Option 3 – Enterprise Software

➤ Authentic, Terminal Handler, ATM Marketing, Connections, AMP Portal

Option 4 – Legacy

➤ Transaction Manager/Gateway

Option 5 – Channel Management

➤ Vision, Inetco, Cash Management

Customer/Partner Responsibilities & Characterization Details

Customer Help Desk

The Customer/Partner is responsible for maintaining a help desk to handle incoming calls from your organization. Help desk personnel should be well-versed in procedures for diagnosing and resolving user-solvable system issues. They will act as the point of contact for submitted tickets and collaborate with their internal employees to isolate and document software-related problems.

Please note that NCR Atleos will only accept problem reports that have been processed through your help desk.

Required Information for Case Submission

- Details of the issue – clear and as much detail as possible, including
 - + Number of units impacted.
 - + Frequency of occurrence.
 - + Details of any recent changes.
- Product Details (including versions).
- Environment where issue was observed (Production vs Lab/Test).
- Date and Time of the issue.
- Impact and Urgency of the issue.
- Logs/Traces/Screenshots will be required in many cases. We will provide a link where they can be securely uploaded using NCR Atleos File Transfer.

Ticket Priorities and Initial Response Times (IRT)

- **NCR Atleos Software Support adopts a priority system based on issue impact and urgency. This is used to derive a ticket priority.**
 - The **Impact** is a measure of the extent of the Incident and of the potential damage caused by the Incident before it can be resolved.
 - Examples
 - Medium impact could be if a reporting portal is unavailable.
 - High impact could be if a large number, or a high percentage, of ATMs have gone offline.
 - The **Urgency** is a measure of how quickly a resolution of the Incident is required.
 - Examples
 - Low urgency could be a documentation update.
 - High urgency could be if automatic dispatches are not taking place.
 - The impact/urgency of a ticket is dynamic and can change during the lifecycle of an investigation. For example, if the impact increases (more endpoints impacted) or if the urgency decreases (some functionality is restored).
 - The provided Impact and Urgency is used to derive a ticket priority.

		Impact		
		High	Medium	Low
Urgency	High	1 – Critical	2 – High	3 - Moderate
	Medium	2 – High	3 – Moderate	4 – Low
	Low	3 – Moderate	4 – Low	5 - Planning

- **Standard Initial Response Times (may vary based on contract)**

Priority 1 – Critical
Target Initial Response Time:
1 Hour

Priority 2 – High
Target Initial Response Time:
4 Hours

Priority 3 – Routine
Target Initial Response Time:
Next Business Day

Priority 4 – Low
Target Initial Response Time:
Within 2 Business Days

Priority 5 – Planning
Target Initial Response Time:
Within 5 Business Days

Escalation Matrix

Please always state Case Number and reason for escalation.
