

**LUMBER**  
Construction Workforce Management

## Prevent Time Fraud with Live Biometric Verification

Lumber's cutting-edge AI verification system ensures your workforce stays honest and your payroll stays accurate.

### Facial Recognition Matched to Photo ID

Our AI-powered system compares the live image of your team members with their uploaded photo ID, generating a similarity score. If the match isn't close enough, the system will flag it.

### Liveness Detection in Action

AI instantly detects and blocks images of screens, printed photos, or even 3D masks. Liveness checks ensure only real people are clocking in, stopping attempts to trick the system.

### Fast Results, Accurate Protection

No waiting around for approvals. Lumber's AI returns verification results in seconds, protecting your business from time theft and manipulation, including edited photos and other digital tricks.

#### Key Benefits

- ✓ **Eliminate Buddy Punching:** Ensure that only the right person is clocking in/out, every time.
- ✓ **AI-Powered Verification:** Our biometric system is designed to outsmart even the most creative attempts to fake attendance.
- ✓ **Seamless Integration:** Works smoothly with Lumber Time Tracking.
