Energy Management System (EnMS) (Energy Policy)

At GSP Crop Science Ltd, our commitment towards responsible energy management as a key pillar of our sustainability and environmental stewardship. We recognize that efficient energy use is essential to reduce environmental impact, control operational costs, and contribute to a low-carbon future of its unit-3, Nandesari operations.

We at “GSP Crop Science Ltd” are committed to:

- Drive energy conservation and optimize the use of natural resources which enable continual improvement of energy performance and energy management system.
- Compliance to all statutory, regulatory and other requirements related to energy efficiency, energy use and energy consumption.
- Integrate energy performance considerations into procurement practices, design, and modification of facilities, equipment, and processes.
- Establish an effective energy management system, setting and reviewing energy objectives and targets in order to improve energy performance and reduce the relevant energy sources used in all its activity including products and services.
- Ensure that appropriate resources are deployed and information is communicated to all the stockholder to support the achievement of energy objective & Targets.
- Train & engage with relevant stakeholders in building responsible behaviors in energy use and energy consumption.
- Setting up energy management cell to monitor energy management program & energy performance with regular audits.
- Encourage the adoption of best practices and innovation to support energy conservation and the use of renewable energy where feasible as sustainable Practices.

Mr. Mehul Pandya – Executive Director
