

February Health and Wellness Information

February is Heart Month!

Heart disease refers to the accumulation of plaque in the heart's arteries and is the second leading cause of death in Canada. In time, plaque buildup can lead to a heart attack, heart failure and may be fatal.

About one in twelve Canadians aged 20 years and over have been diagnosed with heart disease.

The good news is lifestyle changes may significantly reduce your risk!

- Be physically active
- Eat a healthy diet – lots of fruits & veggies!
- Maintain a healthy weight
- Reduce stress
- Limit alcohol use
- Stop smoking

Good management of high blood pressure, high cholesterol and diabetes will reduce your risk of heart disease complications.

Interested in reducing your heart disease risk? Talk to your Preferred Provider Network (PPN) pharmacist!
