

TDM Skills Bootcamps

Upskill your current workforce, recruit Apprentices trained to your needs and grow your business through tech and digital Skills Bootcamps.

Exploring AI & Automation for Work

Why choose this pathway?

This programme is designed to build **practical, responsible AI and automation capability** for existing employees. Through access to TDM's expert coaches and reflective practice, learners will develop the confidence to **identify and adopt opportunities to apply a suitable AI solution safely within existing organisational controls**. This programme will explore the **organisational AI landscape**, reflect on individual **AI knowledge**, mapping them against the **Skills England Framework**, and will turn an aspirational idea into an **AI prototype** to present and execute within their role, that is **safe, secure and scalable**.

What topics will be covered?

- Reflective Practice in Exploring AI & Automation for Work
- Redesign Organisational Workflows with AI
- Data, Performance & AI-Enabled Decision Making
- Secure, Responsible, Ethical & GDPR-Aligned AI Use
- Microsoft AI Governance –Agents, Prompts and Security

Typical tools covered:

- CoPilot Studio (agents etc.)
- Power Automate
- Power BI
