

PRECISION FORM WHEELS

Abrasive Technology's form wheels are meticulously crafted for precision, tight tolerance, and complex forms. Tailored for both creep feed and high-speed applications, our wheels stand out for their impressive material removal rates, catering to a plethora of materials including fiberglass and composites.

SUPERIOR PERFORMANCE

- Extended Free Cutting Ability
- Higher Material Removal Rates
- Reduced Wheel Dressing Downtime
- Lower Initial Cost vs. Competitors
- Optimal and Consistent Results

CUSTOM CONFIGURATIONS
MULTIPLE DIAMETER SIZES
COMPLEX GEOMETRIES

CAPABILITIES

DIAMETER:

Up to 44" Diameter Wheels

PRECISION TOLERANCE:

(+/-) 0.0001"

MATERIALS

- Fiberglass Materials
- Composite Materials
- Industrial Materials
- Challenging Substrates

APPLICATIONS

- Creep Feed Grinding
- High-Speed Applications
- Form Grinding Operations
- Precision Grinding Tasks

AVAILABLE IN P.B.S.® BRAZE (OR) ELECTROPLATED
