

SET UP

OVERVIEW

STEPS

Under **Global Settings**, click **Users**.

For the user you would like to edit, click **Edit User**.

The login options of the user will be displayed, with two fields that can be changed.

These are the Login Type, and the Login ID (for Microsoft Personal Authentication, you do not need your Login ID).

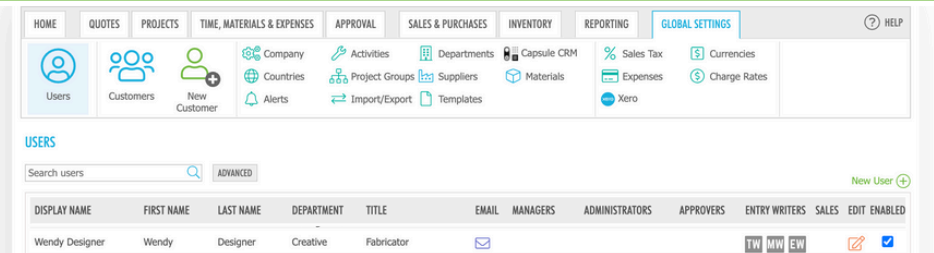

The Login Type will display a drop down list of four third party option types you can choose from to implement Single Sign On (SSO).

These are:

- Microsoft Work Account (Or Office 365)
- Microsoft Personal
- Google Account
- Facebook

How to use 2-factor Authentication

Tidy, as an associated application and long-standing partner of Xero takes the online security of our clients' business seriously. Because of this, Tidy allows its users to sign-in through third-party applications like Microsoft, instead of a standard log-in. These can be easily set up in your Tidy account using this guide.

EDIT USER - WENDY DESIGNER

HOW TO USE 2-FACTOR AUTHENTICATION

Once you have chosen the Login Type and ID, click **Save**.

Any of these Sign On options offer 2 Factor Authentication (2FA) as part of their service.

Note: We cannot guarantee you will be able to keep any of the data that you enter into this demo version.
