The beer

Experience the magic of our broad selection of spontaneously fermented sour beer at Baghaven!

Home to twelve giant oak barrels and over fifty California Chardonnay barrels, Baghaven's beers were transformed by wild yeast and bacteria, creating brews with remarkable depth and complexity.

Their in-house microbiology lab maintained unique yeast and bacteria cultures, infusing their beers with true Copenhagen DNA.

Is sour not you thing? Fear not! - We offer plenty of taps serving our world renown IPA's, pilsner and much more.
