

Natalia Emanuel

Research Economist at the Federal Reserve Bank of New York

A globally recognized authority on the future of work, productivity, and technological change.

Biography

As organizations rethink where, when, and how people work, Natalia Emanuel is at the forefront of research challenging conventional wisdom about productivity, collaboration, and the future of the workplace. A research economist at the Federal Reserve Bank of New York, Natalia examines what truly drives employee performance, professional development, and organizational success, offering fresh insights into one of the most important challenges facing business leaders today.

Natalia is the co-author, alongside economist Emma Harrington, of *In Person: How Working Together Fuels Creativity, Productivity, and Growth* (2026). Drawing on extensive economic research, the book challenges conventional thinking about return-to-office mandates and explores how organizations can balance the benefits of working together with the flexibility employees increasingly value.
