

Signply

Specialty Range

High quality, smooth, paintable surface for signs.

IPL SignPly

IPL SignPly is a plywood panel designed specifically for the sign industry to provide a high quality, smooth, paintable surface which can be used in interior and exterior situations.

SignPly has been produced by IPL since 1985 and is known for its quality throughout New Zealand. It can be seen as signage on DOC tracks in some of the country's harshest climates.

Signply is the only New Zealand produced plywood sign board available.

At a glance

- Available 14mm thickness.
- Panels can be sawn, drilled and routed with all standard woodworking tools.

Technical Details

SignPly is available in 14mm with a paintable surface on one side.

Finishing

SignPly must be edge sealed with a good quality paint system to keep water from entering the plywood substrate. In doing this it will ensure that the sign will last for several years.

Panels can be sawn, drilled and routed with all standard woodworking tools.
