LAWS 250XL™

Liburdi® Automated Welding Systems

LAWS 250™ is the latest and most compact system in the lineup. This system was specifically designed for manufacturing applications where floorspace matters. The 250 remains a powerhouse for additive manufacturing, component repairs, and research applications. It supports **LASER** or **PAW** deposition using wire and powder filler materials.

** **CE, CSA or UL** certification upon request.*

LIBURDI® LAWS 250XL™

FEATURES:

Multi-process capability (PAW, LASER) supports ***powder*** or ***wire filler materials***

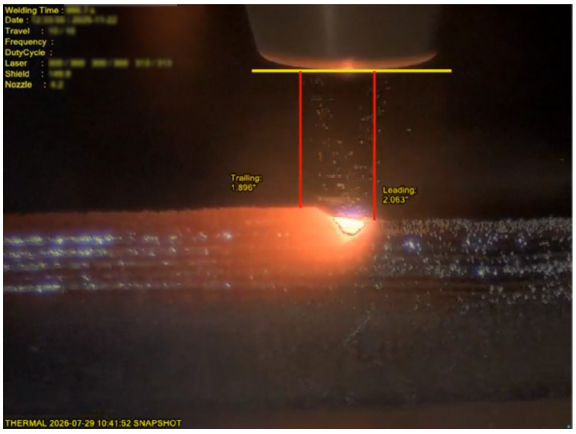

Integrated and customizable ***AI tools*** for weld and part identification

CAD to ***CAM*** capabilities powered by ***Liburdi®'s Additive repair software***

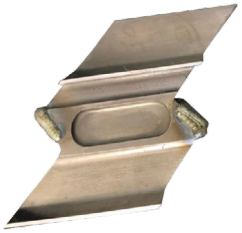

OPC UA compliant for secure data transfer and ***Industry 4.0 smart factory*** integration

Automation friendly: allows batch processing to improve overall operating effectiveness

AI Seam Tracker - LAWS Software

LPT Shroud Repair

HPT Tip Repair

Additive Manufacturing

SERVICE & SUPPORT:

Our equipment is designed and built by a team of passionate engineers who understand the product and process. Every system is developed with **long-term support and serviceability** in mind, backed by a dedicated team providing on-site or remote assistance when it matters most. From commissioning and programming to operator training and ongoing process optimization, Liburdi® delivers turnkey solutions designed for a smooth transition into production. We stand behind our systems and work closely with customers to build lasting partnerships founded on reliability, accountability, and responsive support.

** **CE, CSA or UL** certification upon request.*
