

# One Unified AI Cloud for Connected Devices

Manage all devices from one AI-powered cloud – cutting downtime, reducing costs, and saving teams valuable time

Xyte is the first AI-powered cloud platform that connects, monitors, and orchestrates AV and UC devices in a single pane of glass. From global deployments to local networks, Xyte gives enterprise AV/IT teams and MSPs / integrators complete visibility and control – any brand, any location – so they can manage more, troubleshoot faster, and scale smarter.

## Unified, end-to-end device orchestration

Centralize visibility and control for every device, room, and asset in one dashboard, monitor fleet health in real time, standardize updates and lifecycle control, and scale securely across tenants.

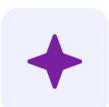

## Prevent issues, resolve faster

Monitor proactively to catch problems early, troubleshoot remotely to cut downtime, push updates end-to-end to keep systems secure, and integrate with IT workflows to speed ticketing resolutions.

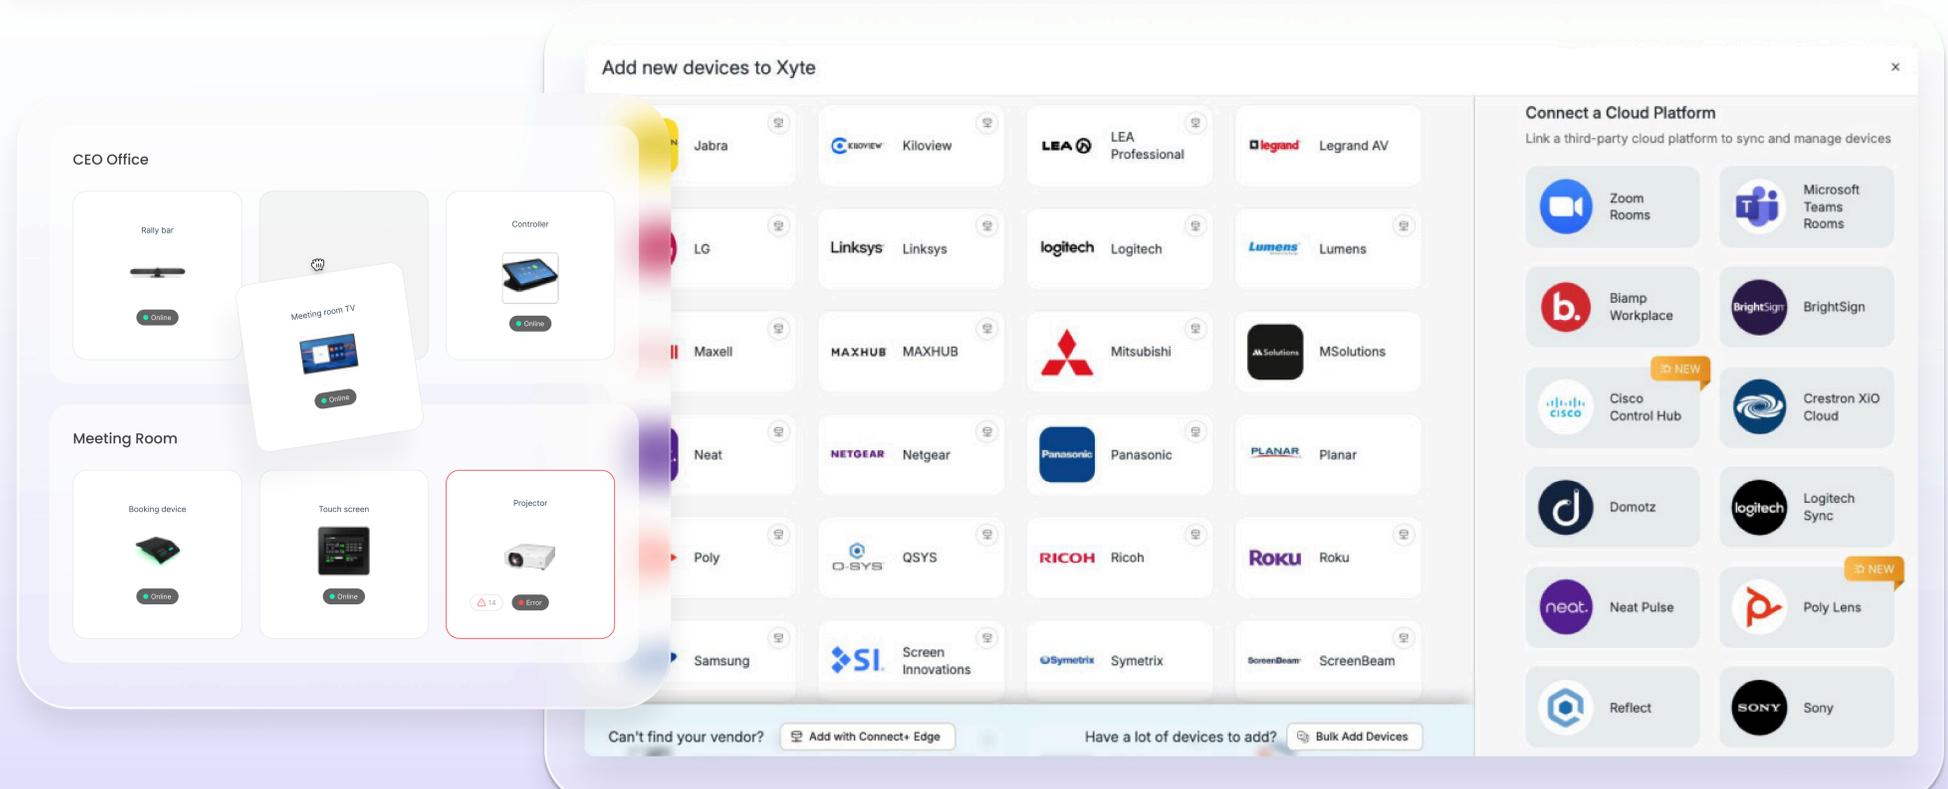

## Data-led optimization and resource planning

Leverage real-time usage analytics, KPIs, and trends to guide refresh planning, boost utilization, and make data-backed decisions.

## Run smarter and scale operations with AI Teammate

Leverage our built-in agentic AI to analyze incidents and logs, suggest resolutions, execute workflows and commands at scale, and drive AI-powered detection, diagnosis, and issue resolution – securely governed with enterprise-grade controls.

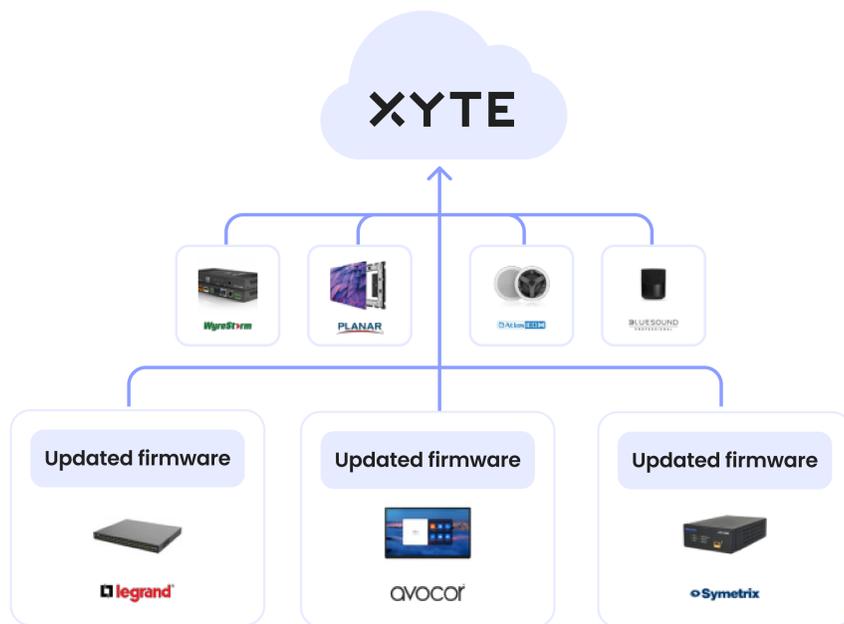

# Connect everything, everywhere

Manage and monitor devices from all supported brands using both native device integrations and cloud-to-cloud connectors. With Connect+ Edge, unlock visibility and control for all devices, including those on local networks.

