WILCOX LD7 CARGO DOLLIES

BUILT FOR HEAVY-DUTY CARGO HANDLING

Wilcox GSE Cargo Dollies are designed to withstand the many demands of ground handling operations. Engineered for strength, durability, and efficiency, they are the go-to solution for transporting ULDs and large cargo pallets on the tarmac.

Vertical restraints and pallet stops are interchangeable at every location on the dolly, allowing full adjustability to ensure the safety and security of pallets and ULDs, even in high-wind conditions or challenging ramp environments. Standard configurations are designed to handle ULD models 1-23 and common cargo pallet sizes.

This dolly features smooth-rolling casters, rugged tires, and reinforced frames that make for smooth, secure, and reliable cargo transport.
