

Full visibility, control and collaboration for your connected devices in **one unified platform**

Xyte Device Cloud enables you to **remotely access and support all your unified communications (UC) and audiovisual (AV) devices** from anywhere in the world and across your campuses. **Through a single pane of glass.**

Device Clouds for the Enterprise and Higher Education

Enterprises and campuses across the globe are embracing a cloud-first strategy for their managed devices, enabling **faster issue resolution** and **greater operational efficiencies**, while **extending life cycles** and **lowering the total cost of ownership** for IT, AV and UC equipment.

Corporate and educational campuses can now benefit from streamlined services and faster device support from leading AV brands and integrated communications platforms.

“We hear from our clients and internal customers all day that they want to remotely manage devices across multiple manufacturers from one place. It reduces complexity, simplifies operations, improves consistency in the experience and enables interesting insights into device and space utilization.”

Ron Sklaver

Global Lead, In-Office Meeting Experience, EY

Optimize technology operations in one unified platform:

Manage, monitor and configure your fleet of IT/AV/UC devices

Gain full visibility into the status and performance of each device

Manage firmware versions for your entire fleet of devices

Rapidly identify, investigate and resolve issues remotely

Extend the life of your devices with proactive maintenance, updates & predictive insights

Centralize management of device files, licenses and warranties

Capture and analyze device data

Easily purchase and manage device subscriptions

Integrate with ticketing systems and notifications apps

“Audiovisual cloud monitoring represents the eyes and ears of the digital era. It automatically transforms raw data into symphonies of insights, orchestrating a harmonious future for today’s innovation.”

John Hoyt

Director of Multimedia Engineering, BlackRock

A Platform You Can Trust

Built with enterprise-grade security, Xyte Device Cloud offers enterprise CIOs and IT directors a fully-scalable cloud architecture with a highly resilient infrastructure, SOC 2 Type 2 certification, and the highest levels of privacy. [Learn more about Xyte's Security at Scale.](#)
