FILLING AND CAPPING MACHINES

100%  MADE IN ITALY  STAINLESS STEEL

## TELM MACHINES

From small artisanal batches to industrial production, TELM provides flexible solutions for fish roe filling.

### Recommended models:

- ◆ **ALFA – Semi-automatic volumetric filler**

Ideal for small productions and specialty seafood processors. Ensures precise dosing and gentle product handling.

- ◆ **VORTEX – Advanced filling technology**

Designed for automatic lines and higher production volumes. Guarantees consistent accuracy and product integrity.

# Working with fish roe?

Choose TELM for a precise, hygienic and scalable filling solution for premium seafood products.
