

AURA™

All measurements are nominal, in mm. Sheet cover width tolerance +/- 5mm.

AURA™ sets the scene, delivering modern character with confident clean lines

AURA™ is a credible addition to Roofing Industries roofing and wall cladding product range, equally impressive on either residential and commercial projects.

Create your own vibe with this medium height symmetrical trapezoidal profile, which offers designers finesse and character, whilst looking great and providing the economy to help the project stack up.

Manufactured in steel and aluminium substrates and available in a full selection of pre-painted colour finishes, AURA™ gives a well earned air to any project.
