BRISK TEACHING
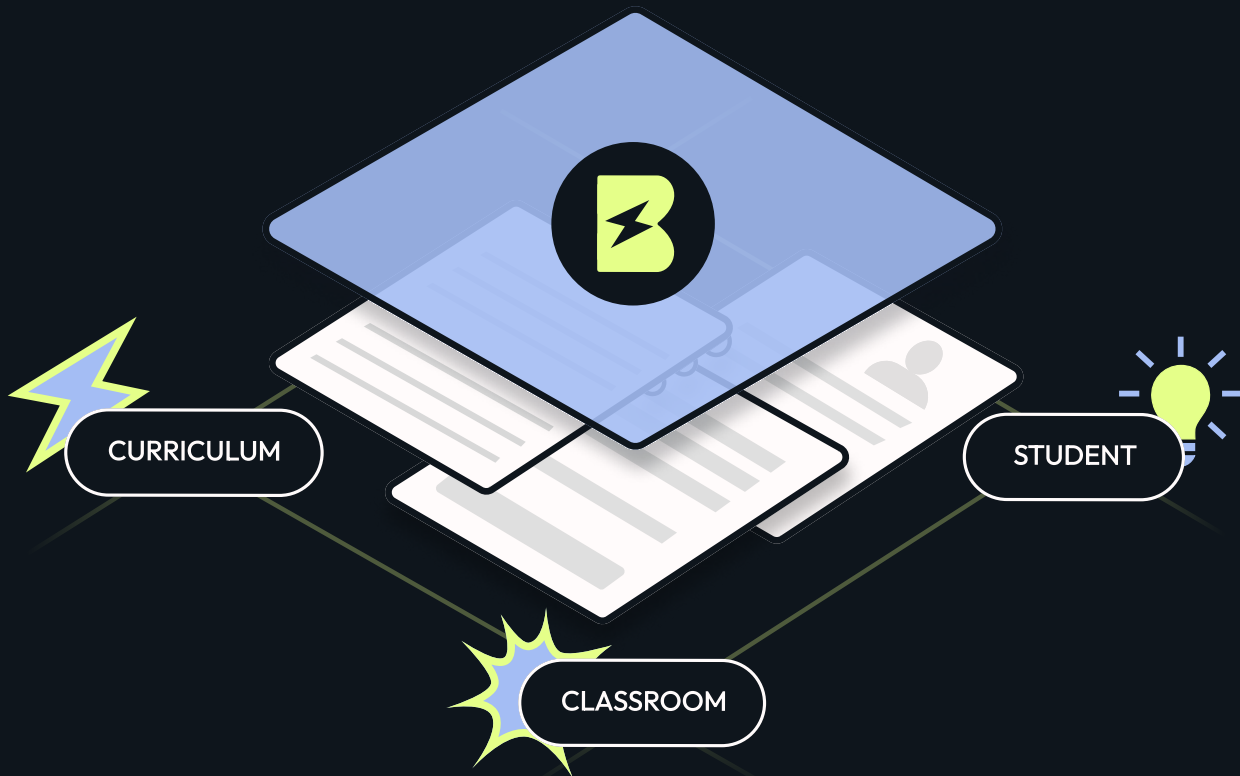

CURRICULUM INTELLIGENCE

The first AI that actually knows your curriculum.

THE PROBLEM
AI is everywhere. Alignment is not.

Today, teachers have been making AI work classroom by classroom. Prompt by prompt. Lesson by lesson. They are left hoping what they create still aligns to pacing, standards, and the curriculum their district adopted. **That disconnect slows everything down and makes consistency hard to achieve.**

THE SHIFT
Curriculum Intelligence closes the gap.

Curriculum Intelligence grounds Brisk's AI in your district's scope, standards, and materials so support feels aligned, reliable, and instantly useful.

WHAT IT DOES

It **learns** your curriculum.
It **anticipates** your needs.

It **adapts** to you.
It **stays safe** for schools.

FOR LEADERS
A system you can trust

Your curriculum becomes the source of truth. Districts set direction. Teachers create with confidence.

- ☑ Your curriculum becomes the source of truth for every output.
- ☑ Rigor and look stay intact across all new materials.
- ☑ Insights connect student data to what is being taught next.
- ☑ Modern learning experiences without replacing what already works.

FOR TEACHERS
Clarity without extra work

Teachers stop forcing AI to fit. Every idea starts in the right place.

- ☑ More clarity. AI starts aligned to your standards and pacing.
- ☑ More breathing room. Your curriculum works with you, not against you.
- ☑ More momentum. Every idea begins in the right instructional place.
