MERCURY
GROUND SUPPORT EQUIPMENT

AVEREST RAMP RUNNER MOBILE EGSE CHARGING CART

The Averest Ramp Runner is a highly versatile mobile charging solution for electric ground support equipment (eGSE). Designed for airports and operators looking to expand electrification without the expense of fixed infrastructure, it delivers fast, flexible charging directly on the ramp. Its rugged construction and user-friendly design make it ideal for high-traffic environments and rapid fleet transitions.

- Charge up to five eGSE units simultaneously from a single GPU power source, saving time and reducing ramp congestion
- Plug-and-play connection to standard 208 VAC, 3-phase power—no costly infrastructure or electrical upgrades required
- Durable steel chassis and heavy-duty tires built to withstand demanding airport conditions
- Integrated cable management keeps charging areas organized and minimizes tripping hazards
- Mobile cart design allows easy repositioning wherever charging is needed, offering unmatched operational flexibility
