

elia

Smart Lock

Transform any locker into a smart locker.

The elia smart lock equips your lockers with secure, connected technology, integrated into the elia platform.

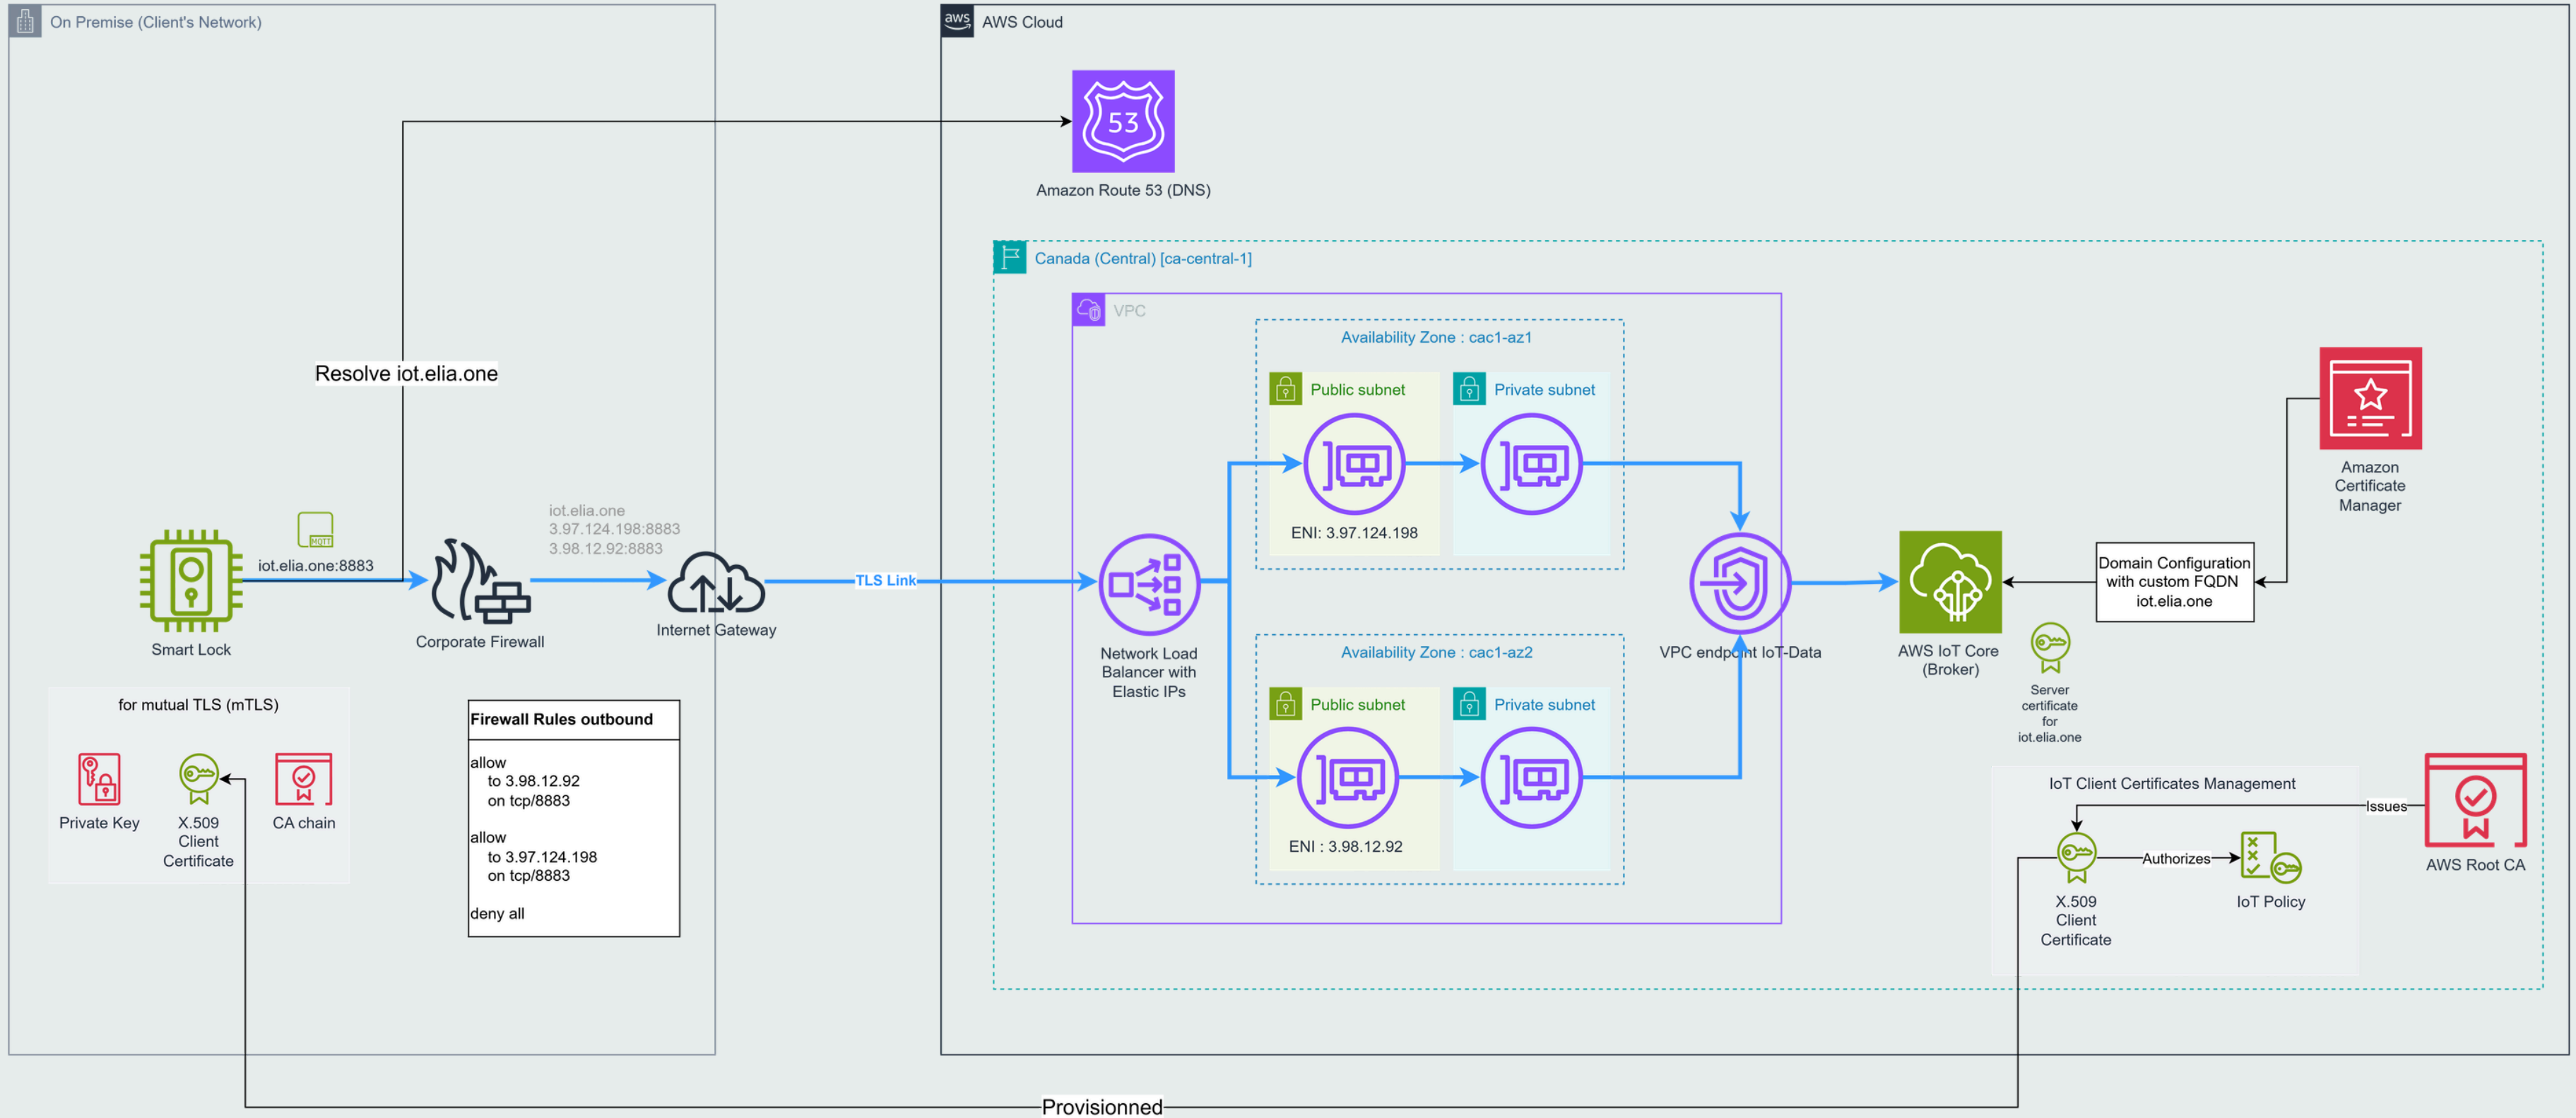

Designed for hybrid offices and flexible workspaces, it enables simple, centralized, real-time locker management.

- Self-managed assignment, permanent or temporary
- Booking through the elia platform
- Unlock via access badge or mobile
- Centralized access management
- Real-time history and control

Deliver a seamless, secure experience. No codes to remember.
