FLEXIPURE ADVANTAGES +

+ For every pulp, at any temperature

The pulps obtained from shredding can now be filtered to meet regulatory requirements regardless of processing temperature.

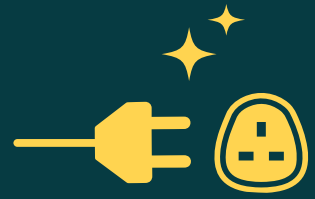

< 0,1 kwh/m³

0% water

+ Energy efficiency

FLEXIPURE consumes very little electricity and does not require water for filtration.

+ User-friendliness

FLEXIPURE is a Plug & Play module that can be easily installed on any site processing organic pulp.

TURNKEY MAINTENANCE PLAN

A maintenance system built for **ease**, **speed**, and **efficiency**:

- 1 Intervention within 48 hours upon fault declaration.
- 2 On-site replacement of the upper chassis using a pre-stocked spare from our inventory.
- 3 The defective chassis is repaired and returned to the maintenance stock.

A maintenance plan designed to maximize uptime and keep your operations moving
