

Batten-clad™

All measurements are nominal, in mm. Sheet cover width tolerance +/- 5mm.

An architectural metal board & batten walling system that ticks all the boxes

Batten-clad™ is Roofing Industries latest board & batten style wall cladding innovation incorporating interlocking side lap technology, complementing both residential and commercial projects alike.

Highly adaptable, Batten-clad™ provides designers with an aesthetic, cost effective solution which is easy to install, giving designers a modern and stylish wall cladding option with simplicity at heart.

Manufactured in varying widths, metal substrates and available in a full selection of pre-painted colour finishes, Batten-clad™ certainly ticks all the boxes.

Batten-clad™ cover options

460mm nominal pan width	(510mm cover)
375mm nominal pan width	(425mm cover)
240mm nominal pan width	(290mm cover)
