

RELI[®] Regional Anesthesia Trays

Spinal • Epidural • Combined Spinal-Epidural (CSE)

For more than 25 years, **MYCO Medical** has supplied the medical community with a robust portfolio of Anesthesia Needles. Building on that heritage and a clear understanding of clinician needs, we have extended our expertise into a comprehensive range of Regional Anesthesia Trays including Spinal, Epidural, and Combined Spinal-Epidural (CSE) procedures.

As a market leader in needles, MYCO Medical pairs its trusted needles with a wide selection of components, configured to match clinical needs and individual preferences.

Tray Types

Spinal Trays

- Available with both Quincke and Pencil Point needles
- Engineered to provide a distinct tactile "feel" and packaged with a comprehensive range of components
- Supporting a safe, consistent procedure and helping enhance patient outcomes

Epidural Trays

- Offered as Single Shot and Continuous Epidural configurations
- Full range of Tuohy and Hustead needle sizes, styles, and lengths to suit clinician preference
- Continuous trays include a choice of open-ended and multiport Epidural catheters to support extended medication administration

CSE Trays

- Feature specialized CSE needle sets and componentry
- Designed to combine spinal and continuous anesthesia within a single procedure for streamlined clinical care

Packaging & Customization

- **Packaging:** thoughtfully designed to provide efficient access to componentry while minimizing required storage space
- **Customization:** MYCO Medical can combine the tray components clinicians use most, helping ensure medication is administered safely and cost-effectively
