

THE FACULTY

JEFFREY TS HSU, MD, FAAD

As one of the few Harvard and Yale Faculty fellowship-trained, board-certified dermatologists with specialized proficiency in an array of cutting-edge treatments, Dr. Jeffrey T.S. Hsu is a distinguished expert in neurotoxins, laser surgery, Mohs micrographic surgery, leg vein treatments, soft tissue augmentation, and scar revision. With a strong emphasis on minimally invasive techniques, Dr. Hsu is widely recognized for his exceptional skills in facial and body rejuvenation.

Dr. Hsu is also acclaimed for his innovative combination and multi-modality treatments, achieving the best and longest-lasting results from a 3-dimensional approach. With over two decades of experience, Dr. Hsu has emerged as a pioneering figure in the field of aesthetic medicine and dermatology, particularly in the domains of lasers, injectables, dermal restoration and liposuction. His innovative treatment techniques have garnered widespread adoption among renowned physicians nationwide. Dr.

Hsu frequently travels nationally and internationally to lecture about his unique techniques to other dermatologists and cosmetic physicians. Dr. Hsu is also globally recognized for his artistry in cosmetic enhancement through injectables and lasers. Renowned as a leading authority in the field, he frequently serves as a distinguished keynote speaker at prestigious dermatologic and medical conferences worldwide. He also sits on the advisory boards of Allergan Aesthetics and Revance Aesthetics. Major international laser device companies actively seek out Dr. Hsu's collaboration to spearhead advancements and refine laser technologies. His invaluable contributions have paved the way for new developments and improved treatment modalities that have changed the landscape of aesthetic medicine. Recognized as a trusted source in the industry, Dr. Hsu's professional medical advice and groundbreaking work have been prominently featured in esteemed publications, including Forbes, Allure Magazine, Healthline, Teen Vogue, Oprah Magazine, Bustle, Dermatology Times, Yahoo! News and ABC7 Morning Show, among many others.

MINA-JACQUELINE AU

Mina-Jacqueline Au's career in advanced medical aesthetics is marked by pioneering contributions to the field. Mina has opened three medical practices, including two medspas and a plastic surgery practice. Notably in 2005, she established the country's largest and first day resort & medspa, **Cornelia**, in New York City. After just five years, she played an instrumental role in its sales to Elizabeth Arden for \$27 million dollars.

Following the acquisition of her medspa, Mina's expertise and track record drew the attention of **XpresSpa Group, Inc.**, an innovative brand that pioneered spa services in airport terminals. She was hired as a managing consultant, where she transformed the company's operations—expanding from just three locations to 27. By the time of her departure in January 2010, Mina had strategically positioned XpresSpa on the path to an IPO, which it achieved in June 2010 with

its NASDAQ listing under the ticker **XSPA**.

In addition to her entrepreneurial leadership, Mina has become a respected voice in medical research and education. She co-founded and spearheads the premier medical education conference, **Aesthetic Series**, and has been invited as a keynote clinical presenter at international symposiums for **Institut Pasteur** in Paris and Madrid. Her dedication to advancing science extended into pandemic research: as part of Institut Pasteur's USA team, she was one of only six individuals nominated nationwide for the **Sanofi-Pasteur Award** in 2021, honoring her role & theory in a Paris-based emergency study that significantly reduced ICU mortality rates among COVID-19 patients.

Mina's expertise has been featured on national television and in prominent media outlets, including *The Wall Street Journal*, *The Dr. Oz Show*, *The New York Post*, *CW Morning News*, *ABC Morning Show*, and *Huffington Post*. Mina is a member of **MENSA**, a high-IQ society for individuals who score in the top 2% on standardized intelligence tests globally. She also actively advocates for Dystonia awareness and is a patient ambassador for **Revance Therapeutics**, sharing her journey with the condition to foster understanding within the medical community.

RACHEL BODEN, LE

Rachel is a skincare and medical aesthetics professional whose work bridges evidence-based clinical practice and strategic education. With more than seven years of experience in the beauty and medical aesthetics industry, Rachel combines her training as a licensed esthetician with deep expertise in **brand development**, **provider education**, and **treatment protocols** to elevate both practitioner confidence and client outcomes.

After beginning her career in aesthetic marketing and brand strategy — where she supported product launches, developed clinical messaging, and partnered with providers and key opinion leaders — Rachel expanded her focus to hands-on clinical education. Her background includes creating educational content for aestheticians, medspa professionals, and providers, as well as supporting training programs with a focus on ingredient science, treatment planning, and device fundamentals.

Rachel earned her esthetic license to strengthen her clinical foundation in skin physiology, facial protocols, exfoliation chemistry, and barrier-focused care. This training allows her to translate complex science into clear, practical guidance for practitioners and clients alike — helping them understand not just *what* to use, but *why* and *how* it works.

Passionate about raising professional standards and improving skin health, Rachel uses her combined clinical and strategic insight to empower estheticians and aesthetic practices with the knowledge they need to deliver safe, effective, evidence-based care. From treatment planning and ingredient education to clinical communication and ongoing professional development, her work emphasizes clarity, confidence, and results.
