***JetAire® conditioned air units – consistent comfort, consistent savings***

## **JetAire® M60 Mobile PCA**

**JBT - FOR THE PERFECT TURN**

# JetAire® M60 Mobile Pre-conditioned Air Units

JBT's JetAire M60 is mobile, diesel-powered conditioned air for your regional and narrow-body aircraft. A compact, reliable, high-performance design, the JetAire M60 saves money, improves passenger comfort, is easy to operate, and is designed for flexible operations in multiple applications.

## Save money

- Save money and fuel by reducing the need for the APU during the aircraft turn

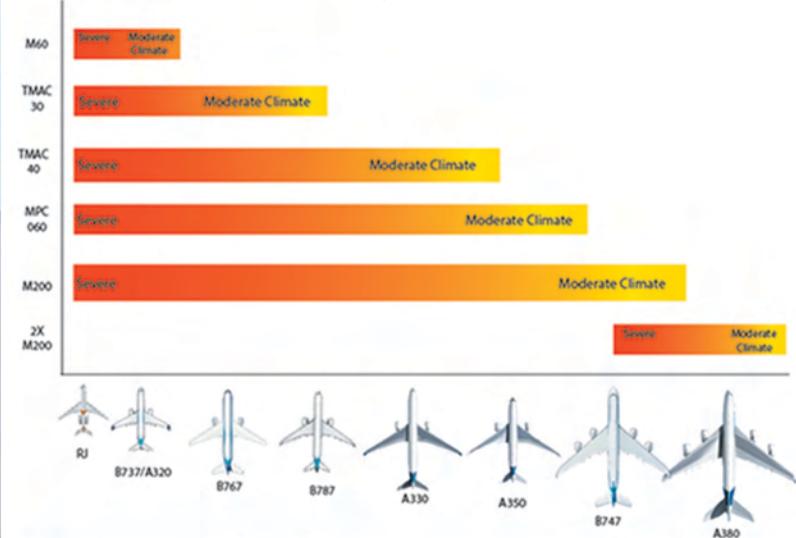

## Enhance passenger comfort

- Better defrost management means comfortable passengers; keep the cold air coming longer

## Easy to operate and maintain

- Intuitive, operator-assist HMI controls guide the user through operations
- Convenient layout facilitates connection to the aircraft
- Tier IV diesel engine options requiring no DEF. Tier III also available; Euro Stage V (will be available soon)
- Pressure-controlled VFD blower prevents over-pressurization
- Easy access to critical components and systems

## Operating Capabilities

## Flexibility

- Minimize the impact of defrost cycles with dual, independent refrigeration circuits
- Highly maneuverable cart design with efficient hose storage
