

AM FX Deactivator

EAS LABEL DEACTIVATOR
AM 58 KHZ TECHNOLOGY

FIT & FLEX

Compact design,
multiple applications, and
excellent return on investment

The AM FX Deactivator is a practical and economical solution for deactivating EAS AM security labels. It can be used in all store formats, including compact layouts such as pharmacies and drugstores.

In addition to multiple positioning options, it allows for use in two side-by-side checkouts simultaneously, reducing costs and optimizing space.

Compatibility: compatible with all 58 kHz adhesive tags from international standard manufacturers.

Ease of installation: “plug & play.” It does not require external electronics, reducing expenses and speeding up installation and maintenance.

Versatility: the AM FX Deactivator offers multiple mounting options. It can be used with a tabletop stand, a support for vertical or inclined installation, or mounted directly on the wall, easily adapting to different environments and needs.

Compact design: its modern and compact design allows for easy integration into small spaces without compromising the aesthetics or functionality of the environment.

Operational efficiency: with advanced AM EAS technology, the AM FX Deactivator ensures quick and precise deactivation of tags, guaranteeing fast and secure checkout operations.

As part of the EASi system (Inwave's intelligent EAS), this equipment is connected to the internet, allowing remote access, data generation and integration with other technologies.

AM FX Deactivator

EAS LABEL DEACTIVATOR

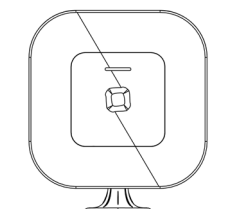

AM 58 KHZ TECHNOLOGY

Fit: adapts to the space of your checkout.

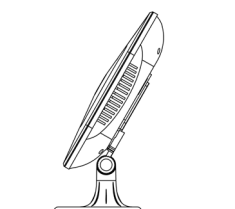

Flex: offers various usage possibilities.

With stand,
vertical position

Allows simultaneous
use by two side-by-side
checkouts.

With stand,
inclined position

More practicality and
ergonomics, optimizing
checkout operations.

On wall or panel,
vertical position

Allows installation under
the checkout counter, in
compact spaces.

With base,
horizontal position.

Positioned on the
checkout, no countertop
cut-out needed.

Embedded,
horizontal position

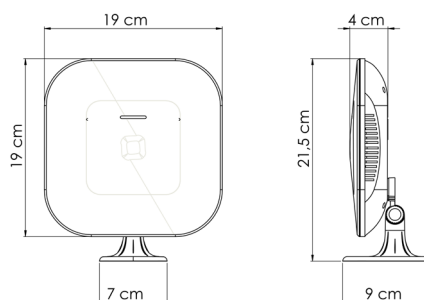

It can be flush mounted
on the counter, integrating
with the store layout.

Features

- Deactivation distance: 50 mm
- Electronics: internal
- Functions as Deactivator and/or Detector
- Deactivation speed: up to 0.25 m/s
- Deactivation rate: up to 1/sec
- Audible and visual warning during detection and deactivation

Mechanical characteristics

Dimensions [mm]	190 x 190 x 40
Weight [g]	800

About Inwave

Inwave is a French Brazilian company that develops, manufactures, and sells innovative and connected solutions, which aim to increase the results of physical stores by reducing losses, increasing operational efficiency and improving the shopping experience.

- A hardware and software developer for electronic security and operational management, recognized by the Brazilian government (MCTI and MDIC) for R&D and PPB activities (basic production process).
- A company certified with ISO 9001, with CE compatibility testing (Conformité Européenne) conducted by Bureau Veritas in France.
- Innovation in IoT with the development of the EASi - Intelligent EAS system - approved by thousands of retailers around the world.
