

A Digital Voice Solution for Any Sized Business

Whatever you need, we have a solution

NEWT is the only solution to combine the flexibility and security of in-the-cloud technology with optional on-premise hardware to provide maximal uptime. From fully cloud-based solutions for distributed teams to hybrid solutions for on-site enterprises, NEWT has what you need to stay connected.

We're Here to Power Your Success

Easy Deployment

Our in-house team delivers on-site professional installation and comprehensive training focused on your business needs.

Feature-Rich

Your NEWT system is loaded with 91 enterprise-grade features to improve business efficiency and employee productivity.

Reliable Voice Calling

Features mean nothing if your calls aren't getting through! Our Service Level Agreement (SLA) guarantees 99.99% uptime in our core network. When paired with our **Business Internet**, NEWT offers the best possible voice quality and call reliability.

One-Call Support

With full developmental and diagnostic control of our proprietary voice platform, our in-house specialists can take direct ownership of your **support** needs. NEWT's 611 service connects you to our Support Centre, in Cambridge, Ontario.

Easy to Manage

Make changes to your phone system quickly with our intuitively-designed web-accessible user interface. Our online support videos provide comprehensive **training** anytime you need it.

Flexible and Scalable

NEWT's digital voice solution scales easily to fit any sized business. We offer various hardware options to suit your work style, and **NEWT Mobile** lets you take your business anywhere and stay connected.

THE NETWORK

The Network Behind NEWT

NEWT's solution runs on the private Fibernetics CLEC network, which provides a stable and secure foundation to power your business voice service.

Our voice network coverage area is one of the largest in Canada, covering over 90% of the population, and we're continually expanding our network to better serve our customers.

With in-house developmental control and the ability to deliver a fully managed end-to-end solution, we can offer the best possible voice quality, system reliability, and technical support in the industry.
