

The Ultimate Resource to Supercharge Family Engagement

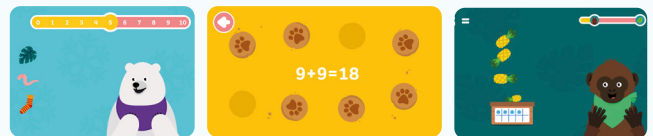

An innovative child-facing digital app with award-winning content that extends learning to the home.

How Do We Supercharge Family Engagement?

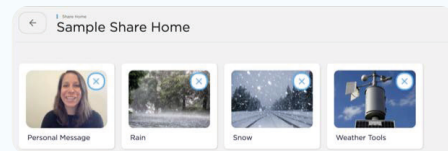

We provide children with developmentally appropriate, highly engaging, curriculum-aligned **literacy and STEM videos**.

We support children in building foundational math and literacy skills with **contextualized learning games**.

We extend learning from the classroom to home with personalized learning video playlists paired with video messages.

We strengthen caregiver-child interactions with MarcoPolo Let's Talk™: an innovative, low-lift family engagement tool that provides families with talk prompts based on their child's interests.