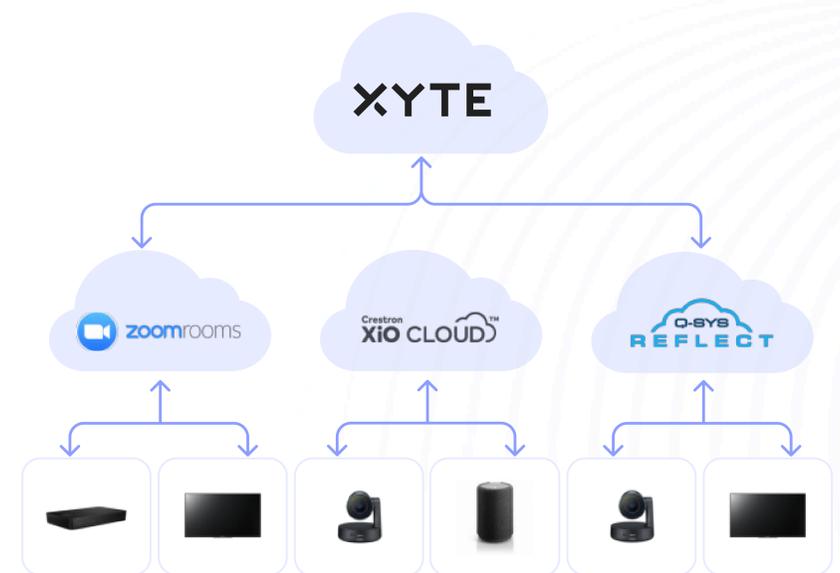

## Native Integrations

Thousands of devices are natively supported in the Xyte cloud. No extra hardware or expensive on-prem installation is required.

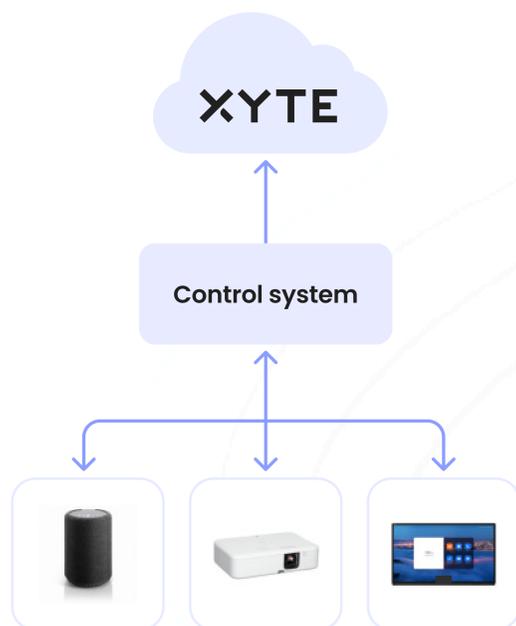

## Cloud-to-Cloud Integrations

Connect securely with 3rd party cloud services such as Zoom Rooms, Crestron XiO, Neat, QSC-Reflect, Domotz, Biamp, Logi Sync, Poly Lens and others to automatically import and manage all devices.

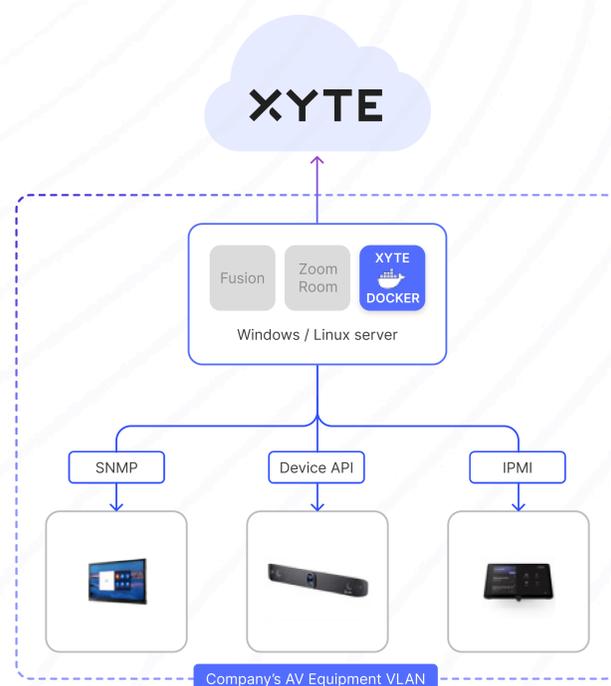

## Custom Modules

Leverage Xyte APIs to connect any other device, developing your own set of cloud-connected device modules.

## Connect+ Edge

Expand device visibility and management to all devices, including those on local networks, within a single interface.

## A Platform You Can Trust

Built with enterprise grade security, Xyte Device Cloud offers enterprise CIOs and IT directors a fully scalable cloud architecture with a highly resilient infrastructure, SOC 2 Type 2 certification, and the highest levels of privacy. Learn more about Xyte's Security at Scale.
