

# Ramp Runner

Simple | Efficient | Flexible | Cost Effective | Reliable | Safe

The Ramp Runner is a state-of-the-art portable eGSE charging cart designed for efficiency and safety in aircraft ground support operations. Equipped with five individual charging ports, it is specifically engineered to meet the needs of batteries capable of CAN charging.

# Ramp Runner

## Key Features

- Five Charging Ports: Simultaneous charging for multiple vehicles.
- Automatic Battery Recognition: Designed to automatically detect compatible batteries upon connection.
- Robust Safety Features: Includes an emergency shut-off, alarm system, and parking brake for secure operations.
- Portable Design: Easy to tow with a lightweight framework, perfect for any ground support environment.

## Specifications

- Dimensions:
  - Length: 145"
  - Width: 66"
  - Height: 70" (with antenna)
- Weight: 3000 lbs (approx. 1360 kg)
- Power Input: Connects to 400Hz GPU for efficient energy supply.

## Safety Compliance

- Complies with OSHA regulations for electrical safety.
- Features alarms to prevent accidental towing while charging.
- Designed for safe operation in various environmental conditions.

## Training & Support

- Comprehensive training is provided for operators to ensure proper use and safety.
- Ongoing support from Averest for warranty claims and customer inquiries.

## Warranty Information

Averest offers a one-year warranty covering defects in materials and workmanship, ensuring peace of mind with your purchase.
