just visibility

We'll still list your home on other portals.

Jitty gives you an extra edge — reaching a fast-growing audience of serious, modern buyers at no extra cost.

Innovation with backing

Jitty is backed by global property leader REA Group — with cutting-edge tech built by the team behind Deliveroo, and deep industry expertise.

They're focused on matching sellers with qualified buyers.

Choose an agent who lists on Jitty — and let more buyers find you.

Search and sell smart on Jitty.com
